

## Stakeholder Questions:

We will be asking these questions throughout the presentation today to help facilitate conversation and engagement. We want to hear any questions you may have that are not included here.

1. What environmental justice factors should the Department of Environmental Quality consider in the Department's analysis of the Advanced Clean Trucks rule?
2. What are the greatest potential benefits to North Carolina that you see in adopting the Advanced Clean Truck rule?
3. What does the adoption of the Advanced Clean Trucks rule mean to you and your community or organization?
4. What changes do you envision ACT would bring to your business or your community?
5. What are the biggest challenges to meeting the sales targets for MHD ZEV?
6. What does NC need to do to support a successful transition to zero-emission MHD vehicles in our state?
7. What are some potential challenges that the Department of Environmental Quality may face in developing the Advanced Clean Trucks rule?
8. How can the Department of Environmental Quality improve engagement with stakeholders, including Environmental Justice communities, during this process?
9. What other topics should the Department of Environmental Quality consider in the development of the Advanced Clean Trucks program that were not covered in the presentations today?
