

# Enviva Pellets Ahoskie – Public Hearing

## PROPOSED PROJECT

Enviva Pellets, LLC – Ahoskie Plant applied to the NC Department of Environmental Quality’s Division of Air Quality (DAQ) for a Title V air permit renewal and associated modifications to increase production at its wood pellet manufacturing plant at 142 NC Route 561 East, Ahoskie, NC 27910, in Hertford County.

The proposed modifications include a request to install air pollution control devices, increase facility production from 481,800 oven dried tons to 630,000 oven dried tons per year, and increase the percentage of softwood to a maximum of 100%. To increase production, the facility will be adding truck tipplers, hoppers, green hammermills, dry hammermills, pellet mills, and one pellet cooler system. To reduce volatile organic compound (VOC) and hazardous air pollutant (HAP) emissions, the facility proposes to install a regenerative thermal oxidizer and a regenerative catalytic/thermal oxidizer.

After all the proposed modifications have been completed, the facility will be classified as a PSD minor source for all criteria pollutants, HAP minor source for any single HAP, and HAP minor source for all combined HAPs. DAQ reviewed the permit application and is seeking public comment.
