

## eDMR Release Notes

Version: 0.51

Release Date: 5/3/2020

#	Issue	Issue Fix
1	eDMR System: Password reset screen needs additional text for instructions for resetting password and questions	<p>The password reset screen was updated to provide additional instructions for user to clarify what should be done when resetting password or setting up submitter electronic signature questions/answers. The updates included the following additional information:</p> <ul style="list-style-type: none"><li>• Indicate that temporary password received via email should be used as the current password</li><li>• Provide Password strength requirements on screen</li><li>• Indicate that Questions only need to be entered for a new submitter account or can be updated for an existing submitter account</li><li>• Provide the Question/Answer requirements on screen</li></ul>
2	eDMR System: Update "Failed to Submit" Confirmation email to reflect the submittal date and time stamp	<p>The "Failed To Submit" confirmation email has been updated to include the submittal date and timestamp of the report submittal.</p>
3	eDMR System: The PDF copy of COR needs to be updated to reflect electronic signature	<p>The PDF copy of eDMR report has been updated to reflect an indication of electronic certification and electronic signature on the Copy of Record (COR). Some minor format and content updates were made to address incorrect links and language as well as adding a footer to indicate the stored COR name.</p>
4	eDMR System: Confirmation email has Form Feeds that result in multiple pages when printed	<p>An issue was resolved regarding the format of the confirmation emails from the eDMR system in which the printing of the email resulted in multiple printed pages. When users tried to print the confirmation email after report submittal had been processed, the printed version was 11 pages long. This issue has been resolved and the printed version of system emails is now a single printed page.</p>

#	Issue	Issue Fix
5	eDMR System: Inactive accounts should not be LOCKED when attempted logins fail	<p>An issue was fixed in which an inactive user account would be locked when the user tried to login to the inactive account. The account status would change from INACTIVE to LOCKED after 5 failed attempts. The inactive account should not be LOCKed but rather it should immediately display a message indicating the account is INACTIVE. Also, if a user tried to "Request Password Reset" or "Forgot Password?" from Login screen for an account that was INACTIVE, it was completing the action and should not have. Instead, there should be a message displayed indicating the account is INACTIVE.</p> <p>This issue has been resolved and the following message is now displayed on Login Screen as follows after the first attempt at Logging in, Requesting Password Reset or Forgot Password for an INACTIVE user account:</p> <p>Your account is Inactive. Please contact the eDMR Administrator at <a href="mailto:edmradmin@ncdenr.gov">edmradmin@ncdenr.gov</a> for assistance.</p>
6	eDMR System: ORC names duplicated many times in ORC pick list	<p>An issue was fixed to resolve a problem with the ORC drop-down list that began following the electronic signature updates in October 2019. Some users had reported that operator names were displayed multiple times in the ORC pick list on the initial report screen. This issue has been resolved.</p>
