

eDMR Release Notes

Version: 0.52

Release Date: 5/17/2020

#	Issue	Issue Fix
1	eDMR System: ORC List Error occurring when creating/maintain reports for permits with no ORC	An issue was fixed regarding an error that began occurring for some permits after a fix was implemented in Release 0.51 on 5/3/2020 to address a problem with duplicated ORC names in the operator drop-down list on the main report page. Everything worked correctly to order the list and remove the duplicates but if the ORC designation was missing, as is the case for some permits, an error occurred when user tried to create a report or view an existing report. Issue was resolved and errors no longer occurring for these situations.
