

**Report to the North Carolina General Assembly's
Joint Legislative Oversight Committee on Agriculture and
Natural and Economic Resources, Environmental Review
Commission, and Fiscal Research Division**

*Division of Mitigation Services
Annual Report*

November 1, 2023

**NORTH CAROLINA DEPARTMENT OF
ENVIRONMENTAL QUALITY**

Pursuant to G.S. 143-214.13

NC Division of Mitigation Services

The North Carolina Division of Mitigation Services (DMS) is a nationally recognized Department of Environmental Quality (DEQ) initiative that restores and protects wetlands and waterways for future generations while offsetting unavoidable environmental impacts from development. DMS supports environmentally responsible economic development through the procurement of high-quality restoration projects that satisfy mitigation requirements. From the mountains to the coast, DMS has implemented over 850 projects since inception that have protected more than four-million feet of stream and 80,500 acres of natural areas.

Protecting North Carolina's natural resources is critical to maintaining the state's quality of life, its economic growth and the health and well-being of its residents. DMS works to ensure that cost-effective mitigation alternatives succeed to benefit the state's water resources.

DMS offers four In-Lieu Fee mitigation programs designed to assist private and public entities in meeting state and federal compensatory mitigation and nutrient offset requirements. DMS maximizes mitigation investments to restore streams, wetlands and riparian buffer areas using a watershed approach by working with state and local partners, willing landowners, and private vendors. The N.C. Department of Transportation (NCDOT) and other developers voluntarily use DMS to move projects forward in a timely and cost-effective manner.

In the fiscal year (FY) 2022-2023, the DMS:

- Assisted the NCDOT in obtaining permits for 49 transportation projects by providing 48,478 stream mitigation credits and 81,795 wetland mitigation credits.
- Assisted customers with 237 development projects in the Statewide Stream and Wetland, Riparian Buffer, and Nutrient Offset In-Lieu Fee (ILF) Programs by providing:
 - 30,928.0 stream credits,
 - 44,910 wetland credits,
 - 1,183,342.0 credits of buffer mitigation (equivalent to 27.0 acres of buffer restoration)
 - 42,846.0 pounds of Nitrogen reduction, and
 - 3,300.0 pounds of Phosphorus reduction.
- Compared to previous fiscal years, the need for Phosphorus mitigation greatly increased.
- Further developed the Natural Infrastructure Flood Mitigation Program (NIFMP) by:
 - working with the Advisory Board to finalize program goals,
 - using H&H modeling to study the effect of restoration on flood attenuation, and
 - completed literature reviews and analysis to determine the best natural infrastructure solutions for North Carolina.
- Began the Stoney Creek Pilot project, a pilot within the NIFMP, on January 24, 2023. The conceptual plan for the Stoney Creek Pilot project was reviewed by DMS and finalized in July 2023.

Natural Infrastructure Flood Mitigation Program

In 2020, the NC General Assembly created the Natural Infrastructure Flood Mitigation Program in DMS as part of SL 2020-79. The session law incorporated flood storage capacity enhancement projects into the activities of and purposes of DMS. Since the creation of this program, DMS obtained a Community Development Block Grant from the North Carolina Office of Resilience and Recovery to fund the development of the program's goals, complete modeling to study the effect of restoration on flood attenuation, and analyses to determine the best nature infrastructure solutions for North Carolina.

Funding for flood storage projects and flood storage capacity planning was included in the 2021 Appropriations Act. DMS received \$3.5 million in appropriations to create one or more pilot projects addressing chronic flooding in the Stoney Creek watershed impacting businesses, roadways, and access to emergency services in Wayne County and Goldsboro.

The pilot projects shall also serve as the basis for expanding natural infrastructure flood mitigation projects to additional watersheds and scaling solutions to enhance community resiliency across North Carolina.

DMS executed the contract in December 2022 and kicked off the Stoney Creek Pilot Project in January 2023. The first stakeholder outreach meeting was in February and a presentation to the Wayne County Board of Commissioners was held in March 2023. The conceptual plan for the Stoney Creek Pilot project was reviewed by DMS and finalized in July. The team continues to work on gathering information of the watershed's existing conditions and completing the hydrology and hydraulics modeling. DMS anticipates this report and data in October 2023.

NC Flood Resiliency Blueprint

The 2021 Appropriations Act provided \$20 million for DMS to develop North Carolina's first Flood Resiliency Blueprint. The Blueprint is a statewide watershed planning effort to establish a framework and tools to assist local communities in decision-making related to reducing flood risk and increasing resilience. The Blueprint's goals are to:

- Identify sources and types of flooding.
- Account for existing resilience efforts, programs, and funding sources.
- Inventory data & identify data gaps.
- Develop visualization and decision-making tools that quantify and map flood risk, match appropriate resilience tools and tactics to areas of risk, match available funding sources to specific actions, and prioritize specific actions.
- Make recommendations for statewide implementation, including governance and decision-making structures, future blueprint iteration management, watershed-scale stakeholder engagement, and stewardship of projects that receive state funding.

The contract for the Blueprint was executed in 2022, The Blueprint team passed several important milestones in 2023. The program’s Gap Analysis is nearly complete, and other Phase 1 deliverables are on schedule with the goal of producing a draft Blueprint by the end of December 2023. The team has designed and launched a standalone website for the Blueprint project (www.ncfloodblueprint.com) and held four successful stakeholder outreach sessions in New Bern, Lumberton, Wilmington, and Haywood County. These included local leader meetings and roundtables as well as free-flowing public information sessions. Also, the Blueprint Team included over 150 subject matter experts from Federal, State, County, Municipal, and Tribal governments; non-governmental organizations; and universities to take part in seven Technical Advisory Groups, to help inform the team on all aspects of the project.

Statewide Stream and Wetland Mitigation Losses and Gains

G.S. §143-214.13 requires DMS to document statewide wetland losses and gains and compensatory mitigation performed under G.S. §143-214.8 through G.S. §143-214.12. The data in **Table 1** below have been provided by the Division of Water Resources (DWR) and reflect permitting by the DEQ. The remainder of this report documents DMS compensatory mitigation.

Table 1. Permitted Stream, Wetland, and Buffer – Losses and Gains*

DWR Fiscal Year 7/1/2022 through 6/30/2023	
Streams (Linear Feet)	YTD
Lost from Permitting	132,001.00
Gained from permitting (mitigation)	18,060.00
Wetlands (Acres)	YTD
Lost from Permitting	69.02
Gained from permitting (mitigation)	61.89
Riparian Buffers (Acres)	YTD
Lost from Permitting	157.20
Gained from permitting (mitigation)	64.53

*Data is from the DWR database. Due to permit processes, mitigation and impacts may not (usually do not) occur in the same quarter. Data may include impacts to resources that do not require mitigation (under required thresholds, for example). Due to versions and revisions, different versions of the same project may occur in the same reporting period causing a double calculation of impacts. As of May 4, 2017, the stream mitigation threshold requirements changed. Only impacts 300 linear feet or greater of perennial stream require mitigation. As of June 15, 2020, the wetland mitigation threshold requirements changed. Impacts 0.10 acre or

greater of wetlands require mitigation. Mitigation required by the U.S. Army Corps of Engineers applicable to permitted impacts is not tracked by DWR.

Property Inventory

During the 2022-2023 fiscal year, the State Property Office closed 50 conservation easement transactions totaling more than 518 acres associated with DMS’s projects. A complete listing of the properties closed this fiscal year is shown in **Appendix A-1**.

Since the program’s inception, more than 80,500 acres of conservation land or conservation easements have been acquired by DMS and its partners. A complete inventory of all properties associated with DMS projects acquired to date is presented in **Appendix A-2**.

Accounting of Receipts and Disbursements of the Ecosystem Restoration Fund

The Ecosystem Restoration Fund is the account for the Statewide Stream and Wetland ILF Program. This program has two main accounts, Fund 2981 and 2937. **Table 2** below shows the program financials for the 2022-2023 fiscal year.

Table 2. Statewide Stream and Wetland ILF Financials

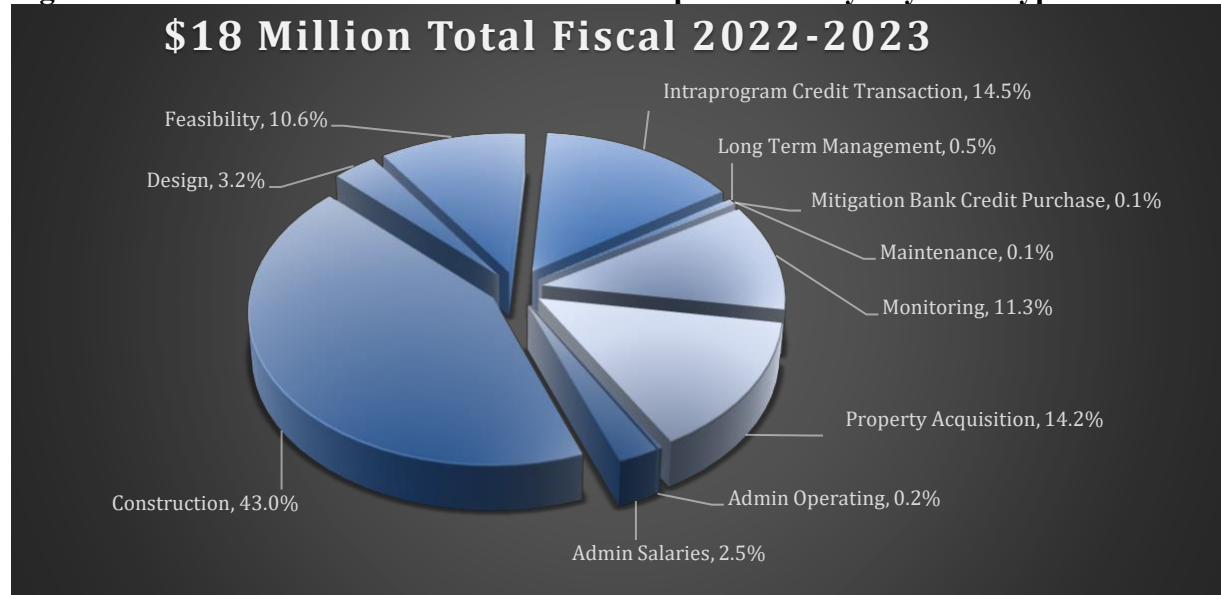

Beginning Cash	\$95,187,550.83
Revenues	\$26,715,056.46
Expenditures	\$14,366,446.47
Adjustment to Cash Basis	\$4,496.87
Allow-FV Bond Index Fund	(\$256,933.77)
Bond Index Fund	\$178,517.26
Equity Index Fund	\$1,520,025.63
Ending Cash and Cash Equivalents	\$108,973,273.07

In fiscal year 2022-2023, DMS accepted 129 new customer ILF payments into the Statewide Stream and Wetland Program, totaling \$26,715,056.46. These 129 customer payments represent 111 development projects, 30,927.500 stream credits and 45.306 wetland credits. **Appendix B** provides Statewide Stream and Wetland Program fiscal year 2022-2023 receipts and requirements.

Figure 1 below summarizes the Ecosystem Restoration Fund expenditures by payment type for the Statewide Stream and Wetland Program. A detailed breakdown of the expenditures is in **Appendix C**.

Figure 1. Statewide Stream and Wetland ILF Expenditures by Payment Type

Mitigation Bank Credit Costs

Reporting requirements of G.S. §143 214.13 require DMS to compare project costs with private mitigation bank rates. For this analysis, DMS used the actual submitted prices for mitigation bank credits from requests for bids in the last fiscal year. **Table 3** shows the range in prices for mitigation bank credits in 2022-2023 fiscal year. A complete list of purchased bank credits during 2022-2023 is listed in **Appendix D**.

Table 3. Mitigation Bank Prices in 2022-2023

MITIGATION TYPE	RANGE OF BANK PRICES PER CREDIT
Stream Mitigation Credits	\$439 to \$750
Riparian Wetland Mitigation Credits	\$50,000 to \$120,000
Non-Riparian Wetland Mitigation Credits	\$45,000 to \$89,087
Coastal Marsh Mitigation Credits	None Submitted
Riparian Buffer Mitigation Credits	\$0.89 to \$4.95
Nitrogen Offset Credits	\$9.73 to \$180.00
Phosphorus Offset Credits	\$142.34 to \$675.00

DMS Mitigation Costs

Recent DMS credit costs were summarized by analyzing full delivery contracts and mitigation bank purchases that DMS awarded over the last three fiscal years. **Table 4.** includes project contracts, administration, overhead, and other costs required to complete these projects. The program rates for the last three years are also summarized. Note that DMS did not contract for any coastal marsh wetland projects in the last three years.

Table 4. Recent Credit Costs and Program Rates

CREDIT TYPE	RANGE OF RECENT CREDIT COSTS PER CREDIT	PROGRAM RATES*
Stream	\$425 to \$800	\$558.81 to \$646.12
Freshwater Wetland	\$40,000 to \$120,000	\$61,264.36 to \$149,604.11
Coastal Marsh Wetland	N/A	\$560,000
Riparian Buffer	\$0.75 to \$4.95	\$0.94 to \$6.12
Nutrient Offset Nitrogen	\$6.78 to \$180	\$9.24 to \$133.96
Nutrient Offset Phosphorus	\$96 to \$675	\$138.78 to \$689.59

* DMS In-Lieu Fee Program mitigation rates are set using the Actual Cost Method, which is a full cost accounting method and may result in premium rates in high-cost watersheds.
