NC Coastal Resources Advisory Council
July 12, 2016
NOAA/NERR Administration Building
Meeting Summary

Attendance

Spencer Rogers (Vice Chair)	Rudi Rudolph (Vice Chair)
John Brodman	Mike Moore
David Moye	Beth Midgett
Todd Roessler	Lee Wynns
Kris Noble	Johnny Martin
Bobby Outten	Dave Weaver

Call to Order

Spencer Rogers called the meeting to order with 12 members in attendance.

Temporary Erosion Control Structures

Staff presented temporary erosion control structure rule amendments, specifically as it pertains to the 8-year time limit for sandbags. The council discussed that the rule amendments would allow replacement every eight years which would essentially remove all time limits for as long as a structure remains threatened. The council expressed concerns that this will remove the incentive for beach nourishment, terminal groins, or other mitigation options at the local level as an alternative to sandbags. It was concluded that incentives should be maintained and to retain the one time per structure provision. David Moye made a motion to retain the language that would allow temporary erosion control structures one time per property. The motion was seconded by Dave Weaver and the motion passed with 7 in favor and 2 opposed.

Sea Level Rise and Inlets

Spencer Rogers presented on the variations in shoreline rates due to sea level rise and inlets.

Estuarine Erosion Control

Staff presented the DCM Living Shoreline Strategy and accomplishments to date. Staff also presented a regulatory update regarding the General Permit for the construction of marsh sills.

Adjourn

With no further business the Council adjourned and joined the CRC meeting.
