

Miocene Geology of the Continental Shelf: Onslow Bay, North Carolina

Miocene Seismic Sequences, Unconformities, and Time-Stratigraphic Sections

North Carolina Geological Survey Map 3 prepared by Stephen W. Snyder, N. C. State University; Albert C. Hine, University of South Florida; Stanley R. Riggs, East Carolina University; and Scott W. Snyder, East Carolina University 1993

The map and cross-sections were constructed from the interpretation of high-resolution seismic-reflection data collected in association with research programs funded by the National Science Foundation, NOAA Sea Grant, U.S. Minerals Management Service, U.S. Geological Survey, and the North Carolina Geological Survey.
