The North Carolina Geological Survey stocks complete North Carolina coverage of topographic maps. This index shows the coverage of the 1:24,000 (7.5-minute) scale maps and can also be used to determine coverage for the 1:100,000 scale and 1:250,000 scale topographic maps. Inside each rectangle is the name of the map that covers that region. Use this name when ordering maps. Maps may be ordered by telephone, through the mail, or at the NCGS office on the 5th floor of the Archdale Building (512 N. Salisbury St., Raleigh). Payment may be cash, check, money order, or credit card. All in-state sales will be subject to 6% state sales tax. A handling fee will be added to cover mailing and packaging costs. Maps are shipped via first class mail. Call our main Raleigh office at (919) 733-2423 for more information. Parking is available for visitors to the Archdale Building in the visitor's deck on Salisbury Street. The N.C. Geological Survey has complete state coverage of orthophoto quadrangles (aerial photographs that cover the same areas as the 7.5-minute quadrangle sheets), including false-color infrared orthophotos for the area around Wilmington. The NCGS also has a List of Publications on the geology and mineral resources of the state.

10,000 copies of this document were printed at a cost of \$3,000 or .30 per copy  
North Carolina Department of Environment, Health and Natural Resources  
Printed on recycled paper.
