NORTH CAROLINA GEOLOGICAL SURVEY

OPEN-FILE REPORT 93-35

DIVISION OF LAND RESOURCES

DEPARTMENT OF ENVIRONMENT, HEALTH  
AND NATURAL RESOURCES

Charles H. Gardner  
Director and State Geologist

### GEOLOGICAL SURVEY SECTION

The Geological Survey Section examines, surveys and maps the geology, mineral resources, and topography of the State to encourage the wise conservation and use of these resources by industry, commerce, agriculture and government agencies for the general welfare of the citizens of North Carolina.

The Section conducts basic and applied research projects in environmental geology, mineral resource exploration and systematic geologic mapping. Services include identifying rock and mineral samples submitted by citizens and providing consulting services and specially prepared reports to agencies that need geological information.

The Geological Survey Section publishes Bulletins, Economic Papers, Information Circulars, Educational Series, Geologic Maps and Special Publications. For a list of publications or more information about the Section contact the Geological Survey Section, Division of Land Resources, at Post Office Box 27687, Raleigh, North Carolina 27611-7687, or call (919) 733-2423. The fax number is (919) 733-0900.

The street address for visitors is 512 North Salisbury St., Raleigh, NC. We are located on the 5th floor of the Archdale Building.

Jeffrey C. Reid

# PERMITTED ACTIVE AND INACTIVE MINING OPERATIONS

in

NORTH CAROLINA AS OF JUNE, 1993

by

Jeffrey C. Reid, Robert H. Carpenter and Tracy E. Davis

## INTRODUCTION

This report identifies the active and inactive mining operations permitted by the Land Quality Section, Division of Land Resources, as of June, 1993. This annual report provides a comprehensive listing of permitted mines by county and by commodity. The report includes historical data on permitting and reclamation statistics, mineral production news, regulations, legislation, and sources of geological information in North Carolina. This information is made available because of a demand for it by the mining industry and its suppliers, governmental agencies and the public.

## MINERAL PRODUCTION NEWS

North Carolina produces a significant quantity and dollar value of industrial minerals. These include clays, feldspar, gemstones, scrap mica, peat, sand and gravel (construction and industrial), stone (crushed and dimension), pyrophyllite, lithium minerals, olivine, and phosphate rock. Estimated production by value in 1991 decreased by 8.4% from that of 1990. The value dropped from \$546.6 million in 1990 to \$517.2 million in 1991 according to the U.S. Bureau of Mines' annual preliminary report, The Mineral Industry of North Carolina in 1991. Despite the decline, the U.S. Bureau of Mines report noted the State "... continued to lead the Nation in the quantity and value of lithium minerals, feldspar, scrap mica, olivine and pyrophyllite produced. The State continued to lead the Nation in the production of clay used for the manufacture of bricks and ranked second in the quantity of common clay mined. Overall, North Carolina's rank dropped from 20th in the value of all mineral commodities produced in 1990 to 21st in 1991." Significant decreases in the value of crushed stone, as well as feldspar, scrap mica, both construction and industrial sand and gravel, and pyrophyllite, more than offset small to moderate increases in the value of clays, lithium minerals, olivine, phosphate rock, and peat according to the Bureau of Mines. The State is a major producer of phosphate rock.

## MINING ACT OF 1971

The Mining Act of 1971 (G.S. 74-46 through G.S. 74-74) requires that any person or firm wishing to engage in mining that will affect one acre or more in surface area must first obtain a valid state mining permit. The Land Quality Section, Division of Land Resources, administers the Mining Act. Other permits that may pertain to mineral extraction and processing, including air and water permits, are issued by the Division of Environmental Management. The Department of Environment, Health and Natural Resources (DEHNR) published a guide to environmental regulations entitled the 1991 North Carolina Environmental Permit Directory which is "a general introduction to environmental regulations and an overview of requirements governing the wise use and protection of the state's natural resources." The directory is available in the regional offices or from the Department's Office of Policy Development, P.O. Box 27687, Raleigh, NC 27611-7687 at a cost of \$5.00 (plus 6% sales tax for sales in the State). This publication is being updated in the fall of 1993. The telephone number is (919) 733-6376. We suggest you request a copy of the summary brochure (free) which contains a matrix.

## PERMIT FEE SCHEDULE

The 1990 North Carolina General Assembly authorized permit application processing fees for mining as well as dams and erosion and sedimentation control (see North Carolina Administrative Code, Title 15A, Department of Environment, Health, and Natural Resources, Chapter 5, Mining as amended January 1, 1991 [T15A:05 TOC-1]). Table 1 lists established fees for mining permits. A later amendment, May 1, 1992 involved visual screening.

## DATA ORGANIZATION

The listing of permitted active and inactive mines is reported in two ways. Appendix 1 lists active and inactive mines organized by county and then by permit number in that county; Appendix 2 is organized by commodity. The following database categories are provided for each permit: owner, permit number, mine name, street (mailing address), city, state, zip code, contact person, telephone, status (A=active, I=inactive) commodity code and permit expiration date. Commodity codes used herein follow.

AU	=	GOLD	MI	=	MICA
BS	=	BUILDING STONE	OL	=	OLIVINE
CL	=	CLAY/SHALE	PE	=	PEAT
CS	=	CRUSHED STONE	PH	=	PHOSPHATE
DS	=	DIMENSION STONE	PF	=	PYROPHYLLITE
FS	=	FELDSPAR	SG	=	SAND AND GRAVEL
GS	=	GEMSTONE	SI	=	SILICA SAND/QUARTZ
KY	=	KYANITE, SILLIMANITE, ANDALUSITE	TC	=	TALC
LI	=	LITHIUM	OT	=	OTHER

**Table 1. Mining permit application processing fees for a new mining permit, a major permit modification or a renewal permit. (See note below.)**

COMMODITY	ACRES*	NEW PERMIT	MAJOR MODIFICATION	RENEWAL
Clay	1 but less than 25	\$500	\$250	\$250
	25 but less than 50	\$1,000	\$500	\$500
	50 or more	\$1,500	\$500	\$500
Sand and gravel, gemstone, and borrow pits	1 but less than 5	\$150	\$100	\$100
	5 but less than 25	\$250	\$100	\$100
	25 but less than 50	\$500	\$250	\$500
	50 or more	\$1,000	\$500	\$500
Quarry, industrial minerals, dimension stone	1 but less than 10	\$250	\$100	\$100
	10 but less than 25	\$1,000	\$250	\$500
	25 but less than 50	\$1,500	\$500	\$500
	50 or more	\$2,500	\$500	\$500
Peat and phosphate	1 or more	\$2,500	\$500	\$500
Gold (heap leach), titanium and others	1 or more	\$2,500	\$500	\$500

\* Acres for new permits and renewal permits means the total acreage at the site. Acres for major modification of permits means that area of land affected by the modification within the permitted mine area, or any additional land that is to be disturbed and added to an existing permitted area, or both.

Note: A nonrefundable \$50.00 permit application fee is required for minor permit modifications. Minor permit modifications include ownership transfers, name changes and bond substitutions. A minor permit modification also includes lands added to a permitted area, outside the minimum permit buffer zone requirements, where no plans for mining related disturbance of the added lands have been approved. In addition, a nonrefundable \$50.00 permit application processing fee is required for permit renewal for an inactive site provided that any previously disturbed areas have been reclaimed in a manner acceptable to the Department. Once renewed, prior to initiating any mining related disturbance, an application for a major modification and a processing fee shall be submitted to and approved by the Department. All other changes are considered major modifications.

## MINING STATISTICS FOR ACTIVE AND INACTIVE MINES

The most recent year for which mining statistics for active and inactive mines are available is 1991. Table 2 lists, by commodity, the total number of permits, net acres disturbed in 1991, total acres reclaimed by the operator and released by DEHNR in 1991, total acres affected and unreclaimed, an estimate of total acres permitted, percentage of acres mined *versus* acres under permit, and percentage of permits by commodity *versus* total number of permits. Comparison with 1990 is also provided through Table 2. Figure 1 shows by commodity the total number of acres disturbed in 1991 *versus* the total acres reclaimed. For comparison, the same figure shows the total number of acres affected and unreclaimed and the estimate of the total acres permitted. Figure 2 shows the number of mining permits by commodity.

## LOCATION OF PERMITTED ACTIVE AND INACTIVE MINES IN NORTH CAROLINA

This report includes a series of generalized maps which show the distribution of permitted active and inactive mines on a North Carolina county base (Figures 3 - 6). In addition, generalized maps are included which show the distribution of active and inactive mining operations by commodity (Figure 7 - 13). Appendix 1 lists the permitted active and inactive mines by county. Appendix 2 lists the permitted active and inactive mines by commodity.

Table 2. Comparison of 1989 -1991 North Carolina mining statistics for active and inactive mines.\*

# APPLIED MINERALS RESEARCH AND GOVERNMENT RESOURCES IN NORTH CAROLINA

## North Carolina Geological Survey

The North Carolina Geological Survey provides basic geologic information. Current studies include geologic mapping, stratigraphic framework studies, mineral resource investigations, and limited environmental and engineering studies. It maintains a sample repository which includes drill core, cuttings, and geophysical borehole records. The repository contents are in a computer database to facilitate information retrieval. The geological survey has a modern heavy minerals laboratory.

Comprehensive geochemical atlases of the state have been published both for reconnaissance stream sediment data and for groundwater and stream water data. Detailed locations and analytical data are also reported for the entire state in a series of reports based on 1:100,000 metric (100K) sheets.

Geological mapping at a scale of 1:24,000 continues near Raleigh and Asheville. Contract geological mappers supplement staff geologists. Reconnaissance studies of offshore heavy mineral potential continue under a multi-year program to examine vibracores and integrated shallow high-resolution seismic studies. The need for beach nourishment on eroding barrier islands has prompted a new multiyear program of shallow high-resolution seismic surveys offshore to assess the potential for aggregate resources. The initial survey was conducted off the northern part of the state. Subsequent studies will include additional seismic data acquisition and may include recovering vibracores for grain-size determinations. Work continues on mica, kyanite, and garnet resources in portions of western North Carolina.

The geological survey has various publications on mineral commodities including heavy minerals, feldspar, silica, phosphate, gold, titanium, lithium, building stone, clay, high alumina-minerals limestones, asbestos minerals and talc, and other industrial minerals. These reports and guidebooks focus on different mineral producing districts in North Carolina. The geological survey also has geologic maps at several scales but only about six percent of the state is covered by 1:24,000 geologic mapping. Limited funding from the recent passage of the National Geologic Mapping Act will help marginally to accelerate the geologic mapping of the State at the scale of 1:24,000.

## Minerals Research Laboratory

Applied minerals research is active in North Carolina. The Minerals

Research Laboratory, a unit of North Carolina State University, is located in Asheville. The Laboratory develops new and improved processes to extract minerals from ore deposits and conducts research for the development of mineral resources in North Carolina, other states and foreign countries. Projects are undertaken as sponsored (fee basis) or state-supported projects. The laboratory conducts sponsored and unsponsored beneficiation projects on many commodities, especially industrial minerals. The Laboratory can conduct a wide variety of mineral dressing and pilot plant studies. Its facilities include mineral processing equipment and analytical support facilities for batch and continuous pilot plant research to develop workable flowsheets and to produce large samples for customer evaluation. Further information can be obtained from Mr. James T. Tanner Jr., NCSU Minerals Research Laboratory, 180 Coxe Avenue, Asheville, NC 28801. The telephone number is (704) 251-6155; the FAX number is (704) 251-6381.

#### Other state government agencies

The Department of Commerce and the Governor's office provide information on business development to domestic and international clients. The state's geographic information system, the Center for Geographic Information and Analysis, has extensive digital data useful for plant and mine siting and environmental impact studies. Users should contact Ms. Karen Sideralis, Director, 115 Hillsborough St, Raleigh, NC 27603. The telephone number is (919) 733-2090.

#### Analytical Instrumentation Facility (North Carolina State University)

North Carolina State University's Analytical Instrumentation Facility, part of the Engineering Research Services Division, has a modern, well equipped laboratory. It contains state-of-the-art analytical instruments which are available to characterize and to analyze a wide variety of materials. Prospective users should contact the Facility at (919) 515-7501 to discuss material analysis and prices of analytical services.

### **FURTHER INFORMATION**

Questions regarding the Mining Act of 1971 and permit fees should be directed to Mr. Tracy E. Davis, State Mining Specialist, Land Quality Section, Division of Land Resources, Department of Environment, Health and Natural Resources, P.O. Box 27687, Raleigh, North Carolina, 27611-7687. The telephone number is (919) 733-4574.

For more information about the State's geology, mineral resources, topographic maps, orthophotoquadrangles, and remotely sensed data, contact the North Carolina Geological Survey, P.O. Box 27687, Raleigh, North Carolina, 27611-7687. The telephone number is (919) 733-2423. The FAX number is (919) 733-0900.

## NORTH CAROLINA GEOLOGICAL SURVEY SELLS TOPOGRAPHIC MAPS

The North Carolina Geological Survey began selling USGS topographic maps in 1993. There is complete 1:24,000-scale topographic map and orthophoto-quadrangle coverage for North Carolina. These are revised systematically. The North Carolina Geological Survey stocks complete North Carolina coverage of 7.5-minute (1:24,000 scale), 30-minute (1:100,000 scale), 2-degree (1:250,000 scale), and 1:500,000 scale (state-wide) topographic maps.

Because of the growing number of requests for topographic maps we receive from geologists, surveyors, developers, road builders and contractors, campers, hikers, hunters and fishermen, we have determined that the NCGS can offer a major service by providing one location where almost any map of North Carolina will be available. Purchases can be made by cash, check or money order. Prices are as follows:

7.5-minute quadrangles (1:24,000 scale).....	\$3.00
30-minute quadrangles (1:100,000 scale).....	\$4.00
2-degree quadrangles (1:250,000 scale).....	\$4.00
1:500,000 scale state map.....	\$4.00
(Presently out-of-print)	

All in-state sales will be subject to 6% state sales tax. A handling fee will be added to cover mailing and packaging costs as follows:

Total cost of maps	Handling charge
\$0.00 - \$3.00	\$ 0.75
\$3.01 - \$5.00	\$ 1.25
\$5.01 - \$10.00	\$ 1.75
\$10.01 - \$20.00	\$ 2.25
\$20.01 - \$30.00	\$ 3.00
\$30.01 - \$50.00	\$ 4.00
\$50.01 - \$100.00	\$ 5.00
\$100.01 - \$200.00	\$ 7.50
\$200.01 - \$300.00	\$ 8.50
> \$300.01	inquire for handling charge

Orders picked up at the office avoid the handling fee. Credit card service (Mastercard™ and Visa™) are pending; when placing an order you may wish to inquire if the service is in place.

The N.C. Geological Survey also has complete state coverage of orthophoto quadrangles and a List of Publications on the geology and mineral resources of the state. Orthophotoquadrangles are reproduced on-site at a nominal cost.

The geological survey provides free searches to identify federal and state agencies or other organizations holding aerial photographs and remotely sensed data using the most current data on CD-ROM files. The NCGS can provide information on the availability of aerial photography coverage. Searches from a CD-ROM master database are free. Clients requesting this service must provide at a minimum: 1) a latitude-longitude coordinate, 2) a "window" defined by latitude-longitude coordinates (all four window corners), or both. Supplemental information on season, cloud cover, color or black and white products, scale, and other parameters are helpful to meet your need(s).

An index showing map coverage is available. Maps may be ordered by telephone (919-733-2423), through the mail (North Carolina Geological Survey, P.O. Box 27687, Raleigh, NC 27611-7687), or at the 5th floor Archdale Building office (512 North Salisbury Street, Raleigh). Payment may be cash, check, or money order. Checks should be made payable to the North Carolina Geological Survey. For more information, call (919) 733-2423. The new FAX number is (919) 733-0900.

Parking is available in the visitor's deck on Salisbury Street for visitors to the Archdale Building's NCGS office. The small lot on Wilmington Street is closer but spaces are limited.

The geological survey has a western regional office located in the Interchange Building in Asheville. That office's telephone number is (704) 251-6208; request connection to the geological survey.

Additional copies of this report may be obtained from the North Carolina Geological Survey, P.O. Box 27687, Raleigh, North Carolina, 27611-7687. The telephone number is (919) 733-2423. The FAX number is (919) 733-0900.

## ACKNOWLEDGEMENTS

We thank Ms. Beth Chesson for preparing the data for the appendices. Mr. Tony Sample, Land Quality Section, assisted with compilation of latitude and longitude measurements. Mr. Steve Reid, Division of Land Resources improved the report's clarity.
