

**INFORMATION AVAILABLE
FOR SELECTED WELLS OF THE
NORTH CAROLINA COASTAL PLAIN**

INFORMATION CIRCULAR 25

The Geological Survey Section publishes results of research in a series of Bulletins, Economic Papers, Information Circulars, Educational Series, Geologic Maps, and Special Publications. For a complete list of publications or additional information about the Section, please write: Geological Survey Section, P. O. Box 27687, Raleigh, North Carolina 27611.

Philip M. Brown, Chief Geologist

INTRODUCTION

The sample library and geophysical log files of the North Carolina Geological Survey Section serve as a repository for well information from the State. This publication is restricted to information about Coastal Plain well samples in the Section's library and geophysical logs in the Section's files.

All samples and/or logs listed herein may be inspected at the Office of Coastal Plain Geology, North Carolina Geological Survey Section, 4100 Reedy Creek Road, Raleigh, North Carolina 27687. Clients may arrange to obtain copy of logs run by public agencies (e.g. North Carolina Geological Survey Section) through the Office of Coastal Plain Geology. Logs preceded by an asterisk (*) are directly available as computer reproductions from the Land Resources Information Service, P. O. Box 27687, Raleigh, North Carolina 27611. Logs from exploratory oil and gas wells drilled in North Carolina may be obtained from Petroleum Information, Inc., 631 Walnut Street, Evansville, Indiana 47708. Other logs run by private companies (e.g. Layne Atlantic Company) must be obtained from those companies.

ACKNOWLEDGEMENTS

This compilation was funded through the Coastal Plain Regional Commission under grant number 10040091. Bruce H. Garner provided computer programming through the Management Information Services Division, Department of Administration, State of North Carolina. The staff of the North Carolina Geological Survey Section compiled the data for this report.

WELL CODE

The North Carolina Geological Survey Section assigns wells a four element alpha-numeric code that identifies the county in which the well was drilled, the type of well drilled, the chronological order in which the well was drilled during a given year, and the year in which the well was drilled. Abbreviations for counties and the types of wells drilled are given below.

County Abbreviations

BEA = Beaufort	GR = Green	ON = Onslow
BER = Bertie	HAL = Halifax	PAM = Pamlico
BL = Bladen	HAR = Harnett	PAS = Pasquotank
BR = Brunswick	HE = Hertford	PEN = Pender
CAM = Camden	HO = Hoke	PER = Perquimans
CAR = Carteret	HY = Hyde	PI = Pitt
CHO = Chowan	JOH = Johnston	RI = Richmond
COL = Columbus	JON = Jones	RO = Robeson
CR = Craven	LEE = Lee	SA = Sampson
CUM = Cumberland	LEN = Lenoir	SC = Scotland
CUR = Currituck	MAR = Martin	TY = Tyrrell
DA = Dare	MO = Moore	WAS = Washington
DU = Duplin	NAS = Nash	WAY = Wayne
ED = Edgecombe	NH = New Hanover	WIL = Wilson
GA = Gates	NOR = Northampton	

Well Types

C = stratigraphic test, cored
T = stratigraphic test, not cored
P = producing water well
OT = oil or gas test well

EXPLANATORY NOTES

The wells listed herein have been arranged alphabetically by county and type of well and chronologically by the order in which they were drilled or logged.

Several abbreviations are used under the heading "Information Available". The list below clarifies those abbreviations that may not be readily discernable.

SP-SPR = self-potential/single-point resistivity logs

6 Lat = six foot laterolog

IES = induction electric survey

Dual Ind Lat = dual induction laterolog

Microlat = microlaterolog

Latitude and longitude values were derived from maps of various scales and, therefore, vary in accuracy and precision. County maps with plotted well locations may be inspected at the Office of Coastal Plain Geology.
