

Education Program Status Report

Workshops

Planning has started for the December 4, 2018 Design and Planner Workshop in Raleigh. The workshop is being presented in partnership with the Southeast Chapter of the International Erosion Control Association (SE-IECA) and NCSU's Department of Crop and Soil Sciences.

Contract Administration

A contract proposal between DEMLR and the Water Resources Research Institute (WRRRI) is currently being worked on. The contract will include support for the annual local program workshop and awards luncheon.

Updates

Working on digitizing old but still relevant files. Updating digital files with current headers, logos, names, and points of contact. The E&SC website has been updated, several broken links fixed and documents are being posted as they are updated; also working with our PIO to streamline the pages and delete redundant information. The Teacher's Guides/Packets and Activity Kits have been digitized, edited and updated and will be available online in the near future as free downloads. An E&SC Education web page and a Student and Teacher Packets and Activities subpage have been created and are waiting to be approved and published. The Designer, Planner, and Inspector packets and the Video Module have been digitized and will also be published to the website once they are updated.
