# NCDOT EROSION AND SEDIMENTATION CONTROL PROGRAM 2024 ANNUAL REPORT

## NCDOT EROSION AND SEDIMENTATION CONTROL PROGRAM

In 1991 the NC Sedimentation Control Commission reviewed the NC Department of Transportation's efforts to comply with the Sedimentation Pollution Control Act of 1973 and the subsequent 1974 NCDOT Delegated Erosion and Sedimentation Agreement.

Based on the review, the 1974 agreement was updated. The revised agreement was submitted to, and approved by the Sedimentation Control Commission on February 25, 1991 and functions as the core of the current NCDOT program.

Within NCDOT, the Roadside Environmental Unit (REU) monitors the delegated authorities. This includes design, review, monitoring and training for all aspects of the Erosion and Sedimentation Control Program. Improvements in technology and NCDOT research have in turn improved design standards and techniques for erosion and sedimentation control.

This annual report outlines and highlights the work implemented and accomplished in 2023-2024. It is important to note that this is an overview of the NCDOT Erosion and Sedimentation Control Program and provides a summarization of the programs overall content.

## EXECUTIVE SUMMARY

The executive summary reflects the work accomplished over the past year from July 1, 2023 to June 30, 2024. Project information is based on the total number of projects that were awarded for construction plus the number of projects that were actively under construction during this time period.

## EROSION CONTROL PLAN DESIGN / REVIEW JULY 2023 - JUNE 2024

NCDOT is delegated the authority to review and approve erosion and sedimentation control plans for its land disturbing activities. The following is a summary of the projects that required an approved erosion and sedimentation control plan.

Project Type	Erosion Control Plans Design / Review
Contract Construction Projects	99
NC Turnpike Authority Projects	3
Division Construction/Bridge/Maintenance Projects	241
Total Plans Designed/Reviewed	343

# NCDOT EROSION AND SEDIMENTATION CONTROL PROGRAM 2024 ANNUAL REPORT

## COMPLIANCE REVIEWS

JULY 2023 - JUNE 2024

The following is a summary of the compliance reviews that were performed for active land disturbing projects during the period of July 1, 2023 to June 30, 2024. The compliance reviews were conducted by the Roadside Environmental Unit's Field Operations Section across fourteen Highway Divisions.

Project Type	Compliance Reviews	ICAs Issued	Projects Receiving ICA	Projects receiving ICA-Ex	Projects Receiving CICA	NOV Issued By Land Quality	Division Suspensions
Contract	3,397	6	4	2	0	0	68
NC Turnpike	41	0	0	0	0	0	0
Maintenance	92	0	0	0	0	0	0
Vertical	0	0	0	0	0	0	0
Rail Division	0	0	0	0	0	0	0
Bridge Maintenance	363	0	0	0	0	0	0
Resurfacing	65	0	0	0	0	0	0
Total	3,958	6	4	2	0	0	68

- Contract Construction Projects: Defined as a project that has been let to a private contractor for any land disturbing activity that exceeds one acre. Contract construction projects are advertised and awarded either from Raleigh or from the local Division.
- NC Turnpike Projects: The North Carolina Turnpike Authority is now part of NCDOT Division of Highways. Since it was originally added to the Department's delegation, it's projects have been tracked separately from Contract Construction projects.
- Maintenance Projects: Projects include all land disturbing activities associated with the construction or maintenance of the secondary road system of North Carolina. Work is conducted by state forces or small business contracts.
- Vertical Construction Projects: Projects include the construction of facilities associated with the NC Department of Transportation. The contracts are developed by the General Services Section of NCDOT
- Rail Division Projects: Projects include the construction of railway corridors and bridges associated with NC DOT Rail Division.
- Bridge Maintenance Projects: Projects include small bridge replacement and pipe culvert replacement. Work is conducted by state forces or small business contracts.
- Resurfacing Projects: Projects include the resurfacing of existing roadways which require shoulder reconstruction.

 2024 ANNUAL REPORT

**2024 ANNUAL REVIEW**

Based on a random selection by DEMLR, the following projects were chosen for review. Projects are reviewed jointly by NCDOT and DEMLR staff to determine the overall program performance.

Division	County	TIP #	Route	Length
1	Northampton	R-2582A	US 158/NC 46 from I-95/NC 46 in Roanoke Rapids to SR 1312	8.2
2	Craven	U-5713, R-5777A & B	US 70 from the Neuse River Bridge to east of Thurman Rd. in James City	5.1
3	Pender	R-3300B	NC 417 (Hampstead Bypass) from south of NC 210 to north of SR 1563	6.9
3	Onslow	N/A	Blue Top Road - State Forces Maintenance	0.70
4	Nash	B-5947	Bridge #630091 over Tar River on NC 581	0.49
5	Wake	U-5748	US 401 at SR 2044/SR 2224 and SR 2006	2.5
6	Harnett, Wake	R-5705B	NC 55 from NC 210 to SR 4809	4.5
7	Guilford	HE-0005	Access Improvements for Boom Facility along I-73 on the north side of Piedmont Triad International Airport	0.76
7	Guilford	B-5717	Bridges # 109 and # 121 over South Buffalo Creek on SR 4240	0.32
8	Hoke, Moore	R-5709A	NC 211 from US 15/501 to SR 1244/SR1311	15.6
9	Forsyth	U-2579AB	Future I-74 (Winston Salem Northern Beltway) from I-40 to I-40 Bus./US 421	2.7
10	Mecklenburg	U-5873, U-5907	Roundabouts at NC 115/Davidson St./Potts St. and at SR 6038/Griffith St/Beaty St. and new location from SR 6037 to SR6038	0.98
11	Surry	N/A	Bridge #850180 over Toms Creek on SR 1953	0.10
12	Cleveland	R-2707D	US 74 Shelby Bypass from east of NC 150 to west of SR 1001	6.1
13	Buncombe, Henderson	I-4700	I-26 from NC 280 to I-40	7.5
14	Graham	A-0009CB	NC 143 from SR 1223 to 0.5 miles north of Appalachian Trail	3.9

# NCDOT EROSION AND SEDIMENTATION CONTROL PROGRAM 2024 ANNUAL REPORT

## COMPLIANCE INSPECTION POLICIES AND PROCEDURES

The Department’s delegation agreement with the Sedimentation Control Commission allows for the Department to review sediment and erosion control plans, and to perform compliance inspections for projects under the operational control of the Department. Although the SCC delegates compliance inspection to the Department, it did not grant enforcement authority. Since the Department can not issue a fine to itself, a series of policies and procedures were developed to correct compliance issues with highway and maintenance construction projects. The following summarizes the processes involved to ensure the Department’s projects are in compliance.

### Daily Project Inspection:

Project personnel inspect and monitor the construction of a project on a daily basis and record daily activities and rainfall amounts. In the event that a compliance issue develops, the project personnel in conjunction with the contractor will address the issue and corrective actions are made. If the corrections are deemed severe by the project engineer then operations on the project are ceased until all the compliance issue is rectified.

### Monthly Project Inspection:

Roadside Environmental Field Operations performs a secondary level of compliance inspections on land disturbing projects to determine if the sediment and erosion control plans are implemented accordingly and that the necessary maintenance is occurring. Permit conditions are evaluated and jurisdictional areas inspected for compliance. NPDES documentation is reviewed and noted if any deficiencies are identified. If the compliance inspection identifies a situation that is not being corrected or can be corrected in a timely manner then an ICA (Immediate Correction Action) notice is issued. The ICA alerts NCDOT Management of an issue that needs immediate attention. The project personnel is then charged with correcting the situation as directed by the Chief Engineer. A follow up inspection is then made to determine that the situation was corrected and the steps that were take to prevent a reoccurrence.

The ICA notice is supported by the policies and procedures outlined by the Chief Engineer. The policy outlines the steps that will be taken and the consequences associated with failing to comply. Notification and subsequent reports on projects that have received and ICA are distributed to the Chief Engineer, Division Engineer, Regional DEMLR Engineer, State Sediment Engineer, and the State Roadside Environmental Engineer. A final report is prepared and delivered to the Chief Engineer describing what happened to cause the ICA and what steps were taken by the Division to ensure future compliance.

## COMPLIANCE REVIEW GRADES

JULY 2023 - JUNE 2024

Grades	6	7	8	9	10
Installation	11	131	1755	2714	20
Maintenance	12	165	2795	1636	19
Effectiveness	15	131	2208	2270	22
Implementation	43	193	1900	2536	33
Overall	6	137	2144	2518	29

The grading scale is: 10-Excellent, 9-Very Good, 8-Good, 7-Fair, 6-Unacceptable.

# NCDOT EROSION AND SEDIMENTATION CONTROL PROGRAM 2024 ANNUAL REPORT

## EROSION AND SEDIMENT CONTROL CERTIFICATION PROGRAM

The Biological & Agricultural Engineering and Soil Science Departments at N.C. State University are partnering with NCDOT to offer an Erosion and Sediment Control/Storm water Certification Program. The certification program provides the required personnel training to ensure compliance with erosion and sediment control/storm water provisions on NCDOT projects.

NCDOT requires all contractors and consultants to have a certified supervisor and foreman to oversee operations on NCDOT projects to ensure compliance with the Sedimentation Pollution Control Act as well as other environmental regulations.

Certification must be renewed every three years.

### CERTIFICATION LEVELS

- Level I: Erosion & Sediment Control/Storm water Inspector /Installer  
Active Certifications - 1,324
- Level II: Erosion & Sediment Control/Storm water Site Management.  
Active Certifications - 5,189
- Level III: Design of Erosion and Sediment Control Plans  
Active Certifications - 720
