

Retired Scientists and Engineers Needed

Put Your Expertise to Work for a More Sustainable North Carolina

Do you have a science or engineering background? Interested in helping businesses and industries improve energy and water efficiency and divert waste from landfills? Waste Reduction Partners (WRP) is seeking part-time, retired volunteers to perform energy efficiency, water efficiency, and waste reduction assessments at businesses, industries and institutions throughout North Carolina.

Who we are...

WRP is a volunteer technical assistance team working with North Carolina businesses and institutions to reduce utility costs, improve environmental performance, and promote economic competitiveness. Waste Reduction Partners is a program of Triangle J Council of Governments and Land-of-Sky Regional Council.

What we do...

Assessors provide on-site consultations, technical writing, research and technical assistance on energy, water and waste management topics.

Who we are seeking...

Volunteers with a background in science or engineering, or individuals with industrial, facilities, or solid waste management experience are a perfect fit for the program. Good communication and computer skills are required.

What we offer...

Flexible part-time schedules, stimulating assignments tailored to your interests, and the opportunity to think and work within your community. A stipend is provided and expenses are paid.
