

## Notice

Effective October 1, 2009, **wooden pallets** will join the list of materials banned from North Carolina landfills.

A wooden pallet is defined as “a wooden object consisting of a flat or horizontal deck or platform supported by structural components that is used as a base for assembling, stacking, handling, and transporting goods”.

Banning pallets means that they are prohibited from disposal in the landfill. We will, however, still accept the pallets at our sites but they will be processed differently. We will continue to grind the wooden pallets and use the wood chips for beneficial reuse.

Please separate the pallets from the rest of the garbage prior to your arrival. This will save you time when unloading. You will be directed to the appropriate location for the pallets.

Also banned effective October 1 will be plastic bottles and oil filters. These items join the list of banned materials already in effect. That list includes: used oil, yard waste, white goods (appliances), anti-freeze, aluminum cans, whole scrap tires, lead acid batteries, beverage containers (from establishments holding ABC permits) and oyster shells.
