

Pending Interim Maximum Allowable Concentrations (IMACs) Requests

Division of Water Resources

Substance	CAS #	Requested by	Notes
GenX (HPFO Dimer Acid)	13252-13-6	Chemours April 2018*	Limited toxicity information was available at the time of the request. EPA published a Draft Toxicity Assessment for GenX Chemicals in November 2018 and after external peer review and public comment, finalized the human health toxicity assessment in October 2021. EPA is in the process of developing a national Drinking Water Health Advisory for GenX chemicals, which is expected in Spring 2022.

*On March 1, 2022, Chemours requested that the April 2018 IMAC request submission be deactivated.

At this time, there are no pending IMAC requests.
