

# Areas Subject to Harvest Reporting

This map is for illustrative purposes and does not supersede any laws, rules or proclamations. Session Law 2023-137, Section 6 requires reporting of certain fish harvested in coastal fishing waters, joint fishing waters, and inland fishing waters adjacent to coastal or joint fishing waters. This map was produced to highlight the major waterbodies where reporting will be required. Some smaller waters impacted by the requirement may not be shown in this map due to graphical limitations. An interactive map that anglers can use to view specific water bodies is under development.

**Legend**

- I-95
- Major Dams
- Areas Subject to Harvest Reporting
