# 2015 Coastal Habitat Protection Plan

**1) WETLANDS:** border vital nursery areas, export food, remove pollutants and are a buffer between water and land-based impacts.

**2) SOFT BOTTOM:** stores and regulates nutrients, and chemicals, and provides crucial foraging areas for fish.

**3) SHELL BOTTOM:** fish spawning and nursery area, improve water quality, and protect nearby shorelines from erosion.

**4) SUBMERGED AQUATIC VEGETATION:** provides refuge and food for small fish and invertebrates, improves water quality.

**5) HARD BOTTOM:** complex structure, often covered by living organisms, supports a temperate-subtropical reef fish community and snapper-grouper fishery.

**6) WATER COLUMN:** the basic habitat and the medium through which all other fish habitats are connected.
