LIST OF APPENDICIES

Appendix A. Demographic terms described by the US Census Bureau, LEP.gov, and EJ Screen
Appendix B. Census data from the US Census Bureau and EJ Screen websites

1 Introduction

Environmental justice is the fair treatment and meaningful involvement of all people regardless of race, color, national origin, or income, with respect to the development, implementation, and enforcement of environmental laws, regulations, and policies (US EPA). This report will examine the demographic and environmental conditions in Brunswick, Columbus, and Pender Counties, as well as census tracts 201.01, 206.02, 9205.02 and 9301, and the three-mile radius around the proposed MALEC Brothers fumigation facility. Finally, the demographics of the entire state of North Carolina are also considered as they relate to both the county and local census tract and radius settings.

Malec Brothers Transport, LLC (MALEC) has applied for a Title V permit with the NC Department of Environmental Quality (DEQ or the Department), Division of Air Quality (DAQ). The proposed facility would be located at 1600 Old 87 Road, Riegelwood, North Carolina (Columbus County), at the intersection of SR 1870 and SR1878. The applicant is seeking an Air Quality Permit for construction and operation of a fumigation facility to treat southern yellow pine logs for insects in shipping containers prior to export. Potential emissions of methyl bromide are estimated to be up to 140 tons/year.

2 Environmental Justice Evaluation

The North Carolina Department of Environmental Quality (NCDEQ) has assessed the potential impact on communities surrounding the proposed construction and operation of new emission sources. The assessment of potential impacts has included:

- Review of a Permit Application – Methyl Bromide fumigation facility.
- Fugitive Emission Sources
- Point Source Emission Units
- Potential Emissions from the Fumigation Process
- Regulatory Evaluation
- Compliance Assurance Monitoring
- Facility Wide Air Toxics
- Modeled Emissions Rates
- Facility Emissions Review
- Study of area demographics are determined by utilizing the EPA Environmental Justice tool (EJSCREEN) <https://ejscreen.epa.gov/mapper/> and current, available census data. Demographic terms used throughout this report as described by the US Census Bureau, LEP.gov, and EJ Screen are defined in Appendix A. <http://factfinder.census.gov/faces/nav/jsf/pages/index.xhtml> Census data from the US Census Bureau and EJ Screen websites are provided in Appendix B.
- Comparison of area demographics to project county census data.
- A confirmation site visit to ensure current available census data was accurate.
- Communicate with public and public officials in neighboring communities.

3 Project Proposal

3.1 Process Description

Shipping containers are loaded with logs, moved to the fumigation area and prepared for fumigation. The containers are injected with methyl bromide and monitored for leaks. The fumigation period lasts 16-72 hours at which time containers are ventilated for four to six hours to aerate and disperse the fumigant from the container. The container is then transported to the port by semi-truck.

3.2 Methyl Bromide (also known as Bromomethane)

The primary use of methyl bromide is as a fumigant in soil to control fungi and weeds; in space fumigation of food commodities (e.g., grains and produce); and in storage facilities (such as mills, warehouses, ships, and freight cars) as a pesticide to control insects and rodents. It is a hazardous air pollutant (HAP) and a volatile organic compound (VOC).

The U.S. Environmental Protection Agency (EPA) requires that application of methyl bromide products have a specified buffer zone around treatment and aeration areas. MALEC would be held to federal EPA and USDA standards for application of fumigants. MALEC would be required to conduct methyl bromide monitoring at the property boundary.

EPA requirements can be found at:

www.epa.gov/pesticide-registration/mbcommoditybuffer.

USDA requirements can be found at:

https://www.aphis.usda.gov/import_export/plants/manuals/ports/downloads/treatment.pdf

4 Geographic Area

The proposed facility would be located at 1600 Old 87 Road, Riegelwood, North Carolina (Columbus County)¹, at the intersection of SR 1870 and SR1878 (Figure 1).

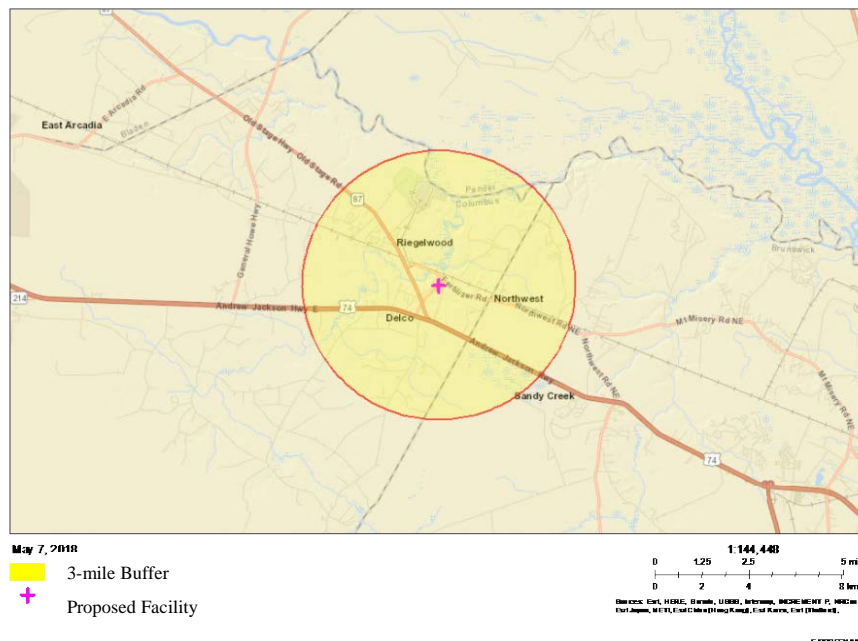

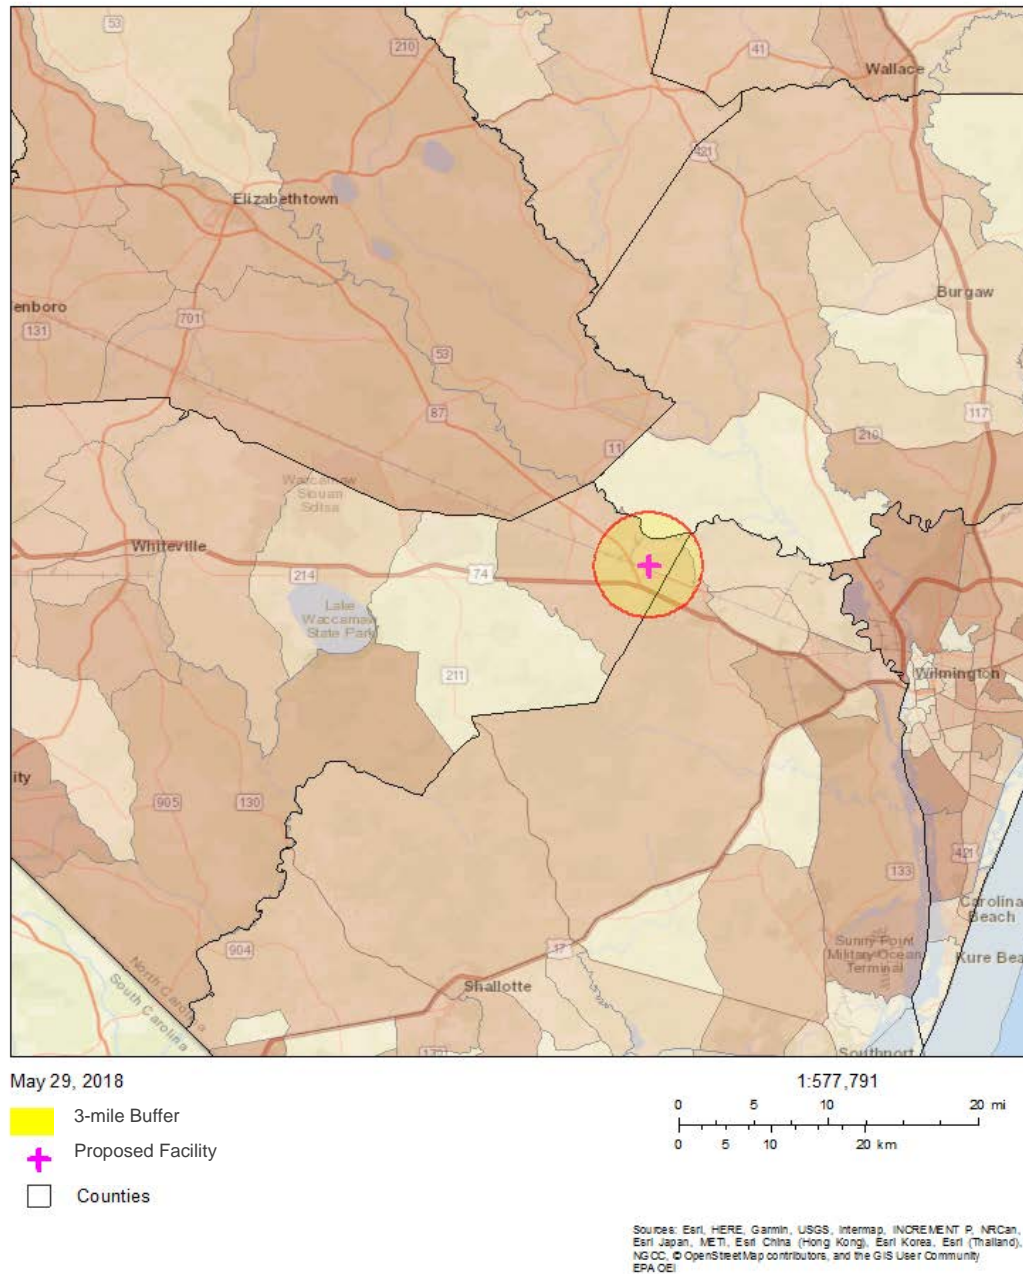

Figure 1. Proposed Facility location with three-mile radius.

¹ Address provided by Columbus County Emergency Management, changed from a notification to DEQ through public comment. This is a different address than was originally on the permit application, though the physical location is the same.

The three-mile radius used in this analysis crosses over three counties and four census tracts (Figure 2). Census tracts are small, relatively permanent statistical subdivisions of a county with a unique numeric code (US Census Bureau).

EJSCREEN 2017

Figure 2. Census tracts and counties around proposed facility location.

5 Regional and Local Settings

The below sections on race and ethnicity, age and sex, disability, poverty, household income, and Limited English Proficiency (LEP) populations are based on US Census Bureau data, first at a state and county

level (regional setting), and then at a census tract and project radius level (local setting). The surrounding census tracts included will be any census tract that overlaps into the three-mile radius. Demographics of Brunswick, Columbus and Pender Counties will be compared to the local level data to identify any disparities surrounding the project area. Using standard environmental justice guidelines from the EPA and NEPA documentation, the following conditions will be flagged as potential communities of concern:

1. 10% or more in comparison to the county average
2. 50% or more minority
3. 5% or more in comparison to the county average for poverty

For example, if a census tract has 35% of the population low income but the county consists of 30% low income, the census tract would exceed the county average by 10.5% and thus be flagged as a potential area of concern. For this report, census data from 2010 and census data estimates from 2011-2015 and 2012-2016 were used. 2010 Census Bureau data is real data gathered every ten years, whereas the estimates from the more recent years are modelled estimates based on the real data. For the data gathered from the 2012-2016 and 2011-2015 estimates, the margin of error (MOE) has been included. This value is a measure of the possible variation of the estimate around the population value (US Census Bureau). The Census Bureau standard for the MOE is at the 90% confidence level, and may be any number between 0 and the MOE value in either direction (indicated by +/-).

5.1 Race and Ethnicity

Regional Setting

According to the 2010 US Census Data QT-P3, Race and Hispanic Origin: 2010; 2010 Census Summary File 1 report, North Carolina's population totaled 9,535,483 individuals (Table 1). The three most common racial groups across the state are White (68.5%), Black or African American (21.5%) and Hispanic or Latino (of any race) at 8.4%.

Brunswick County's population consisted of 107,431 individuals (Table 1). The main racial groups within the county were White (83.0%), Black or African American (11.4%), Hispanic or Latino (5.2%), Mexican² (3.5%), Some other Race (2.5%), and Two or More Races (1.8%). The White population of 83% had a greater than 10% difference when compared to the state, which had a White population of 68.5%. Every other racial group made up less than 10% when compared to the state.

Columbus County had a population of 58,098 individuals (Table 1). The racial groups consisting of greater than 1% of the population within the county were White (61.5%), Black or African American (30.5%), Hispanic or Latino (4.6%), Mexican (3.7%), American Indian or Alaska Native (3.2%), Some other Race (3.0%), and Two or More Races (1.5%). The Black or African American population had a greater than 10% difference in the County, at 30.5%, compared to the 21.5% Black or African American population of North Carolina. American Indian or Alaska Native also made up a greater than 10% difference in comparison to the state, with a population of 3.2% in the County and 1.3% in the state. Asian (.3%), Some other Race (3%), Two or More Races (1.5%), and Hispanic or Latino (of any race) (4.6%) populations were all less than the state average by more than 10%.

² Mexican is part of the Hispanic or Latino (of any Race) so percentages may not add up to 100.

Pender County had a total population of 52,217 individuals (Table 1). The racial groups consisting of greater than 1% of the population within the county were White (76.1%), Black or African American (17.8%), Hispanic or Latino (6.1%), Mexican (4.5%), Some other Race (3.3%), and Two or More Races (1.8%). The White population (76.1%) was greater than 10% different when compared to the state (68.5%). Each racial group made up less than their respected state average by more than 10%.

Table 1. Regional Setting - Race and Ethnicity

Race and Ethnicity	North Carolina		Brunswick County		Columbus County		Pender County	
	Number	Percent	Number	Percent	Number	Percent	Number	Percent

Local Setting

According to the 2010 US Census Data QT-P3, Race and Hispanic Origin: 2010; 2010 Census Summary File 1 report, the largest population within census tracts 201.01 and 206.02 were White, with a population of 1,316 (48.6% of the total census tract population) and 3,947 (76.7% of the total census tract population), respectively (Table 2). Other populations above 1% within Census Tract 201.01 were Black or African American (40.5%), Hispanic or Latino (8.6%), Mexican (6.5%), Some other Race (5.3%), Two or More Races (4.0%) and Other Hispanic or Latino (1.2%). Populations in Census Tract 206.02 above 1% were Black or African American (17.0%), Hispanic or Latino (4.5%), Mexican (2.9%), Some other Race (2.4%), Two or More Races (2.3%), American Indian or Alaska Native, (1.3%) and Other Hispanic or Latino (1.1%).

The Black or African American population of 40.5% in Census Tract 201.01 was considerably greater than 10% different from the state's Black or African American population (21.5%) as well as the accompanying county's (Brunswick), which was 11.4%. Some other Race made up a larger than 10% difference within Census Tract 201.01 at 5.3% in comparison to the state at 4.3%. Two or More Races also made up a greater than 10% difference (4%) in comparison to the state (2.2%). Although at 8.6%, the percentage of Hispanic or Latino people living in tract 201.01 was greater than 10% different in

comparison to the county (5.2%), it is on par with the state population which was 8.4%. The Mexican population (6.5%) showed a greater than 10% difference when compared to the State (5.1%). Finally, within Census Tract 201.01, White, Asian, Native Hawaiian and Other Pacific Islander, Cuban, and Other Hispanic or Latino populations were more than 10% less when compared to North Carolina.

Census Tract 206.02 had a percent of Black or African Americans living within the census tract greater than 10% in comparison to the county (11.4%) at 17%, but a smaller proportion compared to the state (21.5%). Every other racial group except for White, American Indian or Alaska Native, and Two or More Races had proportions more than 10% less respectively than the state.

The largest population within Census Tract 9301 was White, with a population of 2,285 (54.4% of the total census tract population). Populations in Census Tract 9301 above 1% were Black or African American (37.9%), Hispanic or Latino (7.1%), Mexican (5.5%), Some other Race (4.0%), Two or More Races (1.8%), American Indian or Alaska Native, (1.7%) and Other Hispanic or Latino (1.0%). The Black or African American population (37.5%) made up a greater than 10% difference in comparison to the state (21.5%). Although the Hispanic or Latino Population (of any race) (7.1%) was greater than 10% above the county average (4.6%), it was also more than 10% less than the state. In addition, every other race or ethnicity with the exception of Mexican, Some other Race, and Black or African American made up less than 10% of their respected populations when compared to the state.

Census Tract 9205.02 of Pender County also had the largest population (1,300 individuals) identified as White (75.7% of the total census tract population). Populations in Census Tract 9205.02 above 1% were Black or African American (18.7%), Hispanic or Latino (3.7%), Two or More Races (3.0%), Mexican (2.7%), Some other Race (1.5%), and American Indian or Alaska Native (1.0%). The census tract's White population (75.7%) was greater than 10% different from the state (68.5%). Additionally, Two or More Races made up a higher percentage of Census Tract 9205.02 (3%) when compared to the state (2.2%). Every other racial group not mentioned above, except for Cuban, had populations more than 10% less when compared to the state.

Within the three-mile radius, EJSCREEN identified a total population of 2,166 individuals (Table 2). The largest population within the 3-mile radius was also White, with a total of 1,196 individuals (55% of the total population). All populations were 1% or higher within the three-mile radius except for Asian, and Native Hawaiian and Other Pacific Islander. The Black or African American Population within the three-mile buffer (35%) exhibited a greater than 10% difference when compared to the state (21.5%). Additionally, the American Indian or Alaska Native Population (2%) was greater than 10% different when compared to the state (1.3%). White, Asian, Native Hawaiian and Other Pacific Islander and Hispanic or Latino (of any race) populations made up more than 10% less than their respective populations in comparison to the state.

5.2 Age and Sex

Regional Setting

According to the US Census Bureau, QT-P1, Age Groups and Sex: 2010 Census Summary File 1, North Carolina had a total population of 9,535,483 individuals. The largest percentage of the total state population (63.1%) was between the ages of 18 and 64, with an overall median age of 36 for males and 38.7 for females (Table 3).

Table 3. Regional Setting- North Carolina Age Groups and Sex

Age	Number			Percent		
	Both sexes	Male	Female	Both sexes	Male	Female
Total Population	9,535,483	4,645,492	4,889,991	100%	100%	100%
Under 5 years	632,040	322,871	309,169	6.6	7	6.3
Under 18 years	2,281,635	1,167,303	1,114,332	23.9	25.1	22.8
18 to 64 years	6,019,769	2,954,233	3,065,536	63.1	63.6	62.7
65 years and over	1,234,079	523,956	710,123	12.9	11.3	14.5
Median Age	37.4	36	38.7			

Brunswick County had a total population of 107,431 individuals. The largest percentage of the total county population (59.8%) was between the ages of 18 and 64, with a median age of 46.1 for males and 48.6 for females (Table 4). This was the highest median age of our analysis. The 65 years and over population in Brunswick County (21.4%) was greater than 10% different from the state 65 years and over population, which was 12.9%. Both populations of people under 18 and children under 5 accounted for more than 10% less when compared to the state.

Table 4. Regional Setting- Brunswick County Age Groups and Sex

Age	Number			Percent		
	Both sexes	Male	Female	Both sexes	Male	Female
Total Population	107,431	52,660	54,771	100%	100%	100%
Under 5 years	5,828	3,034	2,794	5.4	5.8	5.1

65 years and over	8,830	3,648	5,182	15.2	12.7	17.7
Median Age	39.8	38	41.9			

Pender County had a total population of 52,217 individuals. The largest percentage of the total county population (62.1%) was between the ages of 18 and 64, with a median age of 40.2 for males and 42 for females (Table 6). The 65 years and over population (15.1%) was more than 10% different when compared to the state (12.9%). In contrast, the under 5 years population (5.9%) had greater than 10% fewer when compared to the state (6.6%).

Table 6. Regional Setting - Pender County Age Groups and Sex

Age	Number			Percent		
	Both sexes	Male	Female	Both sexes	Male	Female

65 years and over	7,886	3,618	4,268	15.1	13.8	16.4
Median Age	41.1	40.2	42			

Local Setting

According to the US Census Bureau, QT-P1, Age Groups and Sex: 2010 Census Summary File 1, census tracts 201.01 and 206.02 had a total population of 2,706 and 5,147, respectively. The largest percentage of the population for census tract 201.01 (63.5%) was between the ages of 18 and 64, with a median age of 32.9 for males and 35.1 for females (Table 7). The Under 18 population of Census Tract 201.01 was greater than 10% different from the state population at 28.2% compared to 23.9% respectively. The 65 years and over population (8.4%) was more than 10% less than the state (12.9%). Census Tract 206.02 also had the highest percent of the population (64.1%) between 18 and 64 years of age. The median age for males was 39.3 and 39.7 for females.

Median Age	39.5	39.3	39.7				34.2	32.9	35.1			

Census tract 9301 had a total population of 4,198 individuals. The largest percentage of the total census tract population (61.1%) was between the ages of 18 and 64, with a median age of 39.7 for males and 40.4 for females (Table 8). All age ranges were on par with the state averages in Census Tract 9301.

Census Tract 9205.02 had a total population of 1,717 individuals. The largest percentage of the total census tract population (65.9%) was between the ages of 18 and 64, with a median age of 44.6 for males and 45.9 for females (Table 8). Within this census tract, the 65 years and over population (14.4%) was more than 10% different from the North Carolina 65 years and over population of 12.9%. Both ages under 18 years and under 5 years made up more than 10% less when compared to the state.

5.3 Disability

Regional Setting

According to the 2012-2016 American Community Survey 5-Year Estimates, S1810 from the US Census Bureau, the state of North Carolina had an estimated total population of 9,745,671 noninstitutionalized citizens. Of those individuals, an estimated 13.7% (MOE +/- 0.1%) had a disability. The largest population of disabled civilians were 65 years and over (37.0%, MOE +/- 0.4%). The second largest population was the 18 to 64 years population at 11.7% (MOE +/- 0.1%). By race, American Indian and Alaskan Native had the highest estimated disability rate of 17.8% (MOE +/- 0.7%). Black or African American, White, and Two or More Races were the next three highest population estimates with disabilities in North Carolina, at 15.2% (MOE +/-0.2%, 14.5% (MOE +/- 0.1%), and 12.1% (MOE +/- 0.6%), respectively (Table 9).

Brunswick County had an estimated total population of 118,194 noninstitutionalized citizens. Of those individuals, an estimated 17.7% (MOE +/- 0.9%) had a disability. The total population with disabilities in Brunswick County (17.7%) was more than 10% greater than the state level of 13.7%. The largest population of disabled civilians were 65 years and over (30.6%, MOE +/- 2.6%). The second largest population was the 18 to 64 years population at 14.9% (MOE +/- 1.8%). Black or African American had the highest estimated disability rate of 18.4% (MOE +/- 2.7%). White, American Indian and Alaskan Native, and Asian were the next three highest population estimates with disabilities in North Carolina, at 18.3% (MOE +/- 1.0%), 16.0% (MOE +/- 10.9%), and 11.8% (MOE +/- 5.0%), respectively (Table 10). All populations in Brunswick County had a greater than 10% difference in disabilities compared to the state except for populations under 5 and over 65, American Indian and Alaskan Native, Native Hawaiian and Other Pacific Islander, and Two or more Races. The 65 years and over population with disabilities (30.6%) was more than 10% less when compared to the state (37%).

Columbus County had an estimated total population of 54,225 noninstitutionalized citizens. Of those individuals, an estimated 20.5% (MOE +/- 1.4%) had a disability (Table 11). The total noninstitutionalized population with a disability in Columbus County (20.5%) was over 10% greater than the state at 13.7%.

The largest population of disabled civilians were 65 years and over (44.5%, MOE +/- 4.5%). The second largest population was the 18 to 64 years population at 18.4% (MOE +/- 2.3%). By race, Two or More Races had the highest estimated disability rate of 29.5% (MOE +/- 10%). Black or African American, White, and American Indian and Alaskan Native were the next three highest population estimates with disabilities in North Carolina, at 24.6% (MOE +/- 2.4%), 19.6% (MOE +/- 1.7%), and 18.7% (MOE +/- 4%), respectively (Table 11). All age and sex brackets showed a greater than 10% difference in percentage when compared to North Carolina, with the exception of the population under 5. The populations of White (19.6%), Black or African American (24.6%), and Two or more Races (29.5%) were all different by more than 10% compared to their respective populations at the state-level. The Asian, Native Hawaiian and Other Pacific Islander, Some other Race, and Hispanic or Latino populations all made up more than 10% less of their respected populations when compared to the state.

Pender County had an estimated total population of 54,928 noninstitutionalized citizens (Table 12). Of those individuals, an estimated 17.9% (MOE +/- 1.1%) had a disability. The total proportion of individuals with disabilities in Pender County was greater than 10% different compared to the state (13.7%). The

largest population of disabled civilians were 65 years and over (40.2%, MOE +/- 5.15%). The second largest population was the 18 to 64 years population at 16.4% (MOE +/- 1.9%). American Indian and Alaska Native had the highest estimated disability rate of 26.5% (MOE +/- 15.9%). Black or African American, Asian, and White were the next three highest population estimates with disabilities in North Carolina, at 26.0% (MOE +/- 3.4%), 18.1% (MOE +/- 24.2%), and 17.0% (MOE +/- 1.3), respectively (Table 12). The population ranges of 5 to 17 years (6.7%) and 65 years and older (40.2%) both had a rate of disability greater than 10% when compared to the state, with rates of 5.7% and 37.0%, respectively. Both Males and Females had greater than 10% difference in disability rates in comparison with the state. Additionally, all races with the exception of Hispanic, and Some other Race had rates of disability that are greater than 10% different from their respective state-level populations. The Native Hawaiian and Other Pacific Islander Population with disabilities (0%) made up more than 10% less of the population in comparison to the state (11.9%).

Local Setting

According to the 2012-2016 American Community Survey 5-Year Estimates, S1810 from the US Census Bureau, census tracts 201.01 and 206.02 had a total civilian noninstitutionalized population of 2,891 and 5,446, respectively. The largest percentage of the total Census Tract 201.01 population with a disability (59.5%, MOE +/- 18.4%) was the population 65 years and over. The second largest was at 24.6% (MOE +/- 9.7%) for the 18 to 64-year age range. American Indian and Alaskan Native had the highest estimated disability rate by race at 100.0% (MOE +/- 100%)³. Two or More Races, Black or African American, and White were the next three highest population estimates with disabilities in the census tract, at 40.6% (MOE +/- 40.6%), 27.7% (MOE +/- 8.7%), 23.9% (MOE +/- 8.8%), respectively (Table 13a). All populations with the exception of individuals between the ages of 0 and 17, American Indian and Alaska Native, Some other Race, and Hispanic or Latino, had greater than 10% differences in comparison to their respective state populations. The largest percentage of the total Census Tract 206.02 population with a disability (46.1%, MOE +/- 20.4%) was the population 65 years and over. The second largest was at 14.7% (MOE +/- 6.3%) for the 18 to 64-year age range. Two or More Races had the highest estimated disability rate by race at 49.2% (MOE +/- 37.3). Hispanic or Latino, Black or African American, and White were the next three highest population estimates with disabilities in the census tract, at 32.6% (MOE +/- 31.7), 19.9% (MOE +/- 14.1%), 17.5% (MOE +/- 4.1%), respectively (Table 13b). Populations 65 years and older (46.1%), Females (19.6), Two or More Races, and Hispanic or Latino (32.6%) all had a greater than 10% difference within the census tract in comparison with the state (46.1%, 19.6%, 49.2%, and 32.6% respectively).

³ MOE may be anywhere between 0% and 100% (Section 5).

Census tract 9301 had a total civilian noninstitutionalized population of 4,106. The largest percentage of the total census tract population with a disability (34.9%, MOE +/- 13.3%) was the population 65 years and over. The second largest was at 14.9% (MOE +/- 5.85%) for the 18 to 64-year age range. American Indian and Alaska Native had the highest estimated disability rate by race at 32.9% (MOE +/- 24.7%). Two or More Races, White and Black or African American were the next three highest population estimates with disabilities within the census tract, at 29.2% (MOE +/- 31.2%), 18.2% (MOE +/- 5.8%) and 17.4 % (MOE +/- 5.4%), respectively (Table 14). All disability percentages in Census Tract 9301 are below or equal to the county percentages, with the exception of the American Indian and Alaska Native population. which at 32.9% (MOE +/- 24.7%) for the census tract, shows a greater than 10% difference when compared to the county (at 18.7%, MOE +/- 4.0%).

Census Tract 9205.02 of Pender County, had a total civilian noninstitutionalized population of 1,713, 20.8% (MOE +/- 4.8%) of which was estimated with a disability. The largest percentage of the total census tract population with a disability (44.7%, MOE +/- 19.4%) was the population 65 years and over. The second largest was at 19.5% (MOE +/- 7.9%) for the 18 to 64 age range. White had the highest estimated disability rate by race at 25.4% (MOE +/- 6.5%). Two or More Races and Black or African American were the only other population estimates with disabilities within the census tract estimated above zero, at 11.3% (MOE +/- 12.2%) and 10.6% (MOE +/- 9.5%), respectively (Table 15). The subject groups with disability percentages in Census Tract 9205.02 containing a difference greater than 10% when compared to county are shown in Table 15.

5.4 Poverty

Regional Setting

According to the Census Table S1701, Poverty Status in the Past 12 Months, 2012-2016 American Community Survey 5-Year Estimates, from the US Census Bureau, North Carolina had an estimated population of 9,685,511, with 16.8% (MOE +/- 0.2%) below the poverty level (Table 16).. Some other Race had the highest percent living below the poverty level at 33.7% (MOE +/- 1.5%). The next three groups with the highest poverty level based on race were American Indian and Alaska Native (28.1%, MOE +/- 1.5%), followed by Black or African American (26.1%, MOE +/- .4%) and Hispanic or Latino and Two or more Races, both at 24.6% (MOE +/- 0.8% and +/- 1.1%, respectively). The age group with the highest population below poverty was Under 18 (23.9%, MOE +/- 0.4%), followed by 18 to 64 (15.9%, MOE +/- 0.2%).

5.5 Household Income
Regional Setting

The following table (Table 23) was completed using data from the Census Table S1901, Income in the Past 12 Months (in 2016 Inflation-Adjusted Dollars) 2012-2016 American Community Survey 5-Year Estimates for North Carolina. The household income range with the highest percent was for \$50,000 to \$74,999, at 18.0%. The median household income was \$48,256 and the mean income was \$67,367. The household income range for Brunswick County with the highest percent was \$50,000 to \$74,999, at 19.8%. The median household income was \$49,356 and the mean income was \$64,902. The household income range for Columbus County with the highest percent was \$50,000 to \$74,999, at 16.2%. The median household income was \$35,847 and the mean income was \$52,282. Income ranges of less than \$10,000, \$10,000 to \$14,999 and \$25,000 to \$34,999 were all greater than 10% different when compared to the state averages. The household income range for Pender County with the highest percent was \$50,000 to \$74,999, at 17.4%. The median household income was \$46,580 and the mean income was \$62,253 (Table 23).

Local Setting

According to the Census Table S1901, Income in the Past 12 Months (in 2016 Inflation-Adjusted Dollars) 2012-2016 American Community Survey 5-Year Estimates, Census Tract 201.01 had the highest percentage of the population within the \$35,000 to \$49,999 household income range (Table 24). Census Tract 201.01 had a median household income of \$44,428 and a mean household income of \$43,687. Within Census Tract 206.02, the highest percentage was within the \$35,000 to \$49,999 income range. Census Tract 206.02 had a median household income of \$40,291 and a mean household income of \$47,699. Less than \$10,000 and \$15,000 to \$24,999 were greater than 10% different compared to the county. Within Census Tract 9301, the highest percentage (18.4%, MOE +/-5.9%) was in the \$35,000 to \$49,999 income range. Census Tract 9301 had a median household income of \$37,975 and a mean household income of \$47,695. Within Census Tract 9205.02, the highest percentage 20.7%, MOE +/- 7.1%, was in the \$25,000 to \$34,999 income range. Census Tract 9205.02 had a median household income of \$28,594 and a mean household income of \$47,695. All three household income brackets below \$24,999 were greater than 10% different when compared to the county.

Per Capita Income

Within the three-mile radius of the proposed permit location, the highest percent (39%) was in the \$25,000-\$50,000 income range⁴ (Table 28). Mean and median household income data is not provided in EJSCREEN, but per capita income is included. Per capita income is the mean income computed for every man, woman, and child in a particular group including those living in group quarters. It is derived by dividing the aggregate income of a particular group by the total population in that group (US Census Bureau). Per Capita Income data was obtained through the Census Table B19301, Per Capita Income in the Past 12 Months (In 2016 Inflation-Adjusted Dollars), 2012-2016 American Community Survey 5-Year Estimates. The per capita income was \$19,784 within the three-mile radius. Brunswick, Columbus and Pender counties had a per capita income of \$28,694, \$21,133 and \$24,031, respectively. Table 25b shows each county’s respective census tracts. The per capita income within the three-mile radius was lower than two and higher than two of the 4 surrounding census tracts (Table 25c).

Table 25a. Per Capita Income– Regional Setting

	North Carolina		Brunswick County		Columbus County		Pender County	
Subject	Per Capita Income		Per Capita Income		Per Capita Income		Per Capita Income

⁴ Income ranges provided in EJSCREEN provide fewer income ranges making data less specific than US Census data.

5.6 Limited English Proficiency (LEP)

The following table (Table 26) was completed using data from Census Table B16001, Language Spoken at Home by Ability to Speak English for the population 5 years and over, 2011-2015 American Community Survey 5-Year Estimates for the census tracts in Brunswick (201.01 and 206.02), Columbus (9301) and Pender (9205.02) counties. These are the potential languages the Department could encounter within the three-mile radius where English assistance or translation may be necessary. Per the Safe Harbor Guidelines, should an LEP Group be identified during the pre-permit issuance process, written translations of vital documents for each eligible LEP language group that constitutes five percent or includes 1,000 members (whichever is less) of the population of persons eligible to be served or likely to be affected or encountered. If there are fewer than 50 persons in a language group that reaches the five percent trigger, then DEQ would not translate vital written materials but provide written notice in the primary language of the LEP language group of the right to receive competent oral interpretation of those written materials, free of cost. The safe harbor provisions apply to the translation of written documents only. Safe harbor guidelines are per the EPA guidance for LEP persons.

Table 26. Limited English Proficiency

LANGUAGE SPOKEN AT HOME	Census Tract 9301		Census Tract 9205.02		Census Tract 206.02		Census Tract 201.01	
	Estimate	Margin of Error	Estimate	Margin of Error	Estimate	Margin of Error	Estimate	Margin of Error
Total (population 5 years and over):	3981	478	1928	333	5249	517	2809	335
Speak only English	3502	413	1895	334	5130	498	2454	303
Spanish or Spanish Creole:	471	332	21	27			340	217
Speak English "very well"	186	162	15	22			273	199
Speak English less than "very well"	285	183	6	8			67	47

6 Isolated Radius Comparison

In addition to the three-mile radius, NCDEQ looked more closely into where minority and low-income populations were located within the three-mile radius. This was done by looking solely at the one-mile radius, 1 to 2-mile radius and 2 to 3-mile radius. Since the radius is determined in EPA’s EJSCREEN only the Race & Ethnicity and Household Income could be included. Of note in this comparison is the slight increase of Black or African American Population from the one-mile radius (34%) to the two to three-mile isolated radius (39%), as seen in Table 27. Additionally, the Hispanic or Latino Population exhibits a similar trend, increasing from 5% at 1 mile to 18% at 2-3 miles. This indicates that the minority population, specifically Black or African American and Hispanic or Latino, increases with distance away from the facility. This is consistent with the White Population decreasing from 58% in the one-mile radius to 51% in the two to three-mile isolated radius.

Table 27. Race and Ethnicity - Isolated Radius Comparisons

Race and Ethnicity	1 Mile		1 to 2 miles		2 to 3 miles	
	Number	Percent	Number	Percent	Number	Percent
Total Population	299	100	1,079	100	788	100
White	173	58	618	57	405	51
Black or African American	102	34	358	33	307	38
American Indian or Alaska Native	5	2	17	1	13	1
Asian	0	0	2	0	2	0
Native Hawaiian and Other Pacific Islander	0	0	0	0	0	0
Some other Race	9	3	39	3	29	3
Two or More Races	6	2	17	2	12	1
HISPANIC OR LATINO (of any race)	16	5	88	8	141	18
Mexican						
Puerto Rican						
Cuban						
Other Hispanic or Latino						
% Minority (2010 Census)		42		43		45
Source: EPA EJSCREEN; US Census 2010						

Comparing between the Household Income ranges, there was a slight trend showing an increase in Household Income moving farther out from the one-mile radius. The percentage of households with an income greater than \$25,000 increases from 69% within the one-mile radius to 74% in the two to three-mile isolated radius (Table 28). This coincides with the decrease in household income less than \$15,000 from the one-mile radius (26%) to the two to three-mile isolated radius (20%).

Table 28. Household Income - Isolated Radius Comparisons

Subject	1 mile			1 to 2 miles			2 to 3 miles		
	Number	Percent	MOE (number)	Number (increase)	Percent	MOE (number)	Number (increase)	Percent	MOE (number)
Number of Households	126	100		429	100		286	100	
Owner Occupied	101	80		344	80		232	81	
Renter Occupied	25	20		84	20		55	19	
Per Capita Income (dollars)	18,493			19,639			19,784		
Household Income	129	100	128	447	100	154	312	100	154
<\$15,000	33	26	79	98	22	110	61	19	122
\$15,000-\$25,000	7	50	43	27	6	43	20	6	81

Percent greater than \$25,000		69			71			74	

7 Local Industrial Sites

1600 Old 87 Road, Riegelwood, North Carolina (proposed facility address) is surrounded by industrial and manufacturing areas to the north and south. Some of the industries/businesses near the proposed facility include:

- International Paper
- Hexion, Inc. (formerly Momentive Specialty Chemicals)
- Northwest Sand Mine
- Oak-Bark Corporation
- Solar energy farm
- NAPA Auto Parts – Southport Auto & Marine
- McPherson’s Acme General
- Soles Auto Service Center
- Thompson Industrial Services
- Pharmaceutical Products Inc.
- Dew Oil Company & Dew Transport Company

8 Local Sensitive Receptors

The Environmental Protection Agency suggest that sensitive receptors include, but are not limited to, hospitals, schools, daycare facilities, elderly housing and convalescent facilities. These are areas where the occupants are more susceptible to the adverse effects of exposure to toxic chemicals, pesticides, and other pollutants. Extra care must be taken when dealing with contaminants and pollutants in close proximity to areas recognized as sensitive receptors. For instance, children and the elderly may have a higher risk of developing asthma from elevated levels of certain air pollutants than a healthy individual aged between 18 and 64. Within the three-mile project radius, the following were identified as potential sensitive receptors:

- Acme Delco Middle School
- Faith Baptist Church
- Delco Pentecostal Free Will
- Evergreen AME Zion Church
- Riegelwood Baptist Church
- Bethel Baptist Church Camp
- Abraham Church
- Faith Christian Academy
- Victory Christian School
- Sandpiper Pediatrics

According to State Board of Education, Acme Delco Middle school consists of 70.3% low income students (ncpublicschools.org). The University of Wisconsin Population Health Institute in collaboration with the Robert Wood Johnson Foundation have calculated a County Health Rankings system for all the States in the United States (www.countyhealthrankings.org). This ranking is based on health outcomes (such as lifespan and self-reported health status) and health factors (such as environmental, social and economic conditions). According to this report, out of all 100 counties in North Carolina (with 1 indicating the healthiest), Brunswick County is ranked number 28, Columbus County is ranked number 91 and Pender County is ranked number 33 (Figure 3).

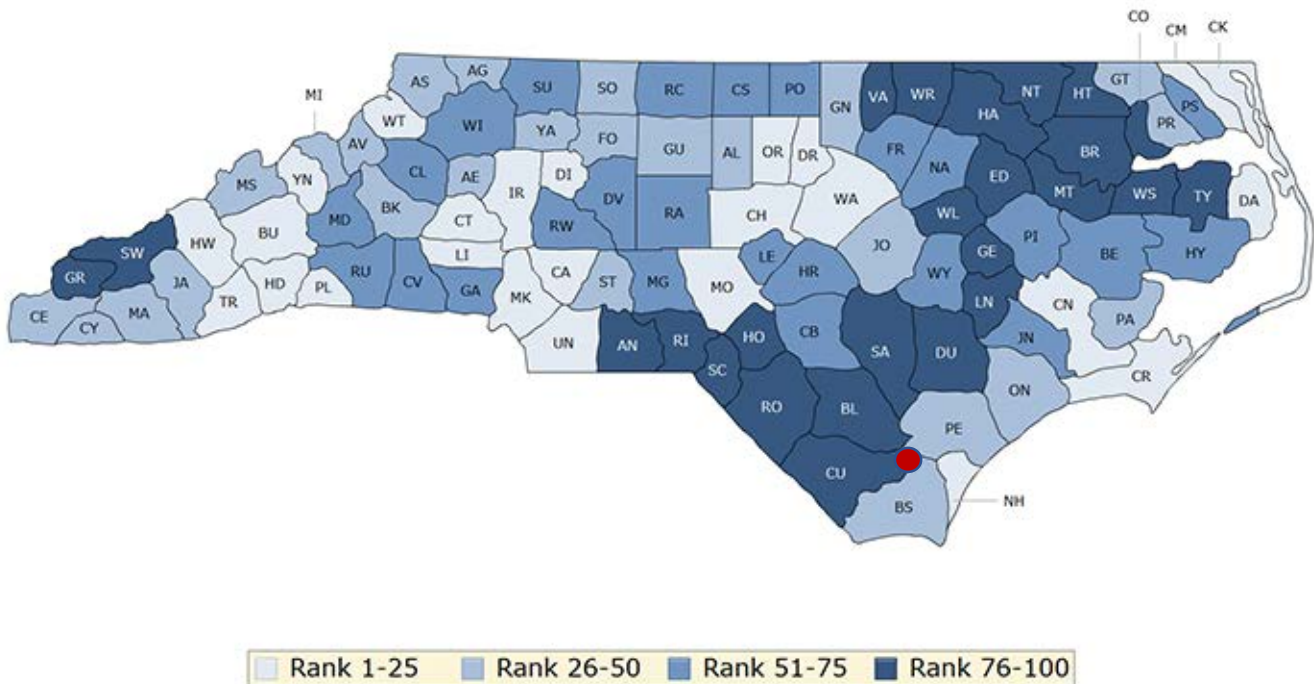

Figure 3. County Health Rankings for North Carolina, provided by University of Wisconsin Public Health Institute.

9 Field Reconnaissance

On March 28, 2018, DEQ staff (Sarah Rice, Environmental Senior Specialist and Renee Kramer, Environmental Senior Specialist) visited the proposed facility location and surrounding areas to corroborate the EPA EJSCREEN data within the three-mile radius of the proposed facility. During the

visit, Ms. Rice and Ms. Kramer identified the proposed site location and potential local sensitive receptors (Section 8).

10 Conclusion

Environmental justice is the fair treatment and meaningful involvement of all people regardless of race, color, national origin, or income, with respect to the development, implementation, and enforcement of environmental laws, regulations, and policies (US EPA). This report has examined the demographic and environmental conditions in Brunswick, Columbus, and Pender counties, as well as census tracts 201.01, 206.02, 9205.02 and 9301, and the three-mile radius around the proposed MALEC Brothers fumigation facility. Finally, the demographics of the entire state of North Carolina are also considered as they relate to the county, local census tract and radius settings.

MALEC has applied for a Title V permit within DAQ. The proposed facility would be located at 1600 Old 87 Road, Riegelwood, North Carolina, at the intersection of SR 1870 and SR1878. The applicant is seeking an Air Quality Permit for construction and operation of a fumigation facility to treat southern yellow pine logs for insects in shipping containers prior to export. Potential emissions of methyl bromide are estimated to be up to 140 tons/year.

It is important to keep in mind the following limitations of this study: census data is from 2010 and may be outdated; the more recent census data up through 2016 are estimates; EJSCREEN does not provide all of the data categories that were used in this analysis so the census tract and regional data cannot be compared to the radius; census tracts can still be large areas and do not allow for exact locations of each population; some of the census tracts overlap with the three-mile radius only slightly; and we cannot determine which populations are in that small amount of overlap.

The Department has assessed the available demographic and socioeconomic data of the communities surrounding the proposed construction and operation of the new emission sources. There appear to be some potential concerns for poverty and low household income surrounding the proposed permit location. Alternatively, the minority population appears to decrease closer to the proposed facility site. Columbus County shows potential concerns for poverty, while the census tract which the proposed facility is located in (9301), demonstrates less potential concern for poverty than the county and the state. American Indian and Alaska Native may be a population of concern within this census tract as well, which was a population identified as having potential concern for both poverty and disability. It should be noted that both disability and poverty data for the American Indian and Alaska Native Population have relatively high Margin of Error values. An estimated 285 individuals in Census Tract 9301 (where the facility is proposed) are identified as speaking Spanish or Spanish Creole, and who speak English “less than very well”. Within the three-mile radius, 7% (141 individuals) were identified as Hispanic or Latino. Given this information, there is a potential need for translation services based on the Safe Harbor Guidelines. Further engagement will be conducted throughout the remainder of the permitting process with interested parties, with a focus on those communities identified in this report as potential communities of concern.

Appendix A.

Demographic terms described by the US Census Bureau, LEP.gov, and EJ Screen

Glossary of Terms

This glossary refers to the definitions of each term as provided by the US Census Bureau, LEP.gov, and EJSCREEN.

Age

Census Bureau programs define age as the length of time in completed years that a person has lived. For the most recent decennial census, age was the length of time in completed years that a person had lived as of Census Day--April 1, 2010. The Census Bureau's national surveys compute age as of the interview date.

American Community Survey (ACS)

The American Community Survey (ACS) is a nationwide survey designed to provide communities a fresh look at how they are changing. The ACS replaced the decennial census long form in 2010 and thereafter by collecting long form type information throughout the decade rather than only once every 10 years.

Questionnaires are mailed to a sample of addresses to obtain information about households that is, about each person and the housing unit itself.

The American Community Survey produces demographic, social, housing and economic estimates in the form of 1-year, 3-year and 5-year estimates based on population thresholds. The strength of the ACS is in estimating population and housing characteristics. It produces estimates for small areas, including census tracts and population subgroups.

Although the ACS produces population, demographic and housing unit estimates, the Census Bureau's population estimates program produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns, and estimates of housing units for states and counties.

For 2010 and other decennial census years, the Decennial Census provides the official counts of population and housing units.

American Indian and Alaska Native

A person having origins in any of the original peoples of North and South America (including Central America) and who maintains tribal affiliation or community attachment. This category includes people who indicate their race as "American Indian or Alaska Native" or report entries such as Navajo, Blackfeet, Inupiat, Yup'ik, or Central American Indian groups or South American Indian groups.

Respondents who identified themselves as "American Indian or Alaska Native" were asked to report their enrolled or principal tribe. Therefore, tribal data in tabulations reflect the written entries reported on the questionnaires. Some of the entries (for example, Metlakatla Indian Community and Umatilla) represent reservations or a confederation of tribes on a reservation. The information on tribe is based on self-identification and, therefore, does not reflect any designation of federally

or state-recognized tribe. The information for the 2010 Decennial Census was derived from the American Indian and Alaska Native Tribal Classification List for Decennial Census 2000 and updated from 2002 to 2009 based on the annual Federal Register notice entitled “Indian Entities Recognized and Eligible to Receive Services From the United States Bureau of Indian Affairs,” Department of the Interior, Bureau of Indian Affairs, issued by OMB, and through consultation with American Indian and Alaska Native communities and leaders.

Asian

A person having origins in any of the original peoples of the Far East, Southeast Asia, or the Indian subcontinent, including, for example, Cambodia, China, India, Japan, Korea, Malaysia, Pakistan, the Philippine Islands, Thailand, and Vietnam. This includes people who reported detailed Asian responses such as:

- Asian Indian
- Bangladeshi
- Bhutanese
- Burmese
- Cambodian
- Chinese
- Filipino
- Hmong
- Indonesian
- Japanese
- Korean
- Laotian
- Malaysian
- Nepalese
- Pakistani
- Sri Lankan
- Taiwanese
- Thai
- Vietnamese
- Other Asian, specified
- Other Asian, not specified

Black or African American

A person having origins in any of the Black racial groups of Africa. It includes people who indicate their race as “Black or African American,” or report entries such as African American, Kenyan, Nigerian, or Haitian.

Census

A complete enumeration, usually of a population, but also of businesses and commercial establishments, housing, farms, governments, and so forth.

Census Tract

A small, relatively permanent statistical subdivision of a county delineated by a local committee of census data users for the purpose of presenting data. Census tracts nest within counties, and their boundaries normally follow visible features, but may follow legal geography boundaries and other non-visible features in some instances, Census tracts ideally contain about 4,000 people and 1,600 housing units.

Civilian noninstitutionalized population

All U.S. civilians not residing in institutional group quarters facilities such as correctional institutions, juvenile facilities, skilled nursing facilities, and other long-term care living arrangements.

Disability

A long-lasting physical, mental, or emotional condition. This condition can make it difficult for a person to do activities such as walking, climbing stairs, dressing, bathing, learning, or remembering. This condition can also impede a person from being able to go outside the home alone or to work at a job or business.

EJSCREEN

EJSCREEN is an environmental justice mapping and screening tool that provides EPA with a nationally consistent dataset and approach for combining environmental and demographic indicators. EJSCREEN users choose a geographic area; the tool then provides demographic and environmental information for that area. All of the EJSCREEN indicators are publicly-available data. EJSCREEN simply provides a way to display this information and includes a method for combining environmental and demographic indicators into EJ indexes.

Ethnicity

The U.S. Census Bureau adheres to the U.S. Office of Management and Budget's (OMB) definition of ethnicity. There are two minimum categories for ethnicity: Hispanic or Latino and Not Hispanic or Latino. OMB considers race and Hispanic origin to be two separate and distinct concepts. Hispanics and Latinos may be of any race.

Hispanic or Latino

Hispanic or Latino refers to a person of Cuban, Mexican, Puerto Rican, South or Central American, or other Spanish culture or origin regardless of race. This includes people who reported detailed Hispanic or Latino groups such as:

- Mexican
- Puerto Rican
- Cuban
- Dominican Republic

Central American (excludes Mexican)

- Costa Rican
- Guatemalan

- Honduran
- Nicaraguan
- Panamanian
- Salvadoran
- Other Central American

South American

- Argentinian
- Bolivian
- Chilean
- Colombian
- Ecuadorian
- Paraguayan
- Peruvian
- Uruguayan
- Venezuelan
- Other South American

Spaniard

- All other Hispanic or Latino

Household

A household includes all the people who occupy a housing unit (such as a house or apartment) as their usual place of residence.

A household includes the related family members and all the unrelated people, if any, such as lodgers, foster children, wards, or employees who share the housing unit. A person living alone in a housing unit, or a group of unrelated people sharing a housing unit such as partners or roomers, is also counted as a household. The count of households excludes group quarters. There are two major categories of households, "family" and "nonfamily."

Household is a standard item in Census Bureau population tables.

Household Income

The sum of the income of all people 15 years and older living in the household. A household includes related family members and all the unrelated people, if any, such as lodgers, foster children, wards, or employees who share the housing unit. A person living alone in a housing unit, or a group of unrelated people sharing a housing unit, is also counted as a household.

Language Spoken at Home

The language currently used by respondents at home, either "English only" or a non-English language which is used in addition to English or in place of English.

Limited English Proficiency

Individuals who do not speak English as their primary language and who have a limited ability to read, speak, write, or understand English can be limited English proficient, or "LEP." These

individuals may be entitled language assistance with respect to a particular type or service, benefit, or encounter.

Native Hawaiian or Other Pacific Islander

A person having origins in any of the original peoples of Hawaii, Guam, Samoa, or other Pacific Islands. This includes people who reported detailed Pacific Islander responses such as:

- Fijian
- Guamanian or Chamorro
- Marshallese
- Native Hawaiian
- Other Micronesian
- Other Pacific Islander, not specified
- Other Polynesian
- Samoan
- Tongan

Per Capita Income

Per capita income is the mean income computed for every man, woman, and child in a particular group. It is derived by dividing the total income of a particular group by the total population.

Poverty

Following the [Office of Management and Budget's \(OMB's\) Directive 14](#), the Census Bureau uses a set of money income thresholds that vary by family size and composition to determine who is in poverty. If the total income for a family or unrelated individual falls below the relevant poverty threshold, then the family (and every individual in it) or unrelated individual is considered in poverty.

Race

The data on race were derived from answers to the question on race. The U.S. Census Bureau collects race data in accordance with guidelines provided by the U.S. Office of Management and Budget (OMB), and these data are based on self-identification. The racial categories included in the census questionnaire generally reflect a social definition of race recognized in this country and not an attempt to define race biologically, anthropologically, or genetically. In addition, it is recognized that the categories of the race question include race and national origin or sociocultural groups. OMB requires that race data be collected for a minimum of five groups: White, Black or African American, American Indian or Alaska Native, Asian, and Native Hawaiian or other Pacific Islander. OMB permits the Census Bureau to also use a sixth category - Some Other Race. Respondents may report more than one race.

Some other Race

Includes all other responses not included in the “White,” “Black or African American,” “American Indian or Alaska Native,” “Asian,” and “Native Hawaiian or Other Pacific Islander” race categories. Respondents reporting entries such as multiracial, mixed, interracial, or a Hispanic, Latino, or Spanish group (for example, Mexican, Puerto Rican, Cuban, or Spanish) in response to the race question are included in this category.

Two or More Races

People may choose to provide two or more races either by checking two or more race response check boxes, by providing multiple responses, or by some combination of check boxes and other responses. The race response categories shown on the questionnaire are collapsed into the five minimum race groups identified by OMB and the Census Bureau’s “Some Other Race” category. For data product purposes, “Two or More Races” refers to combinations of two or more of the following race categories:

- White
- Black or African American
- American Indian or Alaska Native
- Asian
- Native Hawaiian or Other Pacific Islander
- Some Other Race

White

A person having origins in any of the original peoples of Europe, the Middle East, or North Africa. It includes people who indicate their race as “White” or report entries such as Irish, German, Italian, Lebanese, Arab, Moroccan, or Caucasian.

DISABILITY CHARACTERISTICS

2012-2016 American Community Survey 5-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Tell us what you think. Provide feedback to help make American Community Survey data more useful for you.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Subject	North Carolina				
	Total		With a disability		Percent with a disability Estimate
	Estimate	Margin of Error	Estimate	Margin of Error	
Total civilian noninstitutionalized population	9,745,671	+/-1,984	1,331,570	+/-9,030	13.7%

DISABILITY CHARACTERISTICS

2012-2016 American Community Survey 5-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Tell us what you think. Provide feedback to help make American Community Survey data more useful for you.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

POVERTY STATUS IN THE PAST 12 MONTHS

2012-2016 American Community Survey 5-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Tell us what you think. Provide feedback to help make American Community Survey data more useful for you.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

INCOME IN THE PAST 12 MONTHS (IN 2016 INFLATION-ADJUSTED DOLLARS)

2012-2016 American Community Survey 5-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Tell us what you think. Provide feedback to help make American Community Survey data more useful for you.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

INCOME IN THE PAST 12 MONTHS (IN 2016 INFLATION-ADJUSTED DOLLARS)

2012-2016 American Community Survey 5-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Tell us what you think. Provide feedback to help make American Community Survey data more useful for you.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

When information is missing or inconsistent, the Census Bureau logically assigns an acceptable value using the response to a related question or questions. If a logical assignment is not possible, data are filled using a statistical process called allocation, which uses a similar individual or household to provide a donor value. The "Allocated" section is the number of respondents who received an allocated value for a particular subject.

While the 2012-2016 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Source: U.S. Census Bureau, 2012-2016 American Community Survey 5-Year Estimates

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is not appropriate.
7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.
8. An '(X)' means that the estimate is not applicable or not available.

 Universe: Population 5 years and over
 2011-2015 American Community Survey 5-Year Estimates

Supporting documentation on code lists, subject definitions, data accuracy, and statistical testing can be found on the American Community Survey website in the Data and Documentation section.

Sample size and data quality measures (including coverage rates, allocation rates, and response rates) can be found on the American Community Survey website in the Methodology section.

Tell us what you think. Provide feedback to help make American Community Survey data more useful for you.

Although the American Community Survey (ACS) produces population, demographic and housing unit estimates, it is the Census Bureau's Population Estimates Program that produces and disseminates the official estimates of the population for the nation, states, counties, cities and towns and estimates of housing units for states and counties.

Data are based on a sample and are subject to sampling variability. The degree of uncertainty for an estimate arising from sampling variability is represented through the use of a margin of error. The value shown here is the 90 percent margin of error. The margin of error can be interpreted roughly as providing a 90 percent probability that the interval defined by the estimate minus the margin of error and the estimate plus the margin of error (the lower and upper confidence bounds) contains the true value. In addition to sampling variability, the ACS estimates are subject to nonsampling error (for a discussion of nonsampling variability, see Accuracy of the Data). The effect of nonsampling error is not represented in these tables.

Methodological changes to data collection in 2013 may have affected language data for 2013. Users should be aware of these changes when using multi-year data containing data from 2013. For more information, see: Language User Note.

While the 2011-2015 American Community Survey (ACS) data generally reflect the February 2013 Office of Management and Budget (OMB) definitions of metropolitan and micropolitan statistical areas; in certain instances the names, codes, and boundaries of the principal cities shown in ACS tables may differ from the OMB definitions due to differences in the effective dates of the geographic entities.

Estimates of urban and rural population, housing units, and characteristics reflect boundaries of urban areas defined based on Census 2010 data. As a result, data for urban and rural areas from the ACS do not necessarily reflect the results of ongoing urbanization.

Explanation of Symbols:

1. An '***' entry in the margin of error column indicates that either no sample observations or too few sample observations were available to compute a standard error and thus the margin of error. A statistical test is not appropriate.
2. An '-' entry in the estimate column indicates that either no sample observations or too few sample observations were available to compute an estimate, or a ratio of medians cannot be calculated because one or both of the median estimates falls in the lowest interval or upper interval of an open-ended distribution.
3. An '-' following a median estimate means the median falls in the lowest interval of an open-ended distribution.
4. An '+' following a median estimate means the median falls in the upper interval of an open-ended distribution.
5. An '***' entry in the margin of error column indicates that the median falls in the lowest interval or upper interval of an open-ended distribution. A statistical test is not appropriate.
6. An '*****' entry in the margin of error column indicates that the estimate is controlled. A statistical test for sampling variability is

not appropriate.

7. An 'N' entry in the estimate and margin of error columns indicates that data for this geographic area cannot be displayed because the number of sample cases is too small.

8. An '(X)' means that the estimate is not applicable or not available.
