

List of Companies Providing Burner Tune-Ups

The NC DAQ has compiled a list of boiler tune-up professionals for informational purposes only. Note this is not a complete list of all available companies. In addition, this list is only for identifying possible boiler tune-up technicians. Inclusion on the list does not imply any endorsement or review of the listed companies' qualifications by the DAQ, its employees or the North Carolina State government. Owners and operators should use sound judgment to verify that the tune-up technician is skilled in the evaluation and adjustment of the specific boiler and burner equipment in use.
