### Part III. Special Waste Collections

This section concerns local government programs for managing materials that require special handling or that are banned from landfilling. Please provide responses and data as indicated below considering services provided to the public. Please do not include data on materials that were accepted and then disposed of in a landfill. Use this section to elaborate on any info provided in your report as necessary. We would appreciate your comments about this report or other matters regarding solid waste management in North Carolina. Thank you for your time. You may submit additional sheets if needed.

The Rowan County began single-stream-minus (glass & OCC) beginning in August 2017. As of July 1, 2018 our program will revert the source-separated model in the absence of any viable MRF option. We will continue to diligently explore co-mingle processing opportunities with the aim of returning to the co-mingle minus model upon material markets stabilizing.

Rowan County is currently redeveloping two convenience centers.
