Regulatory Background
This report is submitted to meet the requirements of General Statute 130A-309.204, which requires the Department of Environmental Quality (DEQ) to submit quarterly reporting on operations, activities, programs and progress relating to coal combustion residuals surface impoundments. Specifically, General Statute (G.S.) 130A-309.204(a) states:

The Department shall submit quarterly written reports to the Environmental Review Commission on its operations, activities, programs, and progress with respect to its obligations under this Part concerning all coal combustion residuals surface impoundments. At a minimum, the report shall include information concerning the status of assessment, corrective action, prioritization, and closure for each coal combustion residuals surface impoundment and information on costs connected therewith. The report shall include an executive summary of each annual Groundwater Protection and Restoration Report submitted to the Department by the operator of any coal combustion residuals surface impoundments pursuant to G.S. 130A-309.211(d) and a summary of all groundwater sampling, protection, and restoration activities related to the impoundment for the preceding year. The report shall also include an executive summary of each annual Surface Water Protection and Restoration Report submitted to the Department by the operator of any coal combustion residuals surface impoundments pursuant to G.S. 130A-309.212(e) and a summary of all surface water sampling, protection, and restoration activities related to the impoundment for the preceding year, including the status of the identification, assessment, and correction of unpermitted discharges from coal combustion residuals surface impoundments to the surface waters of the State. The Department shall supplement the written reports required by this subsection with additional written and oral reports as may be requested by the Environmental Review Commission. The Department shall submit the written reports required by this subsection whether or not the General Assembly is in session at the time the report is due.

Report Structure
This report is broken down by the N.C. Department of Environmental Quality Divisions of Water Resources, Waste Management, and Energy, Mineral, and Land Resources. The information provided is either on-going or has occurred since the submittal of the previous quarterly report.
Division of Water Resources

Duke Energy facilities with Surface Impoundments. Division of Water Resources regulates Surface Impoundments in accordance with the Coal Ash Management Act (CAMA) as well as the General Statute 143-215, Control of Sources of Water Pollution; Permits Required and State Administrative Code 15A NCAC 2L Classification and Water Quality Standards Applicable to Groundwaters of the State.

General Status of Surface Impoundments:
The following are general status notes for all facilities, except where stated.

Corrective Action Status
Individual site-specific status notes included in the next section.

Prioritization and Closure Status [G.S. 130A-309.213]
Currently, all facilities are ranked as high, intermediate, or low priority.

- Facilities classified as high-risk per Session Law 2014-122 Senate Bill 729 Section 3.(b) are:
  - Asheville Steam Station
  - Dan River Combined Cycle Station
  - Riverbend Steam Station
  - L. V. Sutton Energy Complex

  High-risk impoundments are required to be closed no later than December 31, 2019. Proposed plans were submitted by December 31, 2016.

- Facilities classified as intermediate-risk per Session Law 2016-95 House Bill 630 Section 3.(a) are:
  - H. F. Lee Energy Complex
  - Cape Fear Steam Electric Plant
  - W. H. Weatherspoon Power Plant

  These facilities have also been selected by Duke Energy for beneficiation under G.S. 130A-309.216. Per G.S. 130A-309.216(c), sites selected for ash beneficiation projects shall be closed no later than December 31, 2029.

- Facilities classified as low risk per G.S. 130A-309.213 are:
  - Allen Steam Station
  - Belews Creek Steam Station
  - Buck Combined Cycle Station
  - James E. Rogers Energy Complex (formerly Cliffside Steam Station)
  - Marshall Steam Station
On November 13, 2018, DEQ deemed that these facilities are low risk based on criteria under G.S. 130A-309.213(d)(1).

Low-risk impoundments are required to be closed no later than December 31, 2029. A proposed closure plan for low-risk impoundments must be submitted no later than December 31, 2019. Intermediate-risk impoundments are required to be closed no later than December 31, 2024. A proposed closure plan for intermediate-risk impoundments must be submitted no later than December 31, 2019.

Per G.S. 130A-309.216, Duke Energy was required to identify, at a minimum, three sites for beneficial reuse. Along with the Cape Fear Steam Electric Plant, H.F. Lee Energy Complex, and the W. H. Weatherspoon Power Plan, the Buck Combined Cycle Station was additionally selected for beneficial reuse. G.S. 130A-309.216(c) states that sites selected for beneficiation projects must close by December 31, 2029.

General Costs [G.S. 130-309.214(m)]
Costs are required to be included with the site closure plans and corrective action plans.

- Closure plans for the high-risk impoundments were submitted in January 2017 but were deemed incomplete by the DEQ. These plans included general cost estimates and were labeled confidential.
- Updated corrective action plans have yet to be submitted for all facilities.
- Duke Energy provided general costs for closure for the six sites under review in November 2018.

Site Specific Actions of Surface Impoundments
The following site-specific actions and status notes have occurred since the submittal of the previous quarterly report.

Acronyms
The following acronyms may be used in the remaining sections.

- A/M – Approval with Modifications
- BTVs – Background Threshold Values
- CAP – Corrective Action Plan
- CCR – Coal Combustion Residuals
- COFA – Certificate of Final Approval
- CQA – Construction Quality Assurance
- CSA – Comprehensive Site Assessment
- DEQ – North Carolina Department of Environmental Quality
• DORS – Distribution of Residual Solids
• DWM – Division of Waste Management
• DWR – Division of Water Resources
• EMC – Environmental Management Commission
• FGD – Flue-gas Desulfurization
• NOD – Notice of Deficiency
• NOI – Notice of Intent
• NOV – Notice of Violation
• NPDES – National Pollution Discharge Elimination System
• PTC – Permit to Construct
• PTO – Permit to Operate
• SOC – Special Order by Consent

All Facilities
• Assessment and Corrective Action Status
  o September 10, 2019 – DEQ provides Duke Energy with guidance on CAP content to be used in all future CAP submittals.
  o October 24, 2019 – DEQ provides a position to Duke Energy regarding collection of dissolved and speciated samples.
  o October 24, 2019 – DEQ provides a position to Duke Energy on management of constituents of interest including mapping expectations.

Allen Steam Station
• Assessment and Corrective Action Status
  o October 17, 2019 – DEQ establishes updated BTVs for the facility.
  o May 9, 2019 – DEQ revised previous correspondence and reestablished dates for Duke Energy to submit the following with regards to CSAs and CAPs:
    ▪ March 31, 2020 – Updated CAP for the impoundments and other primary and secondary sources (coal pile, retired ash basin and landfill, structural fills, and dry ash storage areas).
    ▪ March 31, 2020 – CSA for other primary and secondary sources (gypsum pad).

• Closure Status
  o May 9, 2019 – DEQ reestablished Closure Plans to be due December 31, 2019.
  o April 26, 2019 – Duke Energy filed an appeal with the Office of Administrative Hearings contesting the closure determination.
  o April 1, 2019 – Per 130A-309.214(a)(3), DEQ determined that excavation under 130A-309.214(a)(1) shall be the method of closure for the impoundments.
  o November 13, 2018 – DEQ deemed that this facility is low risk based on criteria under G.S. 130A-309.213(d)(1). Therefore, the impoundments are required to be
closed no later than December 31, 2029. A proposed closure plan must be submitted no later than December 31, 2019.

- NPDES permit NC0004979
  - November 13, 2019 – Major modification application received.
  - August 1, 2018 – Permit became effective.

- SOC S17-009
  - April 12, 2018 – SOC was signed by the EMC.

**Asheville Steam Electric Plant**

- Assessment and Corrective Action Status
  - October 30, 2019 – DEQ approves Duke Energy’s request to abandon several monitoring wells.
  - April 5, 2019 – DEQ reestablished dates for Duke Energy to submit the following with regards to CSAs and CAPs:
    - June 1, 2020 – Updated CSA for impoundments and other primary and secondary sources (coal pile).
    - March 1, 2021 – Updated CAP for impoundments and other primary and secondary sources.

- Closure Status
  - 1964 Basin
    - Excavation of the impoundment in progress.
  - 1982 Basin
    - Impoundment completely excavated.

- NPDES permit NC0000396
  - May 24, 2019 – Major modification was issued and became effective July 1, 2019.
  - December 1, 2018 – Permit became effective.

- SOC S17-010
  - October 10, 2018 – SOC was signed by the EMC.

**Belews Creek Steam Station**

- Assessment and Corrective Action Status
  - October 17, 2019 – DEQ establishes updated BTVs for the facility.
  - May 9, 2019 – DEQ revised previous correspondence and reestablished dates for Duke Energy to submit the following with regards to CSAs and CAPs:
    - March 31, 2020 – Updated CAP for impoundments and other primary and secondary sources (Pine Hall Road landfill).
    - March 31, 2020 – CSA for other primary and secondary sources (structural fill and coal pile).

- Closure Status
  - May 9, 2019 – DEQ revised previous correspondence and reestablished Closure Plan to be due December 31, 2019.
April 26, 2019 – Duke Energy filed an appeal with the Office of Administrative Hearings contesting the closure determination.

April 1, 2019 – Per 130A-309.214(a)(3), DEQ determined that excavation under 130A-309.214(a)(1) shall be the method of closure for the impoundments.

November 13, 2018 – DEQ deemed that this facility is low risk based on criteria under G.S. 130A-309.213(d)(1). Therefore, the impoundments are required to be closed no later than December 31, 2029. A proposed closure plan must be submitted no later than December 31, 2019.

- NPDES permit NC0024406
  - March 25, 2019 – Permit became effective.
- SOC S18-004
  - July 12, 2018 – SOC was signed by the EMC.
- SOC S18-009
  - March 21, 2019 – SOC was signed by the Division Director.

**Buck Combined Cycle Station**

- Assessment and Corrective Action Status
  - April 5, 2019 – DEQ reestablished dates for Duke Energy to submit the following with regards to CSAs and CAPs:
    - October 1, 2020 – Updated CSA for impoundments and other primary and secondary sources (coal pile).
    - July 1, 2021 – Updated CAP for impoundments and other primary and secondary sources.
  - Closure Status
    - Per G.S. 130A-309.216, Duke Energy was required to identify, at a minimum, three sites for beneficial reuse. Along with the Cape Fear Steam Electric Plant, H.F. Lee Energy Complex, and the W. H. Weatherspoon Power Plan, the Buck Combined Cycle Station was additionally selected for beneficial reuse. G.S. 130A-309.216(c) states that sites selected for beneficiation projects must close by December 31, 2029.
    - November 13, 2018 – DEQ deemed that this facility is low risk based on criteria under G.S. 130A-309.213(d)(1). However, since Duke Energy selected this site for beneficial reuse, this site does not have to close until December 31, 2029.
  - NPDES Permit NC0004774
    - August 21, 2019 – Major modification application received.
    - November 1, 2018 – Permit became effective.
  - SOC S18-004
    - July 12, 2018 – SOC was signed by the EMC.

**Cape Fear Steam Electric Plant**

- Assessment and Corrective Action Status
April 5, 2019 – DEQ reestablished dates for Duke Energy to submit the following with regards to CSAs and CAPs:

- September 1, 2020 – Updated CSA for impoundments and other primary and secondary sources (former coal pile storage areas).
- July 1, 2021 – Updated CAP for impoundments and other primary and secondary sources.

- **Closure Status**
  - Per G.S. 130A-309.216, Duke Energy was required to identify, at a minimum, three sites for beneficial reuse. The Cape Fear Steam Electric Plant was selected for beneficial reuse. G.S. 130A-309.216(c) states that sites selected for beneficiation projects must close by December 31, 2029.

- **NPDES permit NC0003433**
  - December 21, 2018 – Major modification was issued and became effective February 1, 2019.

- **SOC number unassigned**
  - No longer associated with SOC S18-006. Negotiations are underway for a separate SOC.

**James E. Rogers Energy Complex (Formerly Cliffside Steam Station)**

- **Assessment and Corrective Action Status**
  - October 17, 2019 – DEQ establishes updated BTVs for the facility.
  - May 9, 2019 – DEQ revised previous correspondence and reestablished dates for Duke Energy to submit the following with regards to CSAs and CAPs:
    - March 31, 2020 – Updated CAP for impoundments and other primary and secondary sources (ash storage areas, new source area east of Unit 6 and west of Suck Creek).
    - March 31, 2020 – CSA for other primary and secondary sources (raw coal piles north of Unit 6, switchyard ash disposal area, and gypsum pile).

- **Closure Status**
  - May 9, 2019 – DEQ revised previous correspondence and reestablished Closure Plan to be due December 31, 2019
  - April 26, 2019 – Duke Energy filed an appeal with the Office of Administrative Hearings contesting the closure determination.
  - April 1, 2019 – Per 130A-309.214(a)(3), DEQ determined that excavation under 130A-309.214(a)(1) shall be the method of closure for the impoundments.
  - November 13, 2018 – DEQ deemed that this facility is low risk based on criteria under G.S. 130A-309.213(d)(1). Therefore, the impoundments are required to be closed no later than December 31, 2029. A proposed closure plan must be submitted no later than December 31, 2019.
o Inactive Units 1-4 are completely excavated. On August 10, 2018, DEQ approved the visual verification of CCR removal.

- NPDES permit NC0005088
  o September 1, 2018 – Permit became effective.
- SOC S17-009
  o April 12, 2018 – SOC was signed by the EMC.

Dan River Combined Cycle Station

- Assessment and Corrective Action Status
  o April 5, 2019 – DEQ reestablished dates for Duke Energy to submit the following with regards to CSAs and CAPs:
    ▪ July 1, 2020 – Updated CAP for impoundments and other primary and secondary sources (former coal yard).

- Closure Status
  o July 31, 2019 – DEQ approved the visual verification of CCR removal.
  o Excavation is complete.
- NPDES permit NC0003468
  o February 1, 2019 – Permit became effective.

H. F. Lee Energy Complex

- Assessment and Corrective Action Status
  o September 11, 2019 – DEQ approves the coal pile assessment work plan.
  o April 5, 2019 – DEQ reestablished dates for Duke Energy to submit the following with regards to CSAs and CAPs:
    ▪ October 1, 2020 – Updated CSA for impoundments and other primary and secondary sources (coal staging area, coal pile area, and lay of land area).
    ▪ July 1, 2021 – Updated CAP for impoundments and other primary and secondary sources.

- Closure Status
  o Per G.S. 130A-309.216, Duke Energy was required to identify, at a minimum, three sites for beneficial reuse. The H. F. Lee Energy Complex was selected for beneficial reuse. G.S. 130A-309.216(c) states that sites selected for beneficiation projects must close by December 31, 2029.
- NPDES permit NC0003417
  o November 12, 2019 – Major modification application was received.
  o July 1, 2019 – Permit became effective.
- SOC S18-006
January 10, 2019 – SOC was signed by the EMC.

Marshall Steam Station

- **Assessment and Corrective Action Status**
  - October 17, 2019 – DEQ establishes updated BTVs for the facility.
  - October 4, 2019 – DEQ approves the additional area assessment work plan and data gap work plan.
  - September 17, 2019 – Duke Energy submits additional area assessment work plan.
  - May 9, 2019 – DEQ revised previous correspondence and reestablished dates for Duke Energy to submit the following with regards to CSAs and CAPs:
    - March 31, 2020 – Updated CAP for impoundments and other primary and secondary sources (coal pile and gypsum pile).

- **Closure Status**
  - August 23, 2019 – Received CCR visual verification report for Marshall West Finger Pond. DEQ to respond.
  - May 9, 2019 – DEQ revised previous correspondence and reestablishes Closure Plan to be due December 31, 2019
  - April 26, 2019 – Duke Energy filed an appeal with the Office of Administrative Hearings contesting the closure determination.
  - April 1, 2019 – Per 130A-309.214(a)(3), DEQ determined that excavation under 130A-309.214(a)(1) shall be the method of closure for the impoundments.
  - November 13, 2018 – DEQ deemed that this facility is low risk based on criteria under G.S. 130A-309.213(d)(1). Therefore, the impoundments are required to be closed no later than December 31, 2029. A proposed closure plan must be submitted no later than December 31, 2019.

- **NPDES permit NC0004987**
  - May 1, 2018 – Permit became effective.

- **SOC S17-009**
  - April 12, 2018 – SOC was signed by the EMC.

Mayo Steam Electric Plant

- **Assessment and Corrective Action Status**
  - November 26, 2019 – DEQ approves abandoning monitoring wells affected by sloughing and requests assessment of feasibility for replacement of these wells. Duke Energy to respond.
  - November 12, 2019 – DEQ approves Duke Energy’s request to submit the results of the coal pile assessment in a separate document other than the CAP and CSA due on March 31, 2020. The proposed due date for the assessment will be provided by Duke Energy.
• October 17, 2019 – DEQ establishes updated BTVs for the facility.
• October 10, 2019 – Duke Energy submits request to provide the results of the coal pile assessment in a separate document other than the CAP and CSA due on March 31, 2020.
• October 3, 2019 – Duke Energy submits request to abandon several wells in the area of sloughing within the basin. On November 13, 2019, DEQ performed a site visit to evaluate the request.
• September 24, 2019 – Duke Energy submits an additional area assessment work plan for the coal pile. On November 13, 2019, DEQ performed a site visit to evaluate the work plan. DEQ to respond.
• May 9, 2019 – DEQ revised previous correspondence and reestablished dates for Duke Energy to submit the following with regards to CSAs and CAPs:
  - March 31, 2020 – Updated CAP for impoundments and other primary and secondary sources (active coal storage pile areas).
  - March 31, 2020 – CSA for other primary and secondary sources (gypsum pad and low-volume wastewater pond).

• Closure Status
  • December 31, 2019 – Duke Energy submitted a closure plan for the impoundments.
  • May 9, 2019 – DEQ revised previous correspondence and reestablished Closure Plan to be due December 31, 2019.
  • April 26, 2019 – Duke Energy filed an appeal with the Office of Administrative Hearings contesting the closure determination.
  • April 1, 2019 – Per 130A-309.214(a)(3), DEQ determined that excavation under 130A-309.214(a)(1) shall be the method of closure for the impoundments.
  • November 13, 2018 – DEQ deemed that this facility is low risk based on criteria under G.S. 130A-309.213(d)(1). Therefore, the impoundments are required to be closed no later than December 31, 2029. A proposed closure plan must be submitted no later than December 31, 2019.

• NPDES permit NC0038377
  • August 1, 2018 – Permit became effective.

• SOC S18-005
  • August 15, 2018 – SOC was signed by the EMC.

Riverbend Steam Station
• Assessment and Corrective Action Status
  • July 25, 2019 – DWR submits comments to Duke Energy regarding their CCR Visual Verification Report for impoundment.
  • April 5, 2019 – DEQ reestablishes dates for Duke Energy to submit the following with regards to CSAs and CAPs:
    - May 1, 2020 – Updated CAP for impoundments and other primary and secondary sources (coal yard).

• Closure Status
October 9, 2019 – Duke Energy submits request for closure certification of the Basin. DEQ to respond.
Excavation is complete.

- NPDES permit NC0004961
  - August 27, 2019 – Renewal application received.
  - December 1, 2016 – Permit became effective.
- SOC S16-005
  - November 10, 2016 – SOC was signed by the Division Director.

**Roxboro Steam Electric Plant**

- Assessment and Corrective Action Status
  - October 17, 2019 – DEQ establishes updated BTVs for the facility.
  - May 9, 2019 – DEQ revises previous correspondence and reestablishes dates for Duke Energy to submit the following with regards to CSAs and CAPs:
    - March 31, 2020 – Updated CAP for impoundments and other primary and secondary sources (east and west ash basins extensions and discharge canals).
    - March 31, 2020 – CSA for other primary and secondary sources (coal storage area).
- Closure Status
  - May 9, 2019 – DEQ revised previous correspondence and reestablished Closure Plan to be due December 31, 2019.
  - April 26, 2019 – Duke Energy filed an appeal with the Office of Administrative Hearings contesting the closure determination.
  - April 1, 2019 – Per 130A-309.214(a)(3), DEQ determined that excavation under 130A-309.214(a)(1) shall be the method of closure for the impoundments.
  - November 13, 2018 – DEQ deemed that this facility is low risk based on criteria under G.S. 130A-309.213(d)(1). Therefore, the impoundments are required to be closed no later than December 31, 2029. A proposed closure plan must be submitted no later than December 31, 2019.
- NPDES permit NC0003425
  - Currently in draft and waiting for submission to be re-public noticed.
- SOC S18-005
  - August 15, 2018 – SOC was signed by the EMC.

**L. V. Sutton Energy Complex**

- Assessment and Corrective Action Status
  - May 20, 2019 – Received Interim Action Effectiveness Monitoring Report
  - April 5, 2019 – DEQ reestablished dates for Duke Energy to submit the following with regards to CSAs and CAPs:
- May 1, 2020 – Updated CAP for impoundments and other primary and secondary sources (former ash disposal area, former process area, and former coal stockpile area).

- **Closure Status**
  - Excavation of the 1971 Basin is complete.
  - Excavation at the 1984 site is underway.

- **NPDES permit NC0001422**
  - October 1, 2017 – Permit became effective.

**W. H. Weatherspoon Power Plant**

- **Assessment and Corrective Action Status**
  - April 5, 2019 – DEQ reestablished dates for Duke Energy to submit the following with regards to CSAs and CAPs:
    - Updated CSA for impoundments and other primary and secondary sources (coal storage area and cooling pond) – June 1, 2020
    - March 1, 2021 – Updated CAP for impoundments and other primary and secondary sources.

- **Closure Status**
  - Per G.S. 130A-309.216, Duke Energy was required to identify, at a minimum, three sites for beneficial reuse. The W. H. Weatherspoon Power Plant was selected for beneficial reuse. G.S. 130A-309.216(c) states that sites selected for beneficiation projects must close by December 31, 2029.

- **NPDES permit NC0005363**
  - November 1, 2018 – Permit became effective.

- **SOC number unassigned**
  - No longer associated with SOC S18-006. Negotiations are underway for a separate SOC.

**Annual Groundwater Protection and Restoration Report Summary**
The Annual Groundwater Protection and Restoration Reports have been uploaded to the DEQ website. Since the reports are very concise, they do not lend themselves to being summarized. The report summarizes all groundwater sampling, protection, and restoration activities related to the impoundment for the preceding year.

**Annual Surface Water Protection and Restoration Report Summary**
The Annual Surface Water Protection and Restoration Reports have been uploaded to the DEQ website. Since the reports are very concise, they do not lend themselves to being summarized.
The report summarizes all groundwater sampling, protection, and restoration activities related to the impoundment for the preceding year.
Division of Waste Management

LANDFILLS AT DUKE ENERGY COAL ASH FACILITIES

Allen Steam Station – Gaston County (current coal fired)
• 3612-INDUS-2008: Retired Ash Basin Landfill (open, double-lined, landfill constructed on top of retired ash basin)
  ○ Permit renewal received by the Division on June 10, 2019.

Belews Creek Steam Station – Stokes County (current coal fired)
• 8503-INDUS-1984: Pine Hall Road Landfill (closed, unlined – composite cap system)
  ○ Currently assessing the limits of the unlined/earthen capped area of the landfill (flat area), for extent and stability.
  ○ Inspected March 19, 2019.
  ○ Groundwater Assessment
    ▪ No updates at this time – November 18, 2019

• 8504-INDUS-2007: Craig Road Landfill (open, lined)
  ○ Division approval of storm water drainage modifications on May 17, 2019.
  ○ Storm water drainage modifications received by the Division on May 2, 2019.
  ○ Inspected March 19, 2019.
  ○ Groundwater Assessment
    ▪ No updates at this time – November 18, 2019

• 8505-INDUS-2008: Flue Gas Desulfurization (FGD) Landfill (open, lined)
  ○ Inspected March 19, 2019.
  ○ Division approval of access road modifications on September 25, 2019.
  ○ Division approval of leachate line modifications on October 29, 2019.
  ○ Groundwater Assessment
    ▪ No updates at this time – November 18, 2019

Dan River Steam Station – Rockingham County (retired coal-fired plant, converted to combined cycle turbine)
• 7906-INDUS-2016: CCR Landfill (open, lined)
  ○ Inspected October 24, 2019.
  ○ Coal ash disposal complete, landfill has been covered with intermediate cover material, final closure underway.

Mayo Steam Electric Plant – Person County (current coal fired)
• 7305-INDUS-2012: CCR Landfill (open, double lined)
  ○ Inspected September 25, 2019.
  ○ Groundwater Assessment
    ▪ No updates at this time – November 18, 2019
  ○ Third Party Review submitted in response to NOV – October 16th, 2019
Third Party Recommendations, Proposed Timeline submitted – November 6th, 2019

Marshall Steam Station – Catawba County (current coal fired)

- **1804-INDUS-1983: Dry Ash Landfill (closed, unlined – Phase 2 composite cap system)**
  - Inspected June 27, 2019.
  - Groundwater Assessment
    - No updates at this time – November 18, 2019

- **1809-INDUS: FGD Landfill (closed, lined)**
  - Closure CQA report, Post-closure plan and WQMP received April 1, 2019.
    - Permit for Closure has not been issued.
  - Inspected June 27, 2019.
  - Groundwater Assessment
    - No updates at this time – November 18, 2019

- **1812-INDUS-2008: Industrial Landfill #1 (open, double-lined)**
  - Inspected June 27, 2019.

- **Structural Fill CCB0031**
  - Storm water rerouting project (MAR-145) is complete,
    - Rerouting of the leachate force main from the Industrial Landfill at the crossing under the Surface Water Channel was Division-approved in April 2019 and completed in July 2019.
    - The Surface Water Channel was completed in July 2019; the West (and only) Temporary Surface Water Pond was put into operation in August 2019.
  - Inspected June 27, 2019.
  - Erosion event – November 4, 2019
    - DWM site visit November 12, 2019.
    - Repairs complete November 11, 2019.

Rogers Energy Complex – Rutherford County (current coal fired)

- **8106-INDUS-2009: CCR Landfill (open, lined)**
  - PTC application – Determination of Completeness submitted to facility on June 4, 2019, deemed complete
  - Design hydrogeologic technical review letter sent August 14, 2019.
  - Inspected January 22, 2019.

Roxboro Steam Electric Plant – Person County (current coal fired)

- **7302-INDUS-1988: CCR Landfill (open, lined, constructed partially on top of retired ash basin)**
  - Inspected September 25, 2019.
Sutton Steam Electric Plant – New Hanover County (retired coal-fired plant, converted to combined cycle turbine)

- **6512-INDUS-2016: CCR Landfill (open, lined)**
  - Approval of closure turf field test pad on July 18, 2019.
  - Closure turf field test pad location report received on July 10, 2019.
  - Thirty-day follow-up report on release received on July 1, 2019.
  - Inspection of Site as response to coal ash release off of liner on June 28, 2019.
  - Operations plan – change to contingency plan approved on June 27, 2019.
  - Change to approved plans received on June 10, 2019.
  - Inspection on May 29, 2019.

LANDFILLS NOT ON DUKE ENERGY FACILITIES

Halifax County Industrial Landfill – Halifax County Westmoreland Partners, Roanoke Valley Energy Plant (retired coal-fired plant, plant closed)

- **4204-INDUS-1994: Halifax County Coal Ash Landfill (open/inactive, lined)**
  - Change to approved plans on August 6, 2019 and approval on August 7, 2019.
  - Ash Monofill and Area 1 Construction/Demolition Landfill closure meeting on June 28, 4, May 7, and August 26, 2019.
  - Inspection on November 13, 2019.
  - Coal Ash disposal complete, monofill closure underway.

DUKE ENERGY FACILITIES WITHOUT LANDFILLS

Asheville Steam Electric Plant - Buncombe County (Duke Energy submitted plans to convert to combined cycle turbine to the N.C. Utilities Commission for approval in 2015. Plant to be converted December 31, 2019)

- **1119-INUDS-2020 (proposed)**
  - Zoning permit submitted on July 30, 2019.
  - Site Suitability submitted April 3, 2019.
  - Site Suitability comment letter sent April 26, 2019.
    - Facility’s first response on July 15, 2019 and second response on September 13, 2019.
  - Site Suitability Approval issued on September 13, 2019
  - PTC application submitted on June 17, 2019.
  - Stockpiled soil sampling analytical data submitted on June 28, 2019
    - Response on July 17, 2019.
  - PTC application – Determination of Completeness submitted to facility on July 12, 2019, deemed incomplete.
  - PTC application – Determination of Completeness submitted to facility on September 13, 2019, deemed complete.
o Stockpiled Soil Sampling Work Plan received on May 31, 2019 and revision on June 19, 2019;
  ▪ Approved on June 20, 2019.
o Ash Transportation Information Plan revision received on May 22, 2019.
o Design hydrogeologic technical review letter sent August 16, 2019.
  ▪ DWM design hydro approval sent October 7, 2019.
o Engineering technical review letter sent September 13, 2019.
  ▪ Facility response submitted October 18, 2019.
o Revised PTC Application, Rev 1 submitted October 31, 2019.
o Public Hearing scheduled December 19, 2019.
o Public Comment period ends January 10, 2020.

Buck Steam Station – Rowan County (retired coal-fired plant, converted to combined cycle turbine)
  ▪ No updates at this time - November 18, 2019.

Cape Fear Steam Electric Plant – Chatham County (retired coal-fired plant, no electricity production)
  ▪ No updates at this time - November 18, 2019.

H.F. Lee Steam Electric Plant – Wayne County (retired coal-fired plant, converted to combined cycle turbine)
  ▪ No updates at this time - November 18, 2019.

Riverbend Steam Station – Gaston County (retired coal-fired facility, no electricity)
  ▪ Response to comments on CCR visual removal report submitted on July 30, 2019.
  ▪ Confirmation of Excavation Requirements submitted to facility on July 25, 2019.
  ▪ Ash basin closure soil sampling metals analysis submitted on July 19, 2019.

Weatherspoon Steam Electric Plant – Robeson County (retired coal-fired facility, no electricity)
  ▪ No updates at this time - November 18, 2019.

COAL COMBUSTION PRODUCT (CCP) STRUCTURAL FILLS
The Section regulates large structural fills (greater than 8,000 tons per acre or 80,000 tons per project) in accordance with CAMA and small structural fills in accordance with 15A NCAC 13B .1700.

Brickhaven No. 2, Mine Track “A,” 1910-STRUC-2015 – Chatham County
  ▪ Partial closure notification of sub cell 2a, 5b, and 6a submitted on July 3, 2019.
  ▪ Partial closure notification for sub cell 6C submitted on September 10, 2019.
  ▪ Surface water and groundwater assessment request letter to facility on June 21, 2019.
• DWM Approval of Work Plan September 16, 2019.
• Assessment Schedule of Work submitted September 30, 2019;
  o DWM concurrence on October 4, 2019.
• Inspected January 31, 2019.

Colon Mine Site – Lee County, 5306-STRUC-2015
• No updates at this time - November 18, 2019.

Inventory of structural fills greater than 10,000 cy, per Session Law 2014 122:
http://deq.nc.gov/about/divisions/waste-management/solid-waste-section/coal-combustion-
byproducts.

Groundwater Assessment and Corrective Action

Roxboro Steam Station Gypsum Storage Pad (CCB0003)
• No updates at this time – November 18, 2019.
• Groundwater Assessment
  o No updates at this time – November 18, 2019.

Belews Creek Steam Station Structural Fill (CCB0070)
• No updates at this time – November 18, 2019.
• Groundwater Assessment
  o Approval of structural fill additional assessment work plan on June 17, 2019.

Swift Creek in Nash County (CCB0057)
• No updates at this time – November 18, 2019

Arthur’s Creek/Henry Long Property in Northampton County (CCB0064)
• DWM site inspection on July 11, 2019.

HISTORIC ASH MANAGEMENT AREA

6806-INDUS- Eno Power Plant – historic coal ash storage area
• Facility submitted a revised Site Actions Plan on July 31, 2019.
• DWM issued approval of revised Site Actions Plan on August 7, 2019.
Division of Energy, Mineral, and Land Resources

Duke and other Company facilities with dams, construction development, industrial activities, and mining operations - The North Carolina Division of Energy, Mineral, and Land Resources regulates industrial coal combustion residual landfills in accordance with CAMA as well as the State Dam Safety Law (NCGS 143-215.23), the Sedimentation Pollution Control Act (NCGS 113A-50), the Mining Act (NCGS 74-46), and the State Stormwater Program under the authority of multiple Session Laws along with their associated Administrative Code.

Allen Steam Station

- Dam Safety
  - GASTO-016
    - 08/29/2019 – Annual inspection performed.
  - GASTO-061
    - 08/29/2019 – Annual inspection performed.
    - 08/28/2019 – Received request to increase the drawdown rate for stormwater management from one-foot drawdown per week to one-foot drawdown per day.
    - 08/30/2019 – Approval to increase drawdown rate for stormwater management issued.
  - GASTO-324
    - 08/29/2019 – Annual inspection performed.
  - 08/28/19 – Received submittal to increase the dewatering rate of water within the basin from 1 foot per week to 1 foot per day for GASTO-061 (Allen Active Ash Basin Dam)
    - 08/30/19 – Certificate of Approval to Increase Dewatering Rate issued

- Erosion and Sediment Control and Construction Storm Water

- NPDES Storm Water
  - Nothing to Report at this time

Asheville Steam Electric Plant

- Dam Safety
  - 08/27/18 – Received revised submittal for installing a reverse graded filter and the exploration of an abandoned 66” CMP near toe of dam for BUNCO-088 (Lake Julian Dam) Scope 4 Addendum 1
    - 08/30/18 – Certificate of Approval to Repair issued
    - 09/24/19 – As-Built submittal received
    - 10/09/19 – As-Built inspection performed
    - 10/11/19 – Certificate of Final Approval to Repair issued
  - 08/29/18 – Received revised submittal for installing an 8” toe drain system to connect to the 10” outlet for BUNCO-088 (Lake Julian Dam) Scope 5
    - 08/30/19 – Certificate of Approval to Repair issued
- 05/21/19 – Duke and DEQ meet to discuss revisions to the As-Built submittal for this project
- 09/24/19 – As-Built submittal received
- 10/09/19 – As-Built inspection performed
- 10/14/19 – Certificate of Final Approval to Repair issued
  - 08/13/19 – Received revised submittal for repairing the existing concrete ditch and replacing the concrete end section adjacent to the spillway for BUNCO-088 (Lake Julian) Scope 7 Addendum 1
    - 08/20/19 – Certificate of Approval to Repair issued
- Erosion and Sediment Control and Construction Storm Water
  - Nothing to Report at this time
- NPDES Storm Water
  - Nothing to Report at this time

**Belews Creek Steam Station**

- Dam Safety
  - STOKE-115
    - 11/07/2019 - Periodic inspection performed.
  - STOKE-117
    - 10/03/2019 – Additional information for EOR Report for Vegetation Removal, Scope 3 submitted.
    - 11/07/2019 - As-built inspection for Vegetation Removal, Scope 3 performed with regional comments given.
  - STOKE-118
    - 10/07/2019 – Request for Final Approval of instrumentation installation, piezometers submitted.
    - 11/07/2019 – As-built inspection for piezometer installation performed with regional comments given.
    - 11/13/2019 – Certificate of Final Approval for piezometer installation issued.
  - STOKE-122
    - 11/07/2019 - Periodic inspection performed.
  - STOKE-123
    - 11/07/2019 - Periodic inspection performed.
  - 07/31/19 – Received submittal to increase the dewatering rate of water within the basin from 1 foot per week to 1 foot per day for STOKE-116 (Belews Creek Active Ash Basin Dam)
    - 08/20/19 – Certificate of Approval to Increase Dewatering Rate issued
  - 09/27/17 – Received revised submittal to remove vegetation for STOKE-117 (Belews Creek Saddle Dike #1 Dam) Scope 3
    - 11/30/17 – Certificate of Approval to Repair issued
- 12/20/18 – As-Built submittal received
- 02/19/19 – As-Built inspection performed
- 03/26/19 – Revision Request issued
- 05/24/19 – Response to Revision Request received
- 10/03/19 – As-Built submittal received
  - 07/11/19 – Received submittal for the installation of three piezometers for STOKE-118 (Belews Creek Saddle Dike #2 Dam)
    - 07/22/19 – Certificate of Approval to Install Instrumentation issued
    - 10/07/19 – As-Built submittal received
- Erosion and Sediment Control and Construction Storm Water
  - STOKE-2016-007 – inspection 11/07/2019 – compliant
- NPDES Storm Water
  - Nothing to Report at this time

**Buck Combined Cycle Station**
- Dam Safety
  - 10/11/18 – Received submittal to install a water treatment system pad to support dewatering for ROWAN-071 (Buck Ash Basin Divider Dam) Scope 2
    - 10/30/18 – Certificate of Approval to Repair issued
    - 09/23/19 – As-Built submittal received
    - 09/25/19 – As-Built inspection performed
    - 09/26/19 – Certificate of Final Approval to Repair issued
  - 10/17/19 – Received submittal for the installation of 4 piezometers and 1 inclinometer for ROWAN-071 (Buck Ash Basin Divider Dam)
    - ROWAN-047
      - 09/25/2019 – Annual inspection performed.
    - ROWAN-068
      - 09/25/2019 – Annual inspection performed.
    - ROWAN-069
      - 09/25/2019 – Annual inspection performed.
    - ROWAN-070
      - 09/25/2019 – Annual inspection performed.
    - ROWAN-071
      - 09/25/2019 – Annual inspection performed. As-built inspection performed for the Installation of a Water Treatment System Pad & Infrastructure, Scope 2.
      - 09/26/2019 – Certificate of Final Approval issued for the Installation of a Water Treatment System Pad & Infrastructure.
      - 10/16/2019 – Request for approval to install instrumentation received.
      - 11/08/2019 – Regional comments for request for approval to install instrumentation submitted.
- Erosion and Sediment Control and Construction Storm Water
- NPDES Storm Water
  - Nothing to Report at this time

**Cape Fear Steam Electric Plant**
- Dam Safety
  - 05/07/19 – Received response to an NOD issued 03/19/19 for vegetation to be removed from CHATH-075 (Cape Fear 1956 Ash Basin Dam) Scope 3, CHATH-076 (Cape Fear 1963 Ash Basin Dam) Scope 2, and CHATH-077 (Cape Fear 1970 Ash Basin Dam) Scope 2
    - 10/14/19 – Received request for a one-year extension to remove vegetation from dams
  - 08/16/19 – Received request for withdrawal to construct a truck access ramp on the crest of dam for CHATH-075 (Cape Fear 1956 Ash Basin Dam) Scope 4
    - 08/20/19 – Acceptance of Withdrawal Request issued
  - 07/25/19 – Received submittal for slope repair to restore to design grades for CHATH-075 (Cape Fear 1956 Ash Basin Dam) Scope 5
    - 10/21/19 – Certificate of Approval to Repair issued
  - 10/29/19 – Received submittal for the installation of an auxiliary overflow spillway for CHATH-075 (Cape Fear 1956 Ash Basin Dam) Scope 6
  - 10/03/19 – Received revised submittal for the construction of an unpaved haul road for CHATH-079 (Cape Fear 1985 Ash Basin Dam) Scope 8
    - 10/16/19 – Certificate of Approval to Repair issued
- Erosion and Sediment Control and Construction Storm Water
  - Nothing to Report at this time
- NPDES Storm Water
  - Nothing to Report at this time

**Dan River Combined Cycle Station**
- Dam Safety
  - ROCKI-237
    - 10/17/2019 – As-built inspection for Stormwater Conveyance System Abandonment, Scope 11 performed.
    - 10/18/2019 – Certificate of Final approval for Stormwater Conveyance System Abandonment, Scope 11 given.
  - 11/17/17 – Received submittal for the abandonment of a Stormwater Conveyance system for ROCKI-237 (Dan River Active Primary Ash Basin Dam) Scope 11
    - 02/14/18 – Certificate of Approval to Repair issued
    - 09/12/19 – As-Built submittal received
    - 10/17/19 – As-Built inspection performed
    - 10/18/19 – Certificate of Final Approval to Repair issued

  o Nothing to Report at this time

**H.F. Lee Energy Complex**

• Dam Safety
  o 08/16/19 – Received revised submittal for the repair of a seep on the downstream
toe of dam for WAYNE-009 (HF Lee Cooling Lake Dam) Scope 6
    ▪ 09/11/19 – Certificate of Approval to Repair issued
  o 10/10/19 – Received request for extension for the removal of vegetation for
WAYNE-022 (HF Lee Active Ash Basin Dam) Scope 3 Addendum 2
    ▪ 10/24/19 – Extension to Certificate of Approval to Repair issued
  o 10/03/19 – Received revised submittal for the removal of two pipes and
improvement of the haul road in anticipation of beneficial reuse activities for
WAYNE-022 (HF Lee Active Ash Basin Dam) Scope 5
  o 08/21/19 – Jurisdictional Determination issued for WAYNE-031 (HF Lee
Inactive Ash Basin #1 Dam), WAYNE-032 (HF Lee Inactive Ash Basin #2 Dam),
and WAYNE-033 (HF Lee Inactive Ash Basin #3 Dam) designating them as high
hazard from previous low hazard exempt status
  o 09/19/19 – As-Built submittal received for the decommissioning of WAYNE-034
(HF Lee Triangular Pond Dam), a formerly low hazard exempt dam
  o 09/10/2019 – WAYNE-022 Active Ash Pond Annual Inspection.
  o 11/1/2019 WAYNE-022 NOI
  o 09/10/2019 – WAYNE-009 Cooling Pond Annual Inspection.
  o 09/11 2019 Approval to Repair issued for WAYNE-009 Cooling Pond – Scope 6 –
repair a seep;
  o 09/30/2019 NOD for WAYNE-009 issued – seep on SE portion of the dike;
  o 10/10/2019 WAYNE-022 Scope 3 addendum 2 extension 3 request for extension
of the approval to repair issued on September 9, 2015 – tree root ball removal
extend to October 24, 2020;
  o 10/24/2019 WAYNE-022 Scope 3 addendum2 extension 3 - approved
  o 10/24/2019 revised NOD issued for WAYNE-009 – seep on SE portion of the dike;
  o 09/10/2019 WAYNE-031, 032 and 033 Inactive ash ponds - annual inspection;
  o 09/30/2019 NOD’s for WAYNE-031,032,033 issued for large trees on the dikes;
  o 10/14/19 –WAYNE-022 Scope 5 - Revised submittal Haul Road Improvements –
removal of 2 pipes COAR request.
  o 10/31/2019 WAYNE-022 Scope 5 - Haul Rd improvement and 2 pipes removal -
Approved
• Erosion and Sediment Control and Construction Storm Water
  o application for WAYNE-2020-003 “HF Lee Haul Road” received September 3,
2019, approved September 27, 2019;
revision to WAYNE-2019-016 “HF Lee Bridge Improvements” received October 2, 2019, approved October 16, 2019;

    - 05/24/19 – Received change of EOR request
    - 05/28/19 – Change of EOR approval issued
    - 08/28/19 – As-Built submittal received
    - 10/22/19 – As-Built inspection performed
    - 10/24/19 – Certificate of Final Approval to Modify issued
  - 01/10/17 – Received submittal for installation of six CAMA groundwater monitoring wells for ROBES-004 (Weatherspoon Cooling Lake Dam)
    - 01/12/17 – Certificate of Approval to Install Instrumentation issued
    - 06/13/19 – As-Built submittal received
    - 10/22/19 – As-Built inspection performed
    - 10/23/19 – Certificate of Final Approval to Install Instrumentation issued
  - 08/09/18 – Received submittal for removal of a 12” sluice line for ROBES-009 Scope 8
    - 10/29/18 – Revision Request issued
    - 01/23/19 – Received response to Revision Request
    - 03/04/19 – Certificate of Approval to Repair issued
    - 06/26/19 – As-Built submittal received
    - 10/22/19 – As-Built inspection performed
  - 10/23/19 – Certificate of Final Approval to Repair issued

- Erosion and Sediment Control and Construction Storm Water
