Part III. Special Waste Collections

Please provide responses and data as indicated below considering services provided to the public. Please do not include data on materials that were accepted and then disposed of in a landfill. Do not include materials generated exclusively by government operations (e.g. motor-fleet services). Question 46 is about materials accepted outside of any Household Hazardous Waste (HHW) Program or event. If special wastes were only accepted as a part of an HHW Program or HHW event and were not collected by separate recycling efforts then do not record materials in question # 46 but instead report with HHW materials in question # 47.

YARD WASTE MANAGEMENT FORMULA: If yard waste quantities are not tracked, you may use this formula below to help you estimate yard waste volume. Calculate for each truck used in your yard waste management program, and then enter the grand total volume managed by program in the appropriate boxes above. Ex. 10 cubic yard truck x 3 days/wk x 16 wks = 480 cubic yards

\[ \text{Size of Truck (in yards)} \times \text{Avg. no. of times truck fills each week} \times \text{# of weeks truck is used during year} = \text{TOTAL cubic yards} \]

Part IX. Comments

Use this section to elaborate on any info provided in your report as necessary. We would appreciate your comments about this report or other matters regarding solid waste management in North Carolina. Thank you for your time. You may submit additional sheets if needed.

SS notes: Moved Public Beach commingle from Other 1 to Comingle-Other

Special Event/Festival Recycling - When applicants apply for a Special Use Permit, as a condition of approval of the permit, we insist that the applicant provide recycling containers as well as trash containers at the special event.

Beach Clean Up Activities - The county maintains two 30-yard open top containers for beach clean up activities. One container is for trash, the other is to deposit recyclable material that has been collected from the beaches under beach clean up activities.

Contract cost for scrap tire disposal is by the haul, rates vary from points of origin. $ 538 - $ 608 per haul depending on origin.

Our Emergency Operations Plan states: “Agriculture is represented by the Cooperative Extension Service Director and is responsible for all issues concerning agriculture including assessing crop, livestock and their product damages that may result from the loss suffered in a disaster. This person will keep the EOC advised regarding agriculture losses or the potential of such losses. This person is also responsible for the coordination of the removal of dead farm animals and/or the decontamination of such animals.”

Currently Currituck has no commercial livestock operations so the likelihood of needing a response in this manner is very small. Our largest potential for loss would be equine, but they are not concentrated to a single area and there are evacuation centers around the state for equine.

NCDA Pesticide - US Ag Recycling has not submitted their report at this time.
