YARD WASTE MANAGEMENT FORMULA: If yard waste quantities are not tracked, you may use this formula below to help you estimate yard waste volume. Calculate for each truck used in your yard waste management program, and then enter the grand total volume managed by program in the appropriate boxes above. Ex. 10 cubic yard truck x 3 days/wk x 16 wks = 480 cubic yards

\[
\text{Size of Truck (in yards)} \times \text{Avg. no. of times truck fills each week} \times \text{# of weeks truck is used during year} = \text{Total cubic yards}
\]

Part IX. Comments

Use this section to elaborate on any info provided in your report as necessary. We would appreciate your comments about this report or other matters regarding solid waste management in North Carolina. Thank you for your time. You may submit additional sheets if needed.

The only item we take on drop off recycling is cardboard.

Please note that total contract amount for Solid Waste and Recycling is included in collection cost; our contract does not break out a separate tipping fee.

The only disposal cost we have is for bulk item which the Village of Clemmons collects and Waste Management disposes out. The Waste Manage rate includes a haul fee.

65: The budget amount only includes contracted solid waste and recycling services. Salaries for Village Employees is not budgeted separately for leaf and limb and bulk item. Salaries are included in cost amounts.

# Households for Yard Waste: Please note in the past used average of stops. This year I used the most stops we had in the annual period, which was for leaf collection. This would be the maximum households that used the service.
