YARD WASTE MANAGEMENT FORMULA: If yard waste quantities are not tracked, you may use this formula below to help you estimate yard waste volume. Calculate for each truck used in your yard waste management program, and then enter the grand total volume managed by program in the appropriate boxes above. Ex. 10 cubic yard truck x 3 days/wk x 16 wks = 480 cubic yards

\[
\text{Size of Truck (in yards)} \times \text{Avg. no. of times truck fills each week} \times \text{# of weeks truck is used during year} = \text{TOTAL cubic yards}

DH comments from FY2018-19:
Question # 65- Reporting of MSW and FCA not done by this town: They have not reported tons nor any budget or cost information for MSW or for recycling services. They appear not to be tracking it, They told me there is no separate budget for any of this. (email from town on 8/20/2019 -DH).

Comment: Town of Falcon has about 273 people as its population from the 2016 updated census. The town informed me that have one truck and one part time employee who takes on all this work once per week. Disposal taxes support maintenance of the truck they have- David Hance - November 2019.
