**Part III. Special Waste Collections**

Please provide responses and data as indicated below considering services provided to the public. Please do not include data on materials that were accepted and then disposed of in a landfill. Do not include materials generated exclusively by government operations (e.g. motor-fleet services). Question 47 is about materials accepted outside of any Household Hazardous Waste (HHW) Program or event. If special wastes were only accepted as a part of an HHW Program or HHW event and were not collected by separate recycling efforts then do not record materials in question #47 but instead report with HHW materials in question #48.

Special wastes are materials collected at convenience centers, transfer stations, landfills, etc. Do not include materials collected at household hazardous waste permanent collection facilities or household hazardous waste temporary collection events.

YARD WASTE MANAGEMENT FORMULA: If yard waste quantities are not tracked, you may use this formula below to help you estimate yard waste volume. Calculate for each truck used in your yard waste management program, and then enter the grand total volume managed by program in the appropriate boxes above. Ex. 10 cubic yard truck x 3 days/wk x 16 wks = 480 cubic yards

\[
\text{Size of Truck (in yards)} \times \text{Avg. no. of times truck fills each week} \times \# \text{ of weeks truck is used during year} = \text{TOTAL cubic yards}
\]

Part X. Comments

Use this section to elaborate on any info provided in your report as necessary. Have there been major changes to your recycling or solid waste program since last year? Has your program been affected by COVID-19? Do you have new or updated ordinances that affect your programs? You may submit additional sheets if needed.

The report financial analysis includes costs and revenues from four divisions of the solid waste management department: Landfill, Recycling, Sanitation and Environmental Support. The costs of the Environmental Support Division include all administrative costs, overhead, maintenance shop, environmental enforcement, education and outreach. Those Environmental Support costs are apportioned as overhead among the three functional divisions of Landfill, Recycling and Sanitation according to each of those division's respective share of the annual budget. Thus if recycling programs are 50% of the Departmental budget (without Environmental Support), then 50% of the budget of Environmental Support is ascribed to the Recycling Division and those costs are shown in Q64 table as part of the 'total cost'. That same 'total cost' column is now net of revenue to each division. The revenues from sales of materials e.g. mulch or cardboard or scrap metal as examples are subtracted from costs for the first time. As an example if the Recycling Division received revenue from cardboard and cooking oil sold, those revenues are subtracted from the total cost of operating that Division.

Some costs and revenues are not exactly aligned; the costs of the scrap metal collection and management programs are included in the Landfill and Sanitation budgets (e.g. freon removal in Landfill or hauling scrap metal to the landfill in Sanitation budget) , but tonnage managed is included in recycling totals, per that State formula used in Q44. Further, while Orange County collected and managed 279 tons of hazardous wastes and special wastes, the costs of County-provided labor for those programs are included in overall recycling program costs as it's impossible to separate out the time for those services from other in-house labor, the tonnage is not included when calculating cost per ton for recycling. Only contract costs for those programs were excluded.
