Calculate for each truck used in your yard waste management program, and then enter the grand total volume managed by program in the appropriate boxes above. Ex. 10 cubic yard truck x 3 days/wk x 16 wks = 480 cubic yards

\[
\text{Size of Truck (in yards)} \times \text{Avg. no. of times truck fills each week} \times \# \text{ of weeks truck is used during year} = \text{TOTAL cubic yards}

Part X. Comments

Use this section to elaborate on any info provided in your report as necessary. Have there been major changes to your recycling or solid waste program since last year? Has your program been affected by COVID-19? Do you have new or updated ordinances that affect your programs? You may submit additional sheets if needed.

Editor notes (SS): C&D only 548 tons this year. Last year was 4,164. Confirmed with John Demary: the decrease is due to "the fines materials (dirt and small items 4 inches and smaller). FY 18-19 we did a better job of screening material. FY 19-20 we didn’t screen and got behind and had to haul material to landfill which could not use as a daily cover."

CA: fixed number of oil filter barrels, email with J. Demary 1/25
