This change does not violate any existing requirement in the current Title V air quality permit.

This change does not result in any significant change in existing monitoring, reporting or recordkeeping provisions in my current permit.

This change does not require a case-by-case determination (e.g. BACT).

This change is not a modification under Title I of the federal Clean Air Act.

This change is not a significant modification. (See 15A NCAC 2Q .0516)

This change does not require a change to an existing permit term that was taken to avoid an applicable requirement. (e.g. PSD avoidance condition)

This change does not require a permit under the NC Toxics program.

This change is not a modification under Title I of the federal Clean Air Act.

This change does not require a case-by-case determination (e.g. BACT).

This change does not violate any existing requirement in the current Title V air quality permit.

Upon receipt of the completeness determination letter, you may make the modification in accordance with 15A NCAC 2Q .0515(f). A determination of application completeness by the DAQ is not a determination that each change qualifies as a minor permit modification. It is the responsibility of the applicant to ensure each proposed change meets the criteria of 15A NCAC 2Q .0515. The applicant assumes all financial risks associated with construction and operation without a permit revision. You shall comply with both the applicable requirements governing the change and the proposed permit conditions until final action is taken on the permit application. You need not comply with the existing permit terms and conditions you seek to modify. However, if you fail to comply with the proposed monitoring, the Director may enforce the terms and conditions of the existing permit that you seek to modify. You must certify compliance with the proposed permit terms on the annual compliance certification. The permit shield in 15A NCAC 2Q .0512(a) does not extend to this modification.
