

# Nature-Based Solutions for Coastal Hazards 101 - Virtual Training

**Part 1:** 1-hour online, self-guided module

**Part 2:** 2-hour training webinar on January 11 at 2:00pm

## Session Objectives:

- Describe how green or natural infrastructure contributes to reducing the impacts of hazards and building resilience.
- Identify green or natural infrastructure projects and connect with experts and colleagues who can provide additional information and guidance.
- Learn about future opportunities to expand knowledge around green or natural infrastructure implementation.

## Part 1: On Your Own - The Basics

Participants work through the [Part 1 online, self-guided module](#) resulting in the beginnings of a personal green infrastructure plan.

## Part 2: Training Webinar - Unique URL sent in registration confirmation email

**2:00 pm EST** Welcome, Webinar Objectives, Agenda

**2:10** Review and Discussion of Part 1 Personal Green Infrastructure Plans

- Coastal hazards of concern and location
- Ecosystem services
- Green Infrastructure Practices

**2:25** Keys to Success

**2:30** Town of Nags Head's Estuarine Shoreline Management Plan  
Holly White, Town of Nags Head

**2:50** Implementation of the Town of Swansboro's Watershed Restoration Plan  
Lauren Kolodij, North Carolina Coastal Federation

**3:10** Panel Interview

**3:40** Resources and Future Learning Opportunities

**4:00** Evaluation and Wrap-Up
