Important Webex Event Instructions

1. **Test your link prior to the Event.** Please select and test the link provided in your calendar invite a few days prior to the Webex Event. For example, the login may require a software download or installation on your computer in advance. This will allow sufficient time to contact us to address any connection issues.
2. **Please log in to the Event early.** Create an appointment reminder to provide an alarm 5-10 minutes before the scheduled start time. Click on the link you received in your calendar invite to join the meeting. If you are using your computer speakers and microphone, **DO NOT** use the call-in number – that causes echoes.
3. Follow the instructions from Cisco Webex to test your microphone and speakers; there are usually options listed for input/output, so you can adjust to an alternate choice if the first option doesn't work.
4. **Mute! Mute! Mute! Please mute your phone and/or computer's microphone.** Everyone joins the Event muted; kindly **keep your phone muted whenever you are not speaking.** This helps to avoid undesirable background sounds or conversations that can distract other participants and disrupt the Event. Also, if you are using your telephone, **do not push the "hold" button.** That often plays music or a recorded message that everyone else can hear.
5. **Please be an active participant.** If you wish to speak, kindly use the "raise your hand" button at the bottom right of your screen; that will alert the Chairman, who will call on you to speak. At that point, unmute yourself and speak, then kindly mute your microphone.
6. **Please be respectful.** Webex Events allow publicly-visible Q&A, and verbal contributions. Please provide candid, relevant, professional, and helpful feedback that are considerate of the Webex Event host and other participants.

Webex Audio & Video Functions:

1. Participants (you) may enlarge your screen view by clicking on the heading titled **View** then scroll down and select **Full Screen**.
 - a. **Important Note:** Cisco Webex software allows participants who have accessed the Event via the "Call Using Computer" option **and** have speakers to hear the presenter, videos played and view presentations (e.g. PowerPoint).
 - b. **Second Important Note:** Per Cisco Webex, participants who have accessed the webinar via the computer **and** have called into the **Webex** toll-free number via the "Call Me" or "I Will Call In" options will not be able to hear any videos played; however, will be able to hear the presenter and view presentations.

- Participants who have a headphone with a microphone, or who call in via the Webex number may verbally ask questions during the Q&A period. Participants who do not have a headphone with a microphone or who do not call into the Webex telephone number may submit questions through the Webex Chat option.

Please see below for an example of a Webex screen shot for your reference.

The screenshot shows the Cisco Webex interface for an event titled "Event Information: CAPCA EPA/State practice session". The event status is "Not started". The date and time is "Tuesday, April 6, 2021 3:30 pm Eastern Daylight Time (New York, GMT-04:00)". The duration is "45 minutes". There is a "Join Event Now" button, but a message states "You cannot join the event now because it has not started." Below this are input fields for "First name:", "Last name:", "Email address:", and "Event password:". There is also a "Join Now" button and a link to "Join by browser NEW!". At the bottom, it says "If you are the host, start your event." The left sidebar contains navigation options like "Request Host Account", "Attend an Event", "List of Events", "Unlisted Events", "Search", "Host an Event", "Manage Programs", "Set Up", "Webex Events", "Preferences", and "Support". The top right shows "Modern View" and a user profile icon.
