SECTION .2300 - GENERAL PERMIT FOR REPLACEMENT OF EXISTING BRIDGES AND CULVERTS IN ESTUARINE WATERS, ESTUARINE AND PUBLIC TRUST SHORELINES, PUBLIC TRUST AREAS, AND COASTAL WETLANDS

15A NCAC 07H .2301 PURPOSE
A general permit for replacement of existing bridges and culverts in estuarine waters, estuarine and public trust shorelines, public trust areas, and coastal wetlands shall be obtained pursuant to the rules in 15A NCAC 7J .1100 and this Section to replace existing bridges and culverts in estuarine water, estuarine and public trust shorelines, public trust areas and coastal wetland AECs.

History Note: Authority G.S. 113A-107; 113A-118.1; 113A-124;
Eff. June 1, 1996;

15A NCAC 07H .2302 APPROVAL PROCEDURES
(a) The applicant shall contact the Division of Coastal Management (Division) and provide:
   (1) information on site location, project description, and his or her name, address and telephone number;
   (2) a dated plat(s) showing existing and proposed development; and
   (3) confirmation that:
      (A) a written statement has been obtained and signed by the adjacent riparian property owners indicating that they have no objections to the proposed work; or
      (B) the adjacent riparian property owners have been notified by certified mail of the proposed work. Such notice shall instruct adjacent property owners to provide any comments on the proposed development in writing for consideration by permitting officials to the Division of Coastal Management within 10 days of receipt of the notice and indicate that no response shall be interpreted as no objection. Division staff shall review all comments. If the Division determines that:
         (i) the comments are relevant to the potential impacts of the proposed project; and
         (ii) the permitting issues raised by the comments require a more detailed review, then the Division shall notify the applicant that he or she shall be required to submit an application for a major development permit.

(b) Approval of individual projects shall be acknowledged in writing by the Division of Coastal Management and the applicant shall be provided a copy of this Section. Construction authorized by this permit shall be completed within two years of permit issuance or the general authorization shall expire and a new permit shall be required to begin or continue construction. For North Carolina Department of Transportation projects identified in the Transportation Improvement Program this permit shall not expire pursuant to G.S. 136-44.7B.

(c) No work shall begin until an onsite meeting is held with the applicant and a Division of Coastal Management representative. Written authorization to proceed with the proposed development shall be issued during this visit if the Division representative finds that the application meets all the requirements of this Subchapter.

History Note: Authority G.S. 113A-107; 113A-118.1; 113A-124;
Eff. June 1, 1996;
Amended Eff. May 1, 2010.

15A NCAC 07H .2303 PERMIT FEE
The applicant shall pay a permit fee of four hundred dollars ($400.00). This fee shall be paid by inter-departmental fund transfer, check or money order made payable to the Department of Environment and Natural Resources.

History Note: Authority G.S. 113A-107; 113A-118.1; 113A-119; 113A-119.1; 113A-124;
Eff. June 1, 1996;
Amended Eff. May 1, 2010; September 1, 2006; August 1, 2000.

15A NCAC 07H .2304 GENERAL CONDITIONS
(a) Projects authorized by this permit shall be demolition, removal, and replacement of existing bridges and culverts along the existing alignment and conforming to the standards in this Rule. This permit shall be applicable only to single
bridge and culvert projects and shall not authorize temporary fill causeways or temporary bridges that may be associated with bridge replacement projects.

(b) The permittee shall allow authorized representatives of the Department of Environment and Natural Resources (Department) to make periodic inspections at any time deemed necessary in order to ensure that the activity being performed under authority of this general permit is in accordance with the terms and conditions prescribed in this Rule.

(c) This general permit shall not be applicable to proposed construction where the Department determines that authorization may be warranted, but that the proposed activity might significantly affect the quality of human environment or unnecessarily endanger adjoining properties.

(d) This general permit shall not be applicable to proposed construction where the Department determines that the proposed activity would have significant adverse impacts on water quality or historic, cultural, scenic, fisheries, or recreational resources.

(e) This permit shall not eliminate the need to obtain any other required state, local, or federal authorization.

(f) Development carried out under this permit shall be consistent with all local requirements, AEC rules, and local land use plans.

(g) This permit shall not apply to projects that require work channels.

(h) Review of individual project requests shall be coordinated with the Division of Marine Fisheries (DMF) and the Wildlife Resources Commission (WRC). This may result in a construction moratorium during periods of significant biological productivity or critical life stages as determined by the WRC and DMF.

(i) Development under this permit shall be carried out within Department of Transportation (DOT) right-of-ways or on lands under the ownership of the applicant in the case of a non-DOT project.

(j) Bridge and culvert replacements shall be designed to minimize any adverse impacts to potential navigation or use of the waters by the public.

(k) This permit shall apply only to projects involving replacement of bridges and culverts currently serving their intended function.

History Note: Authority G.S. 113A-107; 113A-118.1; 113A-124;
Eff. June 1, 1996;
Amended Eff. May 1, 2010.

15A NCAC 07H .2305 SPECIFIC CONDITIONS

(a) This general permit is applicable to bridge replacement projects spanning no more than 400 feet of estuarine water, public trust area, and coastal wetland AECs.

(b) Existing roadway deck width shall not be expanded to create additional lanes, with the exception that an existing one lane bridge may be expanded to two lanes where the Department of Environment and Natural Resources determines that authorization is warranted and the proposed project does not significantly affect the quality of the human and natural environment or unnecessarily endangers adjoining properties.

(c) Replacement of existing bridges with new bridges shall not reduce vertical or horizontal navigational clearances.

(d) All demolition debris shall be disposed of landward of all wetlands and the normal water level (NWL) or normal high water (NHW) level (as defined in 15A NCAC 07H .0106), and shall employ soil stabilization measures to prevent entry of sediments in the adjacent water bodies or wetlands.

(e) Bridges and culverts shall be designed to allow passage of anticipated high water flows.

(f) Measures sufficient to restrain sedimentation and erosion shall be implemented at each site.

(g) Bridge or culvert replacement activities involving excavation or fill in wetlands, public trust areas, and estuarine waters shall meet the following conditions:

(1) Replacing bridges with culverts shall not be allowed in primary nursery areas as defined by the Marine Fisheries or Wildlife Resources Commissions.

(2) The total area of public trust area, estuarine waters, and wetlands to be excavated or filled shall not exceed 2,500 square feet except that the coastal wetland component shall not exceed 750 square feet.

(3) Culverts shall not be used to replace bridges with open water spans greater than 50 feet.

(4) There shall be no temporary placement or double handling of excavated or fill materials within waters or vegetated wetlands.

(5) No excavated or fill material shall be placed in any wetlands or surrounding waters outside of the alignment of the fill area indicated on the work plat(s).

(6) All excavated materials shall be confined above NWL or NHW and landward of any wetlands behind dikes or other retaining structures to prevent spill-over of solids into any wetlands or surrounding waters.
(7) No bridges with a clearance of four feet or greater above the NWL or NHW shall be allowed to be replaced with culvert(s) unless the culvert design maintains the existing water depth, vertical clearance and horizontal clearance.

(8) If a bridge is being replaced by a culvert(s) then the width of the waterbody shall not be decreased by more than 40 percent.

(9) All pipe and culvert inverts placed within the Public Trust or the Estuarine Waters AECs shall be buried at least one foot below normal bed elevation to allow for passage of water and aquatic life. Culverts placed in wetlands are not subject to this requirement.
