

Post-Construction Stormwater Program Permit Initiative

HBCU DEQ INTERNSHIP 2023

Wilmington, NC
DEQ Division of Energy,
Mineral, and Land Resources

PROJECT DESCRIPTION / OBJECTIVE

The Division of Energy, Mineral, and Land Resources (DEMLR) Post-Construction Stormwater Program protects North Carolina's surface water from water quality impacts due to stormwater runoff. New developments in subject areas of the state are required to install and maintain permanent stormwater management measures after the project is built. This office has a number of permits spanning over three decades with incorrect data that need to be updated.

MAJOR TASKS TO BE PERFORMED

- Conduct reviews of permits
- Research the history of the construction site
- Update the database/GPS coordinates of the site
- Potentially renew permits

FINAL PRODUCT OR OUTCOME ANTICIPATED

- Improve associated data associated with permits, including mapping resources.

QUALIFIED CANDIDATE MUST POSSESS

- Ability to work in the Microsoft Suite (Word, Excel).
- Ability to learn to navigate the database and digital document repository.
- Ability to stay organized and prioritize work.
