Cater to the commercial fishing people, again. They already have more fishing rights than people like myself that fish for enjoyment. A permit for this a permit for that. You limit what we can catch and how we can catch them but the commercial people take all they want with any means they want. I used to enjoy flounder giging but now we can't do that with commercial license. But you'll spend my tax dollars on beach renourishment and other things. If you lived in the state you used to could salt water fish with no license but now the commercial people got that changed. I'm sick of this crap! Thanks for nothing...

I absolutely object to this proposal. Natural resources in North Carolina belong to the citizens of North Carolina; and should not be "divved out" to certain people who can afford to pay for leases. Some people actually depend on shellfish as part of their means to feed their families. Since when is the State in such dire needs that it is even considering such action?
