(b) The applicant shall provide:

- (1) confirmation that a written statement, signed by the adjacent riparian property owners, stating that they have no objections to the proposed work, has been obtained; or
- (2) confirmation that the adjacent riparian property owners have been notified by certified mail of the proposed work. Such notice shall instruct adjacent property owners to provide any comments on the proposed development in writing for consideration by permitting officials to the DCM within 10 days of receipt of the notice, and state that no response shall be interpreted as no objection. DCM staff shall review all comments and determine, based upon their relevance to the potential impacts of the proposed project, if the proposed project can be approved by a General Permit. If DCM staff determines that the project exceeds the Rules established for the General Permit process, DCM shall notify the applicant that an application for a major permit shall be required.

(c) No work shall begin until an on-site meeting is held with the applicant and DCM representative. All bulldozing shall be completed within 30 days of the date of permit issuance.

15A NCAC 07H .1805 SPECIFIC CONDITIONS

- (a) The area where this activity is being performed shall maintain a slope that follows the pre-emergency slopes as closely as possible so as not to endanger the public or the public's use of the beach. The movement of material by a bulldozer, front-end loader, backhoe, scraper, or any type of earth moving or construction equipment shall not exceed one foot in depth measured from the pre-activity surface elevation.
- (b) The activity shall not exceed the lateral bounds of the applicant's property without the written permission of the adjoining landowner(s).
- (c) The permit shall not authorize movement of material from seaward of the mean low water line.
- (d) The activity shall not increase erosion on neighboring properties.
- (e) Adding sand to dunes shall be accomplished in such a manner that the damage to existing vegetation is minimized. Upon completion of the project, the fill areas shall be replanted with native vegetation, such as Sea Oats (*Uniola paniculata*), or if outside the planting season, shall be stabilized with sand fencing until planting can occur.
- (f) In order to minimize adverse impacts to nesting sea turtles, no bulldozing shall occur within the period of April 1 through November 15 of any year without the prior approval of the Division of Coastal Management, in coordination with the North Carolina Wildlife Resources Commission, the United States Fish and Wildlife Service, and the United States Army Corps of Engineers, that the work can be accomplished without significant adverse impact to sea turtle nests or suitable nesting habitat.
- (g) If one contiguous acre or more of oceanfront property is to be excavated or filled, an erosion and sedimentation control plan shall be filed with the Division of Energy, Mineral, and Land Resources, or appropriate local government having jurisdiction.
