

Cape Fear and Neuse water users,

As part of the Jordan Lake Water Supply Allocation the Division of Water Resources is updating both the Cape Fear and Neuse models. As part of the update the Cape Fear and Neuse Hydrologic models are being combined into a single model. We will be holding a meeting the end of July to review the status of the new combined river basins model. Meeting details are:

**Combined Cape Fear – Neuse Hydrologic Model**  
**Jordan Lake Water Supply Storage Allocation**  
**Monday July 23, 2012**

Location – Ground Floor Hearing Room, Archdale Building  
512 N. Salisbury Street  
Raleigh, NC 27604

Web Conferencing

To join the meeting: <https://denr.ncgovconnect.com/modeling/>  
Conference Call Phone Number – 919-501-4273

**Agenda** – Will sent out a week before the meeting
