9. Is there any type of treatment being provided to the wastewater before discharge (i.e., retention ponds, settling ponds, etc.)?

No

Yes – Please include design specifics (i.e., design volume, retention time, surface area, etc.) with submittal package. Existing treatment facilities should be described in detail. Design criteria and operational data (including calculations) should be provided to ensure that the facility can comply with the requirements of the [General Permit](#), as required by [15A NCAC 02H .0127](#). The treatment shall be sufficient to meet the limits set by the general permits.

Note: *Construction of any wastewater treatment facilities requires submission of three (3) sets of plans and specifications along with the application. Design of treatment facilities must comply with the requirements of [15A NCAC 02H .0138](#). If construction applies to this discharge, include the three sets of plans and specifications with this application.*

10. Discharge Frequency: [Required by [15A NCAC 02H .0105\(c\)\(1\)](#)]

- a) The discharge is: Continuous Intermittent Seasonal
- i. If the discharge is intermittent, describe when the discharge will occur: _____
- ii. If seasonal, check the month(s) the discharge occurs:
 Jan Feb Mar Apr May Jun Jul Aug Sept Oct Nov Dec
- b) How many days per week is there a discharge? _____
- c) Please check the days discharge occurs: Sat Sun Mon Tues Wed Thurs Fri

11. Pollutants: [Required by [15A NCAC 02H .0105\(c\)\(1\)](#)]

Please list any known pollutants that are present in the discharge, per each separate discharge point (*if applicable, use separate sheet*): _____

12. Receiving Waters: [Required by [15A NCAC 02H .0105\(c\)\(1\)](#)]

- a) What is the name of the body or bodies of water (*creek, stream, river, lake, etc.*) that the facility wastewater discharges end up in? If the site wastewater discharges to a separate storm sewer system (4S), name the operator of the 4S (*e.g. City of Raleigh*). _____
- b) Stream Classification: _____

13. Alternatives to Direct Discharge:

[Evaluation required by [G.S. § 143-215.1 \(b\)\(5\)\(a\)](#) and [15A NCAC 02H .0105\(c\)\(2\)](#)]

Address the feasibility of implementing each of the following non-discharge alternatives:

- a) Connection to a Municipal or Regional Sewer Collection System
- b) Subsurface disposal (*including nitrification field, infiltration gallery, injection wells, etc.*)
- c) Spray irrigation

The alternatives to discharge analysis should include boring logs and/or other information indicating that a subsurface system is neither feasible nor practical as well as written confirmation indicating that connection to a [POTW](#) is not an option. It should also include a present value costs analysis as outlined in the Division's "[Engineering Alternatives Analysis \(EAA\) Guidance Document](#)."
