Part IX. Disaster Preparedness - COUNTIES and MUNICIPALITIES TEMPORARY DISASTER DEBRIS STAGING SITES Does your local government have a plan in place for management of disaster debris? If yes, indicate if the plan is a stand-alone plan or in conjunction with local government agencies: If you indicated having a plan, has the plan been reviewed by N.C. Emergency Management or FEMA to ensure it meets the basic requirements for public assistance reimbursement in a declared disaster event? Please list the name, contact numbers(s), and e-mail address of the person(s) in charge of the disaster debris management program for your local government: Name: Bruce Woody Name: Kristina Witosky Name: Phone: 919-918-4913 Phone: 919-918-4916 Phone: E-mail: bwoody@orangecountync.gov E-mail: kwitosky@orangecountync.gov E-mail: Please list the temporary disaster debris staging sites in your county or municipality which have been reviewed for conflicts with the Natural Heritage Program (NHP) and the State Historic Preservation Office (SHPO) through coordination with the Solid Waste Section. Please note that the vetting of a site prior to a disaster is advantageous to local governments because a staging site which is found to have impacted federal or state resources after a disaster may cause difficulty for local governments when attempting to obtain FEMA reimbursement. Attach extra sheets, if needed. Does your plan include coordination with NC DOT on clearing roads and waste in the right of way? XYes No Part X. Comments Use this section to elaborate on any info provided in your report as necessary. Have there been major changes to your recycling or solid waste program since last year? Has your program been affected by COVID-19? Do you have new or updated ordinances that affect your programs? You may submit additional sheets if needed. The report financial analysis includes costs and revenues from four divisions of the solid waste management department: Landfill, Recycling, Sanitation and Environmental Support. The costs of the Environmental Support Division include all administrative costs, overhead, maintenance shop, environmental enforcement, education and outreach. Those Environmental Support costs are apportioned as overhead among the three functional divisions of Landfill, Recycling and Sanitation according to each of those division's respective share of the annual budget. Thus if recycling programs are 50% of the Departmental budget (without Environmental Support), then 50% of the budget of Environmental Support is ascribed to the Recycling Division and those costs are shown in Q64 table as part of the 'total cost'. That same

'total cost' column is now net of revenue to each division. The revenues from sales of materials e.g. mulch or cardboard or scrap metal as examples are subtracted from costs for the first time. As an example if the Recycling Division received revenue from cardboard and cooking oil sold, those revenues are subtracted from the total cost of operating that Division.

Some costs and revenues are not exactly aligned; the costs of the scrap metal collection and management programs are included in the Landfill and Sanitation budgets (e.g. freon removal in Landfill or hauling scrap metal to the landfill in Sanitation budget), but tonnage managed is included in recycling totals, per that State formula used in Q44. Further, while Orange County collected and managed 279 tons of hazardous wastes and special wastes, the costs of County-provided labor for those programs are included in overall recycling program costs as it's impossible to separate out the time for those services from other in-house labor, the tonnage is not included when calculating cost per ton for recycling. Only contract costs for those programs were excluded.
