RE: Electronic Data Deliverable (EDD) Format Update

In a memo dated March 11, 2024, the North Carolina Department of Environmental Quality (NC DEQ), UST Section requested the submittal of environmental data in a standardized Electronic Data Deliverable (EDD) format to the Environmental Quality Information Systems (EQuIS) system to begin on October 1, 2024. Due to the large volume of incidents and the time required for the initial setup, only the State Lead contractors will begin initial registration and setup on October 1, 2024.

Upon completion of the initial registration, initial EDD upload and the resolution of any issues experienced by the state lead contractors, the remaining environmental service providers/consultants will be required to begin the initial registration and uploading process which we anticipate to be in the second quarter of 2025. Training sessions for initial registration and the uploading process will be announced soon.
