

Risk-Based Remediation
Pursuant to Part 8 of Article 9 of Chapter 130A of the General Statutes
Notice of Intent to Remediate

In addition to the public participation requirements of the applicable remediation program, the person who proposes to remediate a site according to Part 8 of Article 9 of Chapter 130A of the North Carolina General Statutes must notify all interested parties of the intent to remediate the site to site-specific clean up levels in lieu of state standards.

Instructions:

1. Complete the Notice of Intent to Remediate (NOIR) form on the following page.
2. Compile a mailing list which shall, at a minimum, include
 - all owners of contaminated property,
 - all owners of property to which the contamination is expected to migrate,
 - all owners of land adjoining contaminated parcels and parcels to which contaminants are expected to migrate, and
 - local governments having taxing or land-use jurisdiction over the property.

NOTICE OF INTENT TO REMEDIATE

Risk-Based Remediation

Pursuant to Part 8 of Article 9 of Chapter 130A of the General Statutes

Site Name: _____

Street Location: _____

City, County: _____, _____

Site ID Number: _____

Remediating Party: _____

This is a notice to the public of a request by the Remediating Party to pursue remediation of the environmental contamination at the above-identified site using site-specific cleanup standards and institutional controls to mitigate unacceptable risk to human health and the environment. Contaminated media at the site may include groundwater, soils, sediment and surface water. The Remediating Party intends to prepare a remedial action plan in accordance with N.C.G.S. 130A-310.65 through 310.77 which allows use of site-specific cleanup levels that are expected to pose no unacceptable risk to human health and the environment. Once the N.C. Department of Environmental Quality (NC DEQ) receives the proposed remedial action plan, a second public notice will be issued providing for a 30-day public comment period.

Information about the nature and extent of the contamination at the site is presented in a remedial investigation report which is available electronically for review in the Online Laserfiche Files: <http://deq.nc.gov/about/divisions/waste-management/superfund-section/sf-file-records>, or contact the appropriate NC DEQ regulatory program site manager below.
