

North Carolina Solid Waste Groundwater Corrective Action Application

Groundwater quality at this solid waste management facility is subject to the "Classifications and Water Quality Standards Applicable to the Groundwaters of North Carolina," 15A NCAC 2L.

Due to groundwater exceedances at this solid waste management facility, groundwater corrective action is required to be implemented. First, a selected remedy should be proposed for Solid Waste Section approval. A public meeting is not a requirement for this facility at this time, however, the Solid Waste Section highly recommends conducting a voluntary public meeting and also notifying all adjacent property owners regarding the contamination and the proposed selected remedy. Then once the Solid Waste Section approves a selected remedy for this facility, a Corrective Action Plan (CAP) will be required to be submitted for approval prior to its implementation.

Please complete the North Carolina Solid Waste Groundwater Corrective Action Application and please attach the following:

- (1) a signed resolution/proclamation/document adopting the proposed selected remedy;
- (2) a site map designating the locations of the groundwater monitoring wells and surface water monitoring locations that will or may be impacted by the proposed selected remedy;
- (3) any draft conceptual schematics/figures/plans relating to the proposed selected remedy;
- (4) a list and copies of any required registrations, permits, notifications, and approvals;
- (5) a copy of the facility's closure letter issued by the Solid Waste Section (if available);
- (6) if a public meeting is conducted, a copy of the minutes (if applicable); and
- (7) if adjacent property owner notification is conducted, a copy of the notification letter and a copy of the certified receipt.

Please e-mail the completed application in addition to the attachments to the Project Manager or mail to NCDENR-DWM, Solid Waste Section, Compliance Unit, 1646 Mail Service Center, Raleigh, NC 27699-1646. This application and any documents attached to this application are "Public Records" as defined in NC General Statute 132-1. As such, these documents are available for inspection and examination by any person upon request (NC General Statute 132-6).
