

**State Water Infrastructure Authority
July 16, 2024 Meeting**

Agenda Item L – 2024 Reassessment and Designation of Local Government Unit Systems as Distressed

Division of Water Infrastructure Staff Report

Background

Session Law 2020-79, entitled in part “An Act to Improve the Viability of the Water and Wastewater Systems of Certain Units of Local Government...”, authorizes the State Water Infrastructure Authority (Authority) and Local Government Commission (LGC) to develop criteria to assess and review local government units (LGUs) and to utilize the assessment and review process to identify distressed LGUs.

In the Fall of 2020, the Authority and the LGC developed the Identification Criteria and Assessment Criteria to evaluate LGUs and identify distressed LGUs. The Authority adopted the Assessment Criteria and the Identification Criteria at its meeting on November 18, 2020¹, and revisions to the Assessment Criteria were adopted on February 13, 2024.

Identification Criteria

The Authority and LGC adopted the following Identification Criteria to be used to identify distressed units:

1. An LGU whose fiscal affairs are under the control of the LGC pursuant to its authority granted by G.S. 159-181 (“under LGC fiscal control”), or
2. An LGU that has not submitted its annual audits for the last two (2) fiscal years to the LGC as required by G.S. 159-34, or
3. An LGU with a total Assessment Criteria score that:
 - a) Equals or exceeds 9 for LGUs providing both drinking water and wastewater services, or
 - b) Equals or exceeds 8 for LGUs providing only one service, either drinking water or wastewater, or
4. An LGU for which other information is available to or known by the Authority or LGC that reflects and is consistent with, but does not expressly appear in, the Assessment Criteria to account for situations in which the Assessment Criteria score does not wholly or accurately reflect a system’s level of risk due to the limitations of available data.

¹ The LGC adopted the Identification Criteria at their subsequent meeting.

Previous Assessments and Distressed Designations

In 2021, Division and LGC staff compiled LGU data in accordance with the approved Identification and Assessment Criteria to complete the first assessment to identify distressed LGUs. Session Law 2020-79 requires that the Authority and the LGC assess and review LGUs against the Identification Criteria on a frequency of no less than every two years. At its July 14, 2021, meeting, the Authority agreed that the Division will conduct an annual review of the Assessment Criteria each spring and use a two-year cycle for notifications and designations under Identification Criterion 3. The two-year cycle involves notifying LGUs when their assessment score exceeds the designation threshold under Criterion 3 for the first time. Upon notification, these LGUs may choose to request designation at that time, provide additional information for consideration, correct errors in their score, or wait and see if they score above the threshold in the next assessment. LGUs that exceed the threshold a second time are automatically recommended for designation if they have not already been designated.

The 2021, 2022, and 2023 assessments used the same Identification Criteria outlined above and the same Assessment Criteria for scoring under Criterion 3. Several LGUs have been considered and designated outside of the annual assessments under Criterion 4. Based on previous assessments, there are currently 144 LGUs with active water and/or sewer systems that are designated distressed. Once designated, LGUs must meet the requirements of the Viable Utility (VU) program before the designation is removed, even if future assessment scores drop below the threshold for designation. To date, no LGUs have had the distressed designation removed. (Note, however, that the total number of designated distressed units has shifted over time, as some previously designated LGUs no longer have active water and/or sewer systems.)

At the completion of the 2023 assessment round, there were 15 LGUs that had been notified that they exceeded the threshold for designation and did not opt to request designation at that time. These LGUs would be automatically recommended for designation if they score above the threshold in the next assessment.

2024 Reassessment Summary

The 2024 assessment incorporated the following changes to the assessment criteria that were approved by the Authority in February 2024 and the LGC in March 2024:

- Remove the two population/mile parameters from the assessment;
- Modify the drinking water compliance parameter to incorporate Lead and Copper Rule violations such that a LGU scores one point for more than five Action Level Exceedances, MCL violations, and/or ongoing treatment technique violations in a five-year period; and
- Change the high rates parameter scoring thresholds to be updated each year based on the 85th percentile for each type of provider using the monthly bill for 5,000 gallons as calculated from the most current rate data available.

The data were updated with 2024 rate information, 2024 audit data, 2023 compliance data, and affordability data as compiled for the Fall 2023 application round. Attachment 1 lists all

LGUs currently assessed, along with their total scores from each of the annual assessments, current status if already designated distressed, and recommendations based on the 2024 assessment. Attachment 2 provides the scoring details for all LGUs for the 2024 assessment. Key findings from the 2024 reassessment are as follows:

- **Automatic Recommendations:** Two LGUs have exceeded the thresholds for designation under Criterion 3 for the second consecutive year and have not yet been designated. These LGUs are recommended for designation and listed below.
- **“First Year” Notices and Designation Requests:** Five LGUs exceeded the scoring thresholds for Criterion 3 for the first time and were sent notification letters in early July. These LGUs have the option to request designation this year. Due to delays with availability of data, these notification letters were sent later than in previous years, and the LGUs have not had time to determine if they want to request designation and submit the required resolution. Division staff will be following up with these LGUs over the next few weeks. If any LGUs request designation and submit resolutions, they will be recommended for designation at the September Authority meeting.
- **Late Audits:** The reassessment also identified 13 LGUs that had not submitted audit data as of April 1 for the last two years. (Three of the 13 have submitted 2022 audits since the April 1 deadline). In the first few rounds of annual assessments, the LGC chose to designate LGUs with two years of late audits as distressed under Criterion 2. In 2023, LGC staff considered Criterion 2 designation and ultimately decided not to recommend LGUs for designation if their score was below the designation threshold. LGC staff are currently reviewing LGUs with two years of late audits and expect to identify any LGUs that will be recommended for designation under Criterion 2 prior to the Authority meeting. By prior agreement, any such LGUs that are designated by the LGC under Criterion 2 are automatically designated by the Authority without further action.

All LGUs that are designated distressed by the Authority and LGC will be notified of that designation by letter following the LGC’s August meeting.

Staff Recommendation

Staff recommend that the Authority take the following actions:

- Designate as distressed the following LGUs that have scored above the designation thresholds in the 2023 and 2024 assessments and have not yet been designated:
 - Town of Grimesland
 - Town of Milton
