

**State Water Infrastructure Authority**  
**Meeting Date: February 21, 2023**  
**Agenda Items F and G**  
**Fall 2022 Application Round and Example Funding Scenarios for Water and Sewer**  
**(SRF/SRP/VUR/ARPA)**

**Division of Water Infrastructure Staff Report**

**Background**

This staff report presents background information on the Fall 2022 Application Round for drinking water and wastewater applications to be funded from the Drinking Water and Clean Water State Revolving Funds (SRFs), the Drinking Water and Wastewater Reserves (State Reserves), and the Viable Utility Reserve (VUR). The Fall 2022 Application Round includes funds appropriated to Water Infrastructure Funds established in G.S. 159G. This information includes a summary of available funds and any limitation on awarding the funds, a summary of applications received, and the process staff used to apply funds in the funding scenario example presented to the State Water Infrastructure Authority (Authority). Funding demand continues to far exceed available funds. Table 1 shows a Comparison of Funding Requested from Complete and Eligible Applications (including Spring 2022 Reconsiderations) and Amount of Funding Available.

<b>Table 1. Comparison of Funding Requested from Complete and Eligible Applications (including Spring 2022 Reconsiderations) and Amount of Funding Available</b>						
<b>Application Type</b>	<b>No. Applications</b>	<b>Total Requests (\$)</b>	<b>Approximate Amount Available</b>			
Drinking Water Projects - Construction	211	\$1.62B	DWSRF Loan: \$71.8M	CDBG-I Grant: \$20M	ARPA Grant \$159M	State Reserve Grant: \$10M
Wastewater Projects - Construction	229	\$1.56B	CWSRF Loan: \$101.7M			
Asset Inventory & Assessment Grants	104	\$27.5M	ARPA Grant \$28.3M			
Merger/Regionalization Feasibility Grants	6	\$1.2M				
Pre-Construction Planning (water or wastewater)	25	\$16.7M				
Stormwater Construction	82	\$216.7M	ARPA Grant: \$57.4M			
Establish a New Stormwater Utility	4	\$1.8M				
Stormwater Planning	64	\$22.1M	ARPA Grant: \$24.6M			
<b>Total:</b>	<b>719</b>	<b>\$3.46B</b>	<b>\$472.9M</b>			

## **2021 and 2022 Additional Appropriations**

In the Fall of 2021, the North Carolina General Assembly appropriated \$1.69 billion from the state's allocation of the American Rescue Plan Act (ARPA) for drinking water, wastewater, and stormwater investments in Sections 12.13 and 12.14 of the Operations Appropriations Act of 2021 (S.L. 2021-180), with additional corrections in S.L. 2021-189, S.L. 2022-6, and S.L. 2022-74. In July 2022, the General Assembly appropriated an additional \$611.4 million (for a total of \$2.3 billion) from the state's allocation of the American Rescue Plan Act and non-recurring General Funds for drinking water and wastewater investments in Section 12.9 of S.L. 2022-74.

The Division of Water Infrastructure (Division) was tasked with administering approximately \$2.1 billion as grants for drinking water, wastewater, and stormwater systems in North Carolina, which excludes administrative costs and amounts that have been transferred to other agencies. Of the \$2.1 billion, \$1.2 billion was directly appropriated for individual local government units (LGUs). The remaining \$941 million is available for funding to projects through the Authority. Those funds were appropriated into different Reserves within the Water Infrastructure Fund and the Local Assistance for Stormwater Infrastructure Investments (LASII) fund, as shown in Table 2. Table 2 also includes a summary of eligibility requirements for the appropriations.

In Calendar Year 2022, SWIA awarded \$672 million to projects and Viable Utility Reserve (VUR) training grants. There are \$269 million of the appropriated funds remaining to be awarded to projects through applications: \$187 million for drinking water and wastewater projects, and \$82 million for stormwater projects.

**Table 2.  
Summary of American Rescue Plan Act and Non-Recurring General Funds Appropriated for Water,  
Wastewater, and Stormwater Infrastructure in S.L. 2021-180 and S.L. 2022-74**

<b>NC DEQ Fund or Reserve</b>	<b>Purpose</b>	<b>Total Appropriations</b>	<b>Approximate Open for Competitive Grant Funding (including for previously-awarded projects)</b>	<b>Approximate Available for Competitive Grant Funding (at the start of the Feb. 2023 SWIA meeting)</b>
Viable Utility Reserve	Grants for water and wastewater systems that have been <b>designated as distressed</b> by the State Water Infrastructure Authority and the Local Government Commission, for the purposes set forth in subdivisions (1) through (5) of G.S. 159G-32(d).	\$444,400,000	\$371,600,000	\$109,000,000
Drinking Water Reserve and Wastewater Reserve (State Reserves)	Project construction grants for public water systems and wastewater systems NC DEQ categorizes as <b>at-risk</b> of becoming distressed.	\$309,100,000	\$173,400,000	\$42,500,000
	Project construction grants for public water systems and wastewater systems <b>not designated as distressed or categorized as at-risk.</b>	\$732,525,000	\$54,100,000	\$0
	Project construction grants for public water systems and wastewater systems of <b>any local government or nonprofit water/wastewater corporation</b> (S.L. 2022-74).	\$611,480,444	\$182,400,000	\$7,500,000
	Grants for asset inventory and assessments, rate studies, merger/regionalization feasibility, and training and planning grants to conduct project engineering, design, or other preconstruction activities.	\$80,000,000	\$77,600,000	\$28,300,000
Local Assistance for Stormwater Infrastructure Investments Fund	Grants for local governments for projects that will improve or create infrastructure for <b>controlling stormwater quantity or quality.</b>	\$103,625,000	\$82,000,000	\$82,000,000
<b>Total</b>		<b>\$2.3 billion</b>	<b>\$941,100,000</b>	<b>\$269,300,000</b>

As outlined in the [NC DEQ Division of Water Infrastructure's Plan to Administer American Rescue Plan Act's State Fiscal Recovery Fund Appropriated in the State Budget for Drinking Water, Wastewater and Stormwater Projects \(Administration Plan\)](#), ARPA funds from the VUR, State Drinking Water Reserve (SDWR), and State Wastewater Reserve (SWWR) were made available in the Spring 2022 Application Round, with some funds reserved for additional awards as part of the Fall 2022 Application Round. Funds from LASII were made available for the Fall 2022 Application Round.

### **Fall 2022 Funds Available**

The following funds are available for award for the Fall 2022 Application Round:

- Clean Water State Revolving Fund (CWSRF) and Drinking Water State Revolving Fund (DWSRF) funds are available to LGUs and nonprofit water corporations (and investor-owned drinking water corporations for the DWSRF) in the form of low-interest loans and principal forgiveness. State Revolving Fund amounts in this staff report include a portion of the Bipartisan Infrastructure Law (BIL) General Supplemental funds for the CWSRF and DWSRF programs. The Fall 2022 Application Round does not include funding from BIL capitalization grants for Lead Service Line Replacements and for addressing Emerging Contaminants.

The Authority may consider the additional information provided in the wastewater project applications for determining funding commitments for the CWSRF. Federal requirements also specify that at least 10 percent of the annual CWSRF capitalization grant shall be used for eligible Green Projects, and at least 15 percent of available DWSRF funding shall be used for providing loan assistance to small systems.

- The Community Development Block Grant – Infrastructure (CDBG-I) is a grant fund available to low-to-moderate income (LMI) communities for water and sewer improvements. The funding scenario for these awards was presented in Agenda Item E and is therefore not a part of this staff report.
- Viable Utility Reserve (VUR): These funds are available for LGUs that were designated as distressed by the Authority and the Local Government Commission (LGC). Funds from these projects may only be used for projects that meet the requirements of G.S. 159G-32(d)(1)-(5). as follows:
  - (1) Provide physical interconnection and extension of public water or wastewater infrastructure to provide regional service.
  - (2) Rehabilitate existing public water or wastewater infrastructure.
  - (3) Decentralize an existing public water system or wastewater system into smaller viable parts.
  - (4) Fund a study of any one or more of the following:
    - a. Rates
    - b. Asset inventory and assessment
    - c. Merger and regionalization options

- (5) Fund other options deemed feasible which result in local government units generating sufficient revenues to adequately fund management and operations, personnel, appropriate levels of maintenance, and reinvestment to facilitate the provision of reliable water or wastewater services.

VUR grants are limited by NC G.S. 159G-36(d)(1) to \$15,000,000 to any single LGU. Where two or more LGUs are merging into a single utility, the total grant amount awarded will not exceed \$30,000,000. Previously awarded Viable Utility Reserve grants, including those directly allocated to recipients in the Current Operations Appropriations Act of 2021, will count towards the limit. For more information related to VUR funds from ARPA, please see the Administration Plan.

- State Reserve for drinking water/wastewater projects: For ARPA construction funds administered from the State Reserve Program (SRP), \$7.5 million is available for LGUs and nonprofit water corporations, plus an additional \$42.5 million available only for drinking water and wastewater utilities that qualify as At-Risk either via the criteria specified in the Administration Plan or by providing service to disadvantaged/ underserved areas (see the Administration Plan for details). For ARPA planning grants, funds are available for asset inventory and assessment (AIA) grants, merger/regionalization feasibility (MRF) grants, and pre-construction planning grants (PCPG). ARPA planning grants are limited to \$400,000 per eligible entity in the 2021-2023 biennium.

Additionally, regular State Reserve funds are available for both construction and planning projects. There is \$10 million in State Reserve grant funding available to be awarded in the Fall 2022 and future Application Rounds. The State Reserve grant funds may be used for MRF grants, AIA grants, drinking water projects, and/or wastewater projects. State Reserve loans for drinking water and wastewater projects are limited to \$3,000,000 per LGU per year, or every three years for targeted interest rate projects. State Reserve grants for drinking water and wastewater projects are limited to \$3,000,000 per LGU every three years.

- The Local Assistance for Stormwater Infrastructure Investments (LASII) fund is a new grant program offered by the Division to control stormwater quantity and/or quantity issues. This is the first round this stormwater funding is available, following the creation of a new Priority Rating System in July 2022. Division staff have based their funding recommendations on the [Plan to Administer American Rescue Plan Act's State Fiscal Recovery Fund Appropriated in the State Budget for Stormwater Projects](#) (LASII fund). A Staff Report summarizing the LASII funding round and providing funding scenarios for LASII awards is provided as Agenda Items H and I.

ARPA funds, including LASII, must be expended by December 31, 2026 whereas regular State Reserve funds as well as DWSRF and CWSRF funds do not have this time restriction. Table 3 summarizes funds available for award as part of the Fall 2022 Funding round.

<b>Table 3 - Funds Available - Fall 2022 Application Round</b>		
	<b>Fund or Reserve</b>	<b>Funds</b>
SRF:	DWSRF	~\$71,800,000
	CWSRF	~\$101,700,000
CDBG-I:		\$20,000,000
Viable Utility Reserve <sup>a</sup> :	2019 appropriation (non-ARPA)	\$0
	ARPA appropriations	\$109,034,008
State Reserves:	Annual appropriation (non-ARPA) <sup>b</sup>	\$10,000,000
	ARPA At-Risk	\$42,505,610
	ARPA All Other Systems	\$0
	ARPA S.L. 2022-74	\$7,546,321
	ARPA Planning/Study grants	\$28,269,846
LASII:	Stormwater construction <sup>c</sup>	\$57,446,375
	Stormwater planning	\$24,619,875
<b>Approximate Total:</b>		<b>\$472,922,035</b>

<sup>a</sup> VUR funds include funds for both construction projects and study/planning grants.

<sup>b</sup> Non-ARPA State Reserves intended to be split between February 2023 and Fall 2023 Application Round.

<sup>c</sup> Includes funding for Establishing a New Stormwater Utility.

### **Summary of Applications Received**

Fall 2022 Application Round applications were due September 30, 2022. Excluding applications for stormwater, 603 drinking water and wastewater applications, including reconsidered unfunded Spring 2022 applications, were received from 299 applicants in 94 of the 100 counties across the state. Of these, 28 applications (4.6%) were not complete and are not eligible for consideration for funding. The 575 complete and eligible applications for drinking water and wastewater projects include four CDBG-I applications, 436 construction applications, and 135 planning applications.

A summary of the number of applications for consideration by funding source and project type is shown in Table 4, and a similar summary showing requested funding amounts is shown in Table 5. Drinking water and wastewater construction project applications are eligible for ARPA, regular State Reserve, SRF funds, and CDBG-I funds (discussed in Agenda Item E). Study grant applications from LGUs designated as Distressed are eligible to be funded out of either the State Reserve ARPA planning

grants or from the VUR. All other study grant applications are eligible to be funded out of the State Reserve ARPA planning grants. VUR and ARPA caps and limits apply, as described in the ARPA Administration Plan.

Requested funding for construction projects far exceeds the amount of available funds for this round. At the end of this funding round, there will be no additional ARPA grant funds available for drinking water and wastewater construction applications, but SRF loans, principal forgiveness loans and CDBG-I grants will continue to be available. Requests for planning grants exceed availability, but due to eligibility requirements and caps, some planning grant funds will remain after this funding round. Information about remaining planning grant funds will be made available as part of the Fall 2023 funding round.

During the Spring 2022 Funding round, Authority members requested additional information on the types of projects in applications received. Table 6 shows the number of applications from distressed systems, the number that self-identified that the project is the result of a previously awarded AIA or MRF, and projects that received prioritization for certain, but not all, priority line items.

**Table 4. Number of Applications (including reconsidered Spring 2022 applications)**

Category	Drinking Water	Wastewater	AIA	MRF	Stormwater (LASII)	Total
<b>Incomplete/Ineligible</b>	4	18	6	0	21	<b>49</b>
<b>Complete and Eligible:</b>						
Construction/Planning: Distressed	63	82	31			<b>176</b>
Construction: At-Risk	59	68				<b>127</b>
Construction: At-Risk (D/U)	8	6				<b>14</b>
Construction: All Other Systems	80	70				<b>150</b>
Construction: CDBG-I	1	3				<b>4</b>
Construction: Stormwater					82	<b>82</b>
Establish a Stormwater Utility <sup>a</sup>					4	<b>4</b>
Planning	10	15	73	6	64	<b>168</b>
<b>Total Complete and Eligible:</b>	<b>221</b>	<b>244</b>	<b>104</b>	<b>6</b>	<b>150</b>	<b>725</b>

**Table 5. Summary of Funds Requested in Complete and Eligible Applications (including reconsidered Spring 2022 applications)**

Category	Drinking Water	Wastewater	AIA	MRF	Stormwater (LASII)	Total
Construction/Planning: Distressed	\$311,266,368	\$385,105,601	\$9,167,880			<b>\$705,539,849</b>
Construction: At-Risk	\$384,557,535	\$351,114,911				<b>\$735,672,446</b>
Construction: At-Risk (D/U)	\$30,829,677	\$47,794,898				<b>\$78,624,575</b>
Construction: All Other Systems	\$894,438,194	\$767,203,167				<b>\$1,661,641,361</b>
Construction: CDBG-I	\$2,000,000	\$3,905,609				<b>\$5,905,609</b>
Construction: Stormwater					\$216,720,193	<b>\$216,720,193</b>
Establish a Stormwater Utility <sup>a</sup>					\$1,800,000	<b>\$1,800,000</b>
Planning	\$10,979,590	\$5,732,000	\$18,327,728	\$1,200,000	\$22,105,335	<b>\$58,344,653</b>
<b>Total Complete and Eligible:</b>	<b>\$1,634,071,363</b>	<b>\$1,560,856,186</b>	<b>\$27,495,608</b>	<b>\$1,200,000</b>	<b>\$240,625,528</b>	<b>\$3,464,248,685</b>

<sup>a</sup> Per Section 12.14 of S.L. 2021-180, funds for establishing a stormwater utility will be awarded from the LASII construction funds.

**Table 6. Summary of Project Applications Receiving Specific Project Purpose or Project Benefits Priority**

Project Type (excluding CDBG-I)	Parameter Type												
	Total	Distressed	Result of Awarded AIA/MRF <sup>†</sup>	Loan Swap for ARPA Grant	Consolidate a Non-Viable Utility <sup>a</sup>	Failing Infrastructure <sup>b</sup>	Old Infrastructure <sup>c</sup>	Service to Disadvantaged Areas <sup>d</sup>	Lead Service Lines <sup>e</sup>	Emerging Contaminants <sup>f</sup>	Merger/Regionalization <sup>g</sup>	Resiliency <sup>h</sup>	Benefits to Disadvantaged Areas <sup>i</sup>
Drinking Water	210	63	19	4	0	5	123	8	7	10	8	64	32

<b>Total (excluding CDBG-I)</b>	<b>571</b>	<b>186</b>	<b>66</b>	<b>12</b>	<b>0</b>	<b>10</b>	<b>290</b>	<b>15</b>	<b>7</b>	<b>12</b>	<b>15</b>	<b>166</b>	<b>160</b>

<sup>a</sup> Non-Viable Utility - successfully claimed Line Item 1A of the Construction Priority Rating Systems for WW/DW.  
<sup>b</sup>Failing Infrastructure - successfully claimed Line Item 1.B of the Construction Priority Rating Systems for WW/DW.  
<sup>c</sup>Old Infrastructure - successfully claimed Line Items 1.C.1 or 1.D.1 of the Construction Priority Rating Systems for WW/DW.  
<sup>d</sup>Service to Disadvantaged Area - successfully claimed Line Item 1.E of the Construction Priority Rating Systems for WW/DW. Does not include similar applications that successfully claimed Line Item 1.B (failing infrastructure) points instead.  
<sup>e</sup>Lead Service Lines -successfully claimed Line Item 2.B.2 of the Construction Priority Rating Systems for WW/DW.  
<sup>f</sup>Emerging Contaminants - successfully claimed Line Item 2.H.3 of the Construction Priority Rating Systems for WW/DW.  
<sup>g</sup>Merger/Regionalization - successfully claimed Line Items 2.F.1 or 2.F.2 of the Construction Priority Rating Systems for WW/DW.  
<sup>h</sup>Resiliency - successfully claimed one of Line Items 2.N.1 through 2.N.7 of the Construction Priority Rating Systems for WW/DW.  
<sup>i</sup>Benefits to Disadvantaged Areas - successfully claimed Line Item 4.D of the Construction Priority Rating Systems for WW/DW, Line Item 4.C of the Stormwater Construction Priority Rating System, or Line Item 3.C of the Stormwater Planning Priority Rating System.  
<sup>j</sup>Including two applications that include one or more local government units that are designated as distressed.  
<sup>†</sup>Self-Identified

### **Example Funding Scenario for SRF, State Reserve, and Viable Utility Reserve**

The Authority may consider multiple funding scenarios. In the example funding scenario presented, applications are shown as receiving funds as follows:

- Fully fund all complete and eligible MRF projects with ARPA State Reserve Study Grant funds, up to \$400,000 per recipient.
- Fully fund remaining complete and eligible MRF projects with non-ARPA State Reserve Study Grant funds up to \$50,000 per recipient. Only one project application requested funding in excess of the \$400,000 ARPA study grant cap.
- Fund all complete and eligible AIA grant applications from LGUs designated as distressed with ARPA State Reserve Study Grant funds, up to \$400,000 per recipient.
- Fund all complete and eligible pre-construction planning study grants from the ARPA State Reserve Study Grant funds, up to \$400,000 per recipient.
- Fund all complete and eligible AIA grant applications with a priority score of 9 or greater from ARPA State Reserve Study Grant funds, up to \$400,000 per recipient.
- Fund all remaining complete and eligible AIA grant applications from LGUs designated as distressed with ARPA VUR Grant funds (VUR awards require approval from both SWIA and the LGC).
- Fund remaining complete and eligible AIA grant applications with a priority score of 9 or greater from non-ARPA State Reserve Study Grant funds, up to \$150,000 per recipient.

Note for the ARPA construction project funding scenario: recommendations include consideration for equitable distribution of ARPA funds between drinking water and wastewater projects while also providing funds to all eligible projects receiving the same priority rating score.

- Fund eligible applications for ARPA VUR funds in priority order up to the statutory funding limit.
- Fund eligible applications for ARPA State Reserve At-Risk Funds in priority order up to the funding limits.
- Fund eligible applications for non-ARPA State Reserve Funds in priority order to either fully fund project with State Reserve or to complete funding request where other caps did not meet project costs up to the funding limit.

- State Reserve funds are used to offer the best available funding for drinking water and wastewater project applications using the appropriate Priority Rating System order (until funds are exhausted) in the following order:
  - Principal forgiveness (PF) to eligible projects. Per the 2022 CWSRF and DWSRF Intended Use Plans, the PF limit of \$500,000 may be exceeded up to the grant percentage determined by the Affordability Criteria if funds are available. PF is only recommended to projects eligible for 100 percent PF, or to projects recommended to receive funding from the SRF or other funding sources.
  - SRF loan funds to eligible projects.
- Multiple projects were not recommended for funding because there were not sufficient grant or PF funds available to meet the minimum grant funding the applicant indicated was needed for the project to move forward. See staff notes on spreadsheet.

### **Project-Specific Notes**

#### **MRF Applications for Funding**

- The Town of Sedalia is a historically underserved and disadvantaged community that relies solely on private wells and septic systems. This drinking water and wastewater MRF will study the policies and organizational options for Sedalia to merge with the City of Greensboro's existing drinking water and wastewater systems, which currently serve the Charlotte Hawkins Brown Museum and State Historic Site within Sedalia's town limits.
- The Lumber River COG (LRCOG) submitted a joint application for \$195,000 on behalf of Bladenboro, Boardman, Cerro Gordo, Dublin, Ellerbe, Fair Bluff, Fairmont, Gibson, Proctorville, and Rowland to perform a rate study and rate education program in conjunction with a concurrent, technically focused MRF funded in the Spring 2022 Application Round. This MRF will focus on the organizational and financial aspects of the various drinking water and wastewater regional solutions being evaluated in the existing MRF. Dublin, Gibson, and Ellerbe also applied for AIAs this round, while all of the other systems have ongoing or completed AIAs.
- Martin County Regional Water and Sewer Authority submitted a joint application for \$500,000 on behalf of Bear Grass, Everetts, Hamilton, Hassell, Jamesville, Martin County, Oak City, Parmelee, Robersonville, and Williamston to investigate various drinking water and wastewater regionalization efforts among the partnering systems and to conduct both status quo and 20-year rate studies for each set of regionalization alternatives. Everetts, Hamilton, Jamesville, Martin County, Parmelee, Robersonville, and Williamston all have ongoing AIAs as part of the regionalization efforts.

### AIA Applications for funding

- Town of Beulaville (Distressed) is requesting \$807,500 for a wastewater AIA after having received \$205,000 for a wastewater AIA and \$194,400 for a drinking water AIA in the Spring 2022 Application Round. The latest application claims to be building upon the existing wastewater AIA project, but the Division has not received scopes for the current projects. Staff recommend awarding funds to meet the Fall 2022 application budget considering past awards.
- Town of Winterville is requesting \$150,000 to develop a wastewater Master Plan in conjunction with a potential merger with Contentnea Metropolitan Sewage District,
- Projects that will help address PFAS: Bladen County Water District and Eastover Sanitary District
- Projects that will help address Lead and Copper Rule/Lead service line replacement: Dallas, Elizabeth City, High Point, and Scotland County

### Drinking Water Project Applications

- The following systems provided applications for funding more than the ARPA funding limits established in the ARPA Administration Plan. The funding scenario includes SRF funds to more fully fund the project; however, accepting SRF funds will require that the entire project meets SRF federal conditions:
  - Gray's Creek Water and Sewer District
- Additional PF is available to exceed the \$500,000 cap for the following projects:
  - Town of Pittsboro, UV-AOP Treatment Facilities
  - Town of Pittsboro, Additional PFAS Treatment Facilities
  - City of Sanford, Water Filtration Facility Expansion
- Town of Pittsboro has been designated as a distressed system. The Town submitted applications for UV-AOP Treatment Facilities and Additional PFAS Treatment Facilities to improve water treatment. The project applications did not demonstrate a project purpose meeting funding requirements in subdivisions (1) through (5) of G.S. 159G-32(d) as described above. Therefore, projects are bypassed for VUR funds in the funding scenario. Both projects are included in the funding scenario as funded with SRF loan with PF.
- Town of Autryville has been designated as distressed. The Town applied for a Water System Extension project that is intended to provide water service to new customers, including customers with PFAS-impacted private wells. The project application did not demonstrate a project purpose meeting funding requirements in subdivisions (1) through (5) of G.S. 159G-32(d) as described above. Therefore, the project is bypassed for VUR funds in the funding scenario. The project did not score high enough to be in the funding range for other funding sources.
- Town of Stovall is the last drinking water project funded with ARPA VUR funds.

- City of Hamlet is the last drinking water project funded with ARPA State Reserve At-Risk System funds.
- Gray's Creek Water and Sewer District is the last drinking water project funded with S.L 2022-74 State Reserve funds. The project also is recommended to receive a DWSRF loan with PF.
- Town of Fuquay Varina is the last project funded with DWSRF funds.

### Wastewater Project Applications

- The following systems provided applications for funding more than the ARPA funding limits established in the ARPA Administration Plan. The funding scenario includes SRF funds and PF to more fully fund the project; however, accepting SRF funds will require that the entire project meets SRF federal conditions:
  - Town of Pikeville, Wastewater Improvements
  - City of Southport, Evaluation and Rehab of Wastewater System
  - Town of Spindale, Oak Street Pump Station
- Town of Roseboro's 2022 Old Cement and Clay Rehabilitation project application indicated requested funding for \$9.1M to meet total project cost. The project was previously awarded a \$6.4M ARPA grant in Spring 2022. Recommended award (\$2.7M) will fund to meet project costs in the application.
- Additional PF is available to exceed the \$500,000 cap for the following projects:
  - Town of Pikeville, 2023 Wastewater Improvements
  - Town of Pollocksville, WWTP Replacement Project
  - Town of Pollocksville, Pump Station 2 Relocation
  - Town of Pittsboro, Wastewater Transmission System Improvements
- Town of Wilkesboro, Cub Creek III Stream Restoration project is funded with CWSRF Green Project reserve to meet CWSRF requirements.
- Town of Severn, Stormwater Drainage Improvements project is funded with CWSRF Green Project reserve to meet CWSRF requirements.
- Town of Pikeville is the last wastewater project funded with ARPA VUR funds and is funded with all remaining ARPA VUR funds. This project is also funded with CWSRF PF.
- Town of Spindale is the last wastewater project funded with ARPA State Reserve At-Risk System funds.
- City of Southport is the last wastewater project funded with S.L 2022-74 State Reserve funds and is also funded with CWSRF.
- City of Albemarle is the last wastewater project funded with CWSRF funds that is not eligible for Green Project Reserve.

The scenario utilizes available funds and proposes to fund 168 projects from the SRF, SRP and VUR funds for approximately \$378 million. Table 6 indicates the number of applications that would be funded and Table 7 indicates the funding amounts for the different funding source.

This scenario is detailed in Tables G-1 through G-5 below. Those tables identify the projects that would be funded under the example funding scenario described above (preliminary information). A full list of applications, including those that would not be funded under this scenario, are shown in the accompanying spreadsheets. Project numbers in the tables below reference project numbers in the accompanying spreadsheets.

<b>Category</b>	<b>Drinking Water</b>	<b>Wastewater</b>	<b>AIA</b>	<b>MRF</b>	<b>Stormwater (LASII)</b>	<b>Total</b>
