## Funding Actions Taken at the February 21, 2023 Meeting of the State Water Infrastructure Authority on the Applications Submitted in September 2022 to the

## North Carolina Department of Environmental Quality Division of Water Infrastructure

On September 30, 2022, the North Carolina Department of Environmental Quality (NC DEQ) Division of Water Infrastructure (Division) received applications for funding for drinking water projects, wastewater projects, pre-construction planning grants, merger/regionalization feasibility (MRF) study grants, asset inventory and assessment (AIA) grants, stormwater construction grants, stormwater planning grants, and grants to develop and establish a new stormwater utility. The sources of funding for the Fall 2022 applications are:

- Viable Utility Reserve (VUR)
- Drinking Water Reserve (State Reserve)
- Wastewater Reserve (State Reserve)
- Drinking Water State Revolving Fund (DWSRF)
- Clean Water State Revolving Fund (CWSRF)
- Community Development Block Grant Infrastructure (CDBG-I)
- Local Assistance for Stormwater Infrastructure Investments (LASII)

In addition to applications received by the deadline, applications for funding that were submitted to the Division in the Spring 2022 funding round that were not selected to receive funds were also reconsidered for funding.

Tables 1 and 2 show a summary of the 735 applications that were complete and eligible for funding, and the \$3.56 billion in funding requested in those applications. Requests for funding far exceeded the amount available to award. On February 21, 2023, the State Water Infrastructure Authority (Authority) determined the eligibility of applications selected to receive funding from the available funding sources listed above. Note that American Rescue Plan Act (ARPA) State Fiscal Recovery Funds appropriated in S.L. 2021-180 and S.L. 2022-74 are administered via the State Reserves, VUR, and LASII. A portion of the Bipartisan Infrastructure Law's general supplement of the DWSRF and CWSRF will be awarded via the two State Revolving Funds to projects that the Authority determined were eligible to receive funding.

Table 3 shows a summary of the number of applications that were approved for full or partial funding at the Authority's February 21, 2023 meeting, and Table 4 shows the amount of funding approved by program. A total of \$462,934,135 was approved for funding in grants and loans for 249 applications. The funded applications are from 80 counties across the state, shown in Figure 1.

Tables 5 through 15 list the projects, by funding source, determined by the Authority as eligible to receive funding.

Table 1. Numbe	r of Application	s (including recor	sidered Sprir	g 2022 applic	cations)	
Category	Drinking Water	Wastewater	AIA	MRF	Stormwater (LASII)	Total
