

SWINE FARM PERMIT MODIFICATIONS

Associated with the Align RNG Proposed Project

DRAFT Environmental Justice Report
North Carolina Department of Environmental Quality

December 22, 2020

1 Draft Environmental Justice (EJ) Report

The Draft EJ Report is an initial look at the demographics and socioeconomics of a facility's surrounding community area. This includes information within a radius determined by the North Carolina Department of Environmental Quality (Department or DEQ) regarding race and ethnicity (decennial census year), poverty status, per capita income, and ability to speak English (most current American Community Survey (ACS) census range), the current North Carolina Department of Commerce county tier, and presence of Native American territory. The Draft EJ Report does not include a reconnaissance of the community.

A Draft EJ report will be prepared at the beginning of the permit application process when requested by the appropriate Division Director. This report will be distributed to interested community members (if known) and posted to the DEQ website with the relevant permit application before the close of the public comment period. The primary goal is to encourage EJ Report comments and suggestions from the surrounding community, industry, and environmental groups throughout the comment period.

It is important to keep in mind, that based on the data available, the following limitations of this evaluation: census data is from 2010 and may be outdated; the more recent American Community Survey data through 2018 are estimates; the U.S. EPA's EJSCREEN does not provide all of the data categories that were used in this analysis so the census tract and county data cannot be compared to the radius evaluating the facility boundary; and census tracts can be large areas that do not identify exact locations of each population.

The Department has prepared this overview of the demographic and socioeconomic data of the communities surrounding the four animal feeding operations that have applied for modifications to their existing animal waste management permits, associated with the Align RNG, LLC facility to foster communication prior to the Division of Water Resource's final action on the permit modifications.

2 Environmental Justice Evaluation

Environmental justice is the fair treatment and meaningful involvement of all people regardless of race, color, national origin, or income, with respect to the development, implementation, and enforcement of environmental laws, regulations, and policies (US EPA). This evaluation examines the demographic and environmental conditions in Sampson and Duplin Counties, as well as census tracts 903, 908.01, 9710, and 9701, and the one-mile buffer around the property boundary of the proposed Align RNG, LLC facility. Finally, the demographics of the entire state of North Carolina are also considered as they compare to both the county and local census tract and radius settings.

The Department has assessed the permit modification applications and the composition of the communities surrounding the facility as proposed in the permit application. Accordingly, this Draft Environmental Justice Report includes:

- Overview of the permit modifications submitted by four animal feeding operations
- Study of area demographics [determined by utilizing the US EPA Environmental Justice tool (EJSCREEN) <https://ejscreen.epa.gov/mapper/> and current, available census data. <http://factfinder.census.gov/faces/nav/jsf/pages/index.xhtml>]
- Comparison of local area demographics to both county and statewide census data
- County health assessment
- Surrounding sensitive receptors
- Local industrial sites (using the NCDEQ Community Mapping System <https://ncdenr.maps.arcgis.com/apps/webappviewer/index.html?id=1eb0fbe2bcfb4cccb3cc212af8a0b8c8>).

Demographics (including race and ethnicity, poverty status, and per capita incomes) for Sampson and Duplin counties will be compared to the local (census tracts and project radius) level data to identify any disparities surrounding the project area. Using standard environmental justice guidelines from the EPA and National Environmental Policy Act (NEPA) documentation, the following conditions will be flagged as potential communities of concern:

- 10% or more in comparison to the county or state average
- 50% or more minority
- 5% or more in comparison to the county or state average for poverty

3 Proposed Project

Align RNG, LLC submitted an air permit application for a proposed facility in Duplin County, North Carolina. The air permit application is for a new processing facility which would receive biogas produced in anaerobic digesters at various independently-owned and operated swine facilities located in Duplin and Sampson counties. This report focuses on the four swine farms currently under review for a modification to their animal operations permits, which would supply the Align RNG proposed facility with biogas. Those farms are the Kilpatrick Farm 1,2,4 & 5 & Merritt Farm, Benson Farm, Waters Farm 1-5 M&M Rivenbark, and Farms 2037 & 2038 (Table 1). The Kilpatrick Farm 1, 2, 4, & 5 & Merritt Farm proposes to cover one of existing, synthetically lined lagoons at the Kilpatrick Farm site. This modification would treat the waste from 13,336 Wean to Finish swine at the Kilpatrick Farm site. The remaining 5,083 Wean to Finish swine at the Merritt Farm site will continue to be served by the existing lagoon at that site. These two farm sites are covered under one permit because they share land application fields. The other three farms each plan to install one new synthetically lined anaerobic digester. Anaerobic digesters are designed to breakdown organic materials (such as animal or agricultural waste) more quickly and more completely in an environment without oxygen. These digesters are designed to capture the biogas that is a by-product of anaerobic digestion.

Table 1. Swine Operations information and Modification overview

Farm	Permitted head count (size) & Type	Modifications Considered
Waters Farm 1-5 M&M Rivenbark	12,308 Wean to Finish Swine	Install new synthetically lined and covered anaerobic digester
Benson Farm	6,120 Feeder to Finish Swine	Install new synthetically lined and covered anaerobic digester
Kilpatrick Farm 1, 2, 4, & 5 & Merrit Farm	18,419 Wean to Finish Swine	Install cover on existing synthetically lined lagoon
Farm 2037 and 2038	20,992 Feeder to Finish Swine	Install new synthetically lined and covered anaerobic digester

While the surrounding farms are considered, neither the gathering lines (low-pressure biogas pipelines) nor the Piedmont Natural Gas pipeline will be included in this analysis. Public comments on the Align RNG facility also raised concerns regarding truck traffic and disease vectors, however these concerns are outside the scope of this analysis as well.

4 Geographic Area

The proposed facility, Align RNG, LLC, is located at 2940 NC Highway 24 West, Turkey, NC 28393 (Figure 1). The four farms under review for permit modifications are as follows:

- Waters Farm 1-5 M&M Rivenbark: 885-A Bonham Rd, Magnolia, NC 28453; Duplin County
- Benson Farm: 956 Veaches Mill Rd, Warsaw, NC 28398; Duplin County
- Kilpatrick Farm 1, 2, 4, & 5 & Merrit Farm, 1457 A K Bryan Rd, Magnolia, NC 28453; Sampson County
- Farm 2037 and 2038, 779 Old Goodson Farm Ln, Turkey, NC 28393; Sampson County

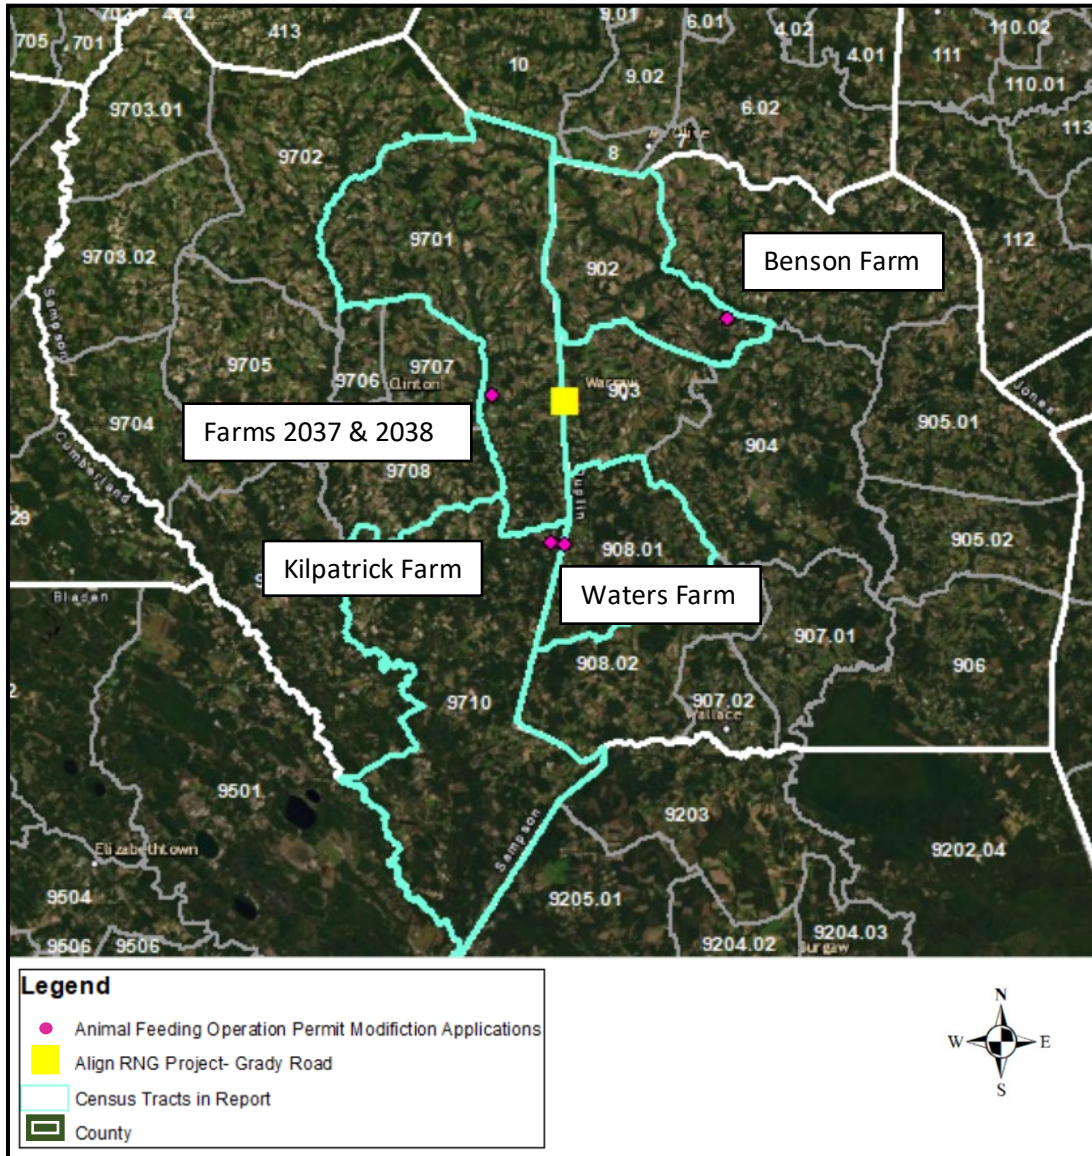

Figure 1. Facility location (Align RNG, LLC) with the four swine facilities applying for permit modifications.

Regional Setting

The four swine facilities are located in Duplin and Sampson counties in four census tracts. Both Sampson and Duplin counties are designated as Tier 1 counties. Tier 1 counties encompass the 41 most distressed counties based on average unemployment rate, median household income, percentage growth in population, and adjusted property tax per capita. The swine facilities are located in two census tracts in Duplin County – census tracts 902 (Benson Farm) and 908.01 (Waters Farm), and two in Sampson County – census tracts 9701 (Farms 2037 & 2038) and 9710 (Kilpatrick Farm) (Figure 2). Census tracts are small, relatively

All **bolded and orange** cells indicate a difference that is greater than 5% when compared to the state.

All **bolded and blue** cells indicate a difference that is greater than 5% when compared to the state and the county.

Table 6. Per Capita Income

Location	Subject	Per Capita Income in Last 12 Months (Dollars)	
North Carolina	Per Capita Income	Estimate	\$29,456
		Margin of Error +/-	143
Duplin County	Per Capita Income	Estimate	\$19,455
		Margin of Error +/-	737
Sampson County	Per Capita Income	Estimate	\$21,950
		Margin of Error +/-	1,130
Census Tract 902 Duplin County	Per Capita Income	Estimate	\$17,484
		Margin of Error +/-	2,195
Census Tract 908.01 Duplin County	Per Capita Income	Estimate	\$16,033
		Margin of Error +/-	2,425
Census Tract 9701 Sampson County	Per Capita Income	Estimate	\$21,059
		Margin of Error +/-	4,453
Census Tract 9710 Sampson County	Per Capita Income	Estimate	\$19,851
		Margin of Error +/-	2,284
Waters Farm Project Area- 1 Mile Buffer	Per Capita Income	Estimate	\$16,970
		Margin of Error +/-	*****
Benson Farm Project Area- 1 Mile Buffer	Per Capita Income	Estimate	\$17,126
		Margin of Error +/-	*****
Kilpatrick Farm Project Area- 1 Mile Buffer	Per Capita Income	Estimate	\$17,525
		Margin of Error +/-	*****
Farms 2037 and 2038 Project Area- 1 Mile Buffer	Per Capita Income	Estimate	\$18,285
		Margin of Error +/-	*****

5 Limited English Proficiency (LEP)

Per the Safe Harbor Guidelines, should an LEP Group be identified during the permit application process, written translations of vital documents for each eligible LEP language group that constitutes 5% or includes 1,000 members (whichever is less) of the population of persons eligible to be served or likely to be affected or encountered. If there are fewer than 50 persons in a language group that reaches the 5% trigger, then DEQ will not translate vital written materials, but instead will provide written notice in the primary language of the LEP language group of the right to receive competent oral interpretation of those written materials, free of cost. The safe harbor provisions apply to the translation of written documents only. Safe harbor guidelines are per the US EPA guidance for LEP persons, and implemented by DEQ when deemed appropriate. The population of Spanish-speakers that speak English “less than very well” is greater than 5% in all four census tracts analyzed (Table 7).

Table 7. Limited English Proficiency

Language Spoken at Home	Census Tract 902, Duplin County			Census Tract 908.01, Duplin County			Census Tract 9701, Sampson County			Census Tract 9710, Sampson County		
	Estimate	Margin of Error	Percent	Estimate	Margin of Error	Percent	Estimate	Margin of Error	Percent	Estimate	Margin of Error	Percent
Total:	3,969	424	100	2,729	381	100	6,755	635	100	4,702	591	100
Speak only English	2,668	314	67.2%	1,602	319	58.7%	5,352	507	79.2%	3,635	443	77.3%
Spanish or Spanish Creole:	1,288	444	32.5%	1,106	368	40.5%	1,396	454	20.7%	1,067	516	22.7%
Speak English "very well"	486	240	12.2%	500	279	18.3%	539	196	8.0%	445	309	9.5%
Speak English less than "very well"	802	266	20.2%	606	180	22.2%	857	336	12.7%	622	297	13.2%

6 County Health

The University of Wisconsin Population Health Institute, in collaboration with the Robert Wood Johnson Foundation, calculated a County Health Rankings system for all the States in the United States (www.countyhealthrankings.org). This ranking is based on health outcomes (such as lifespan and self-reported health status) and health factors (such as environmental, social and economic conditions). According to this 2020 report, out of all 100 counties in North Carolina (with 1 indicating the healthiest), Sampson County ranks 82nd in health factors and 77th in health outcomes. Duplin County ranks 87th in health factors and 56th in health outcomes.

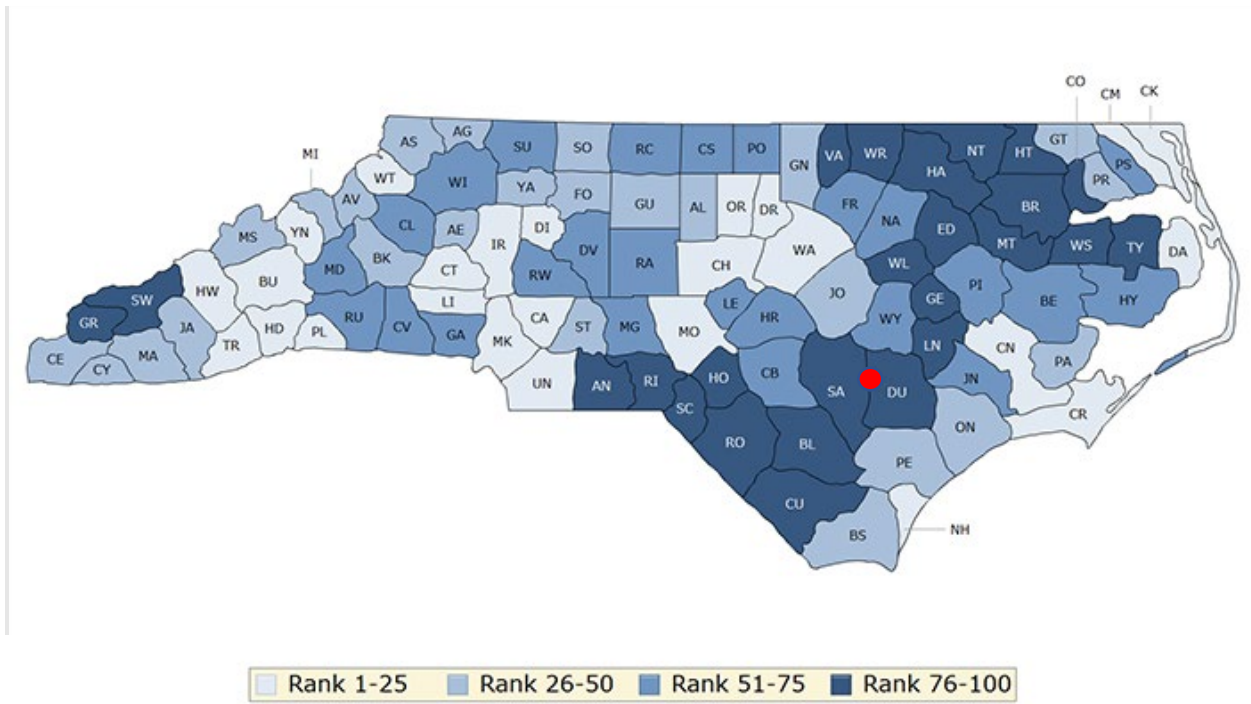

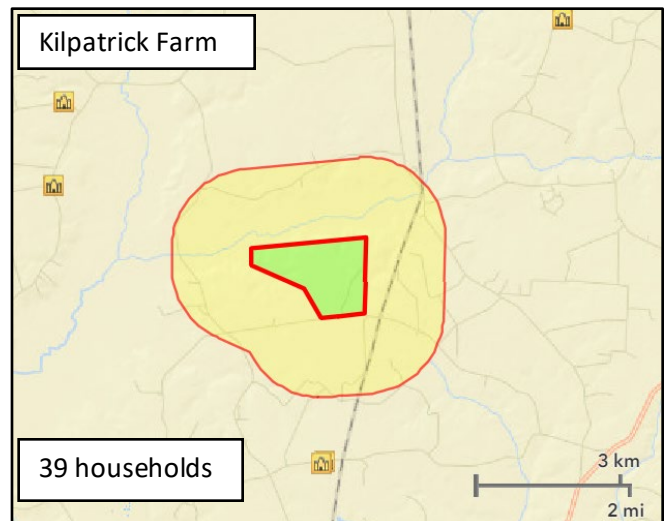

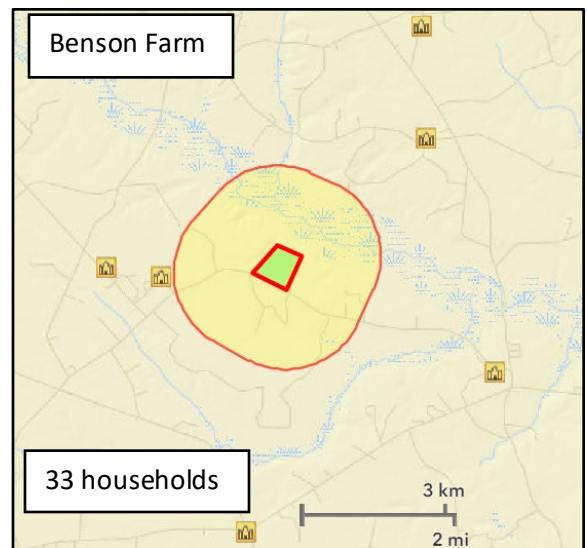

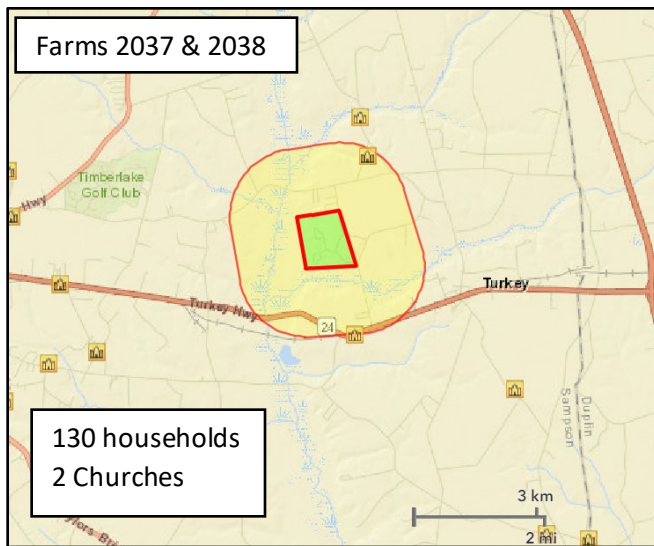

Figure 3. County Health Rankings for Health Factors in North Carolina provided by University of Wisconsin Public Health Institute.

7 Local Sensitive Receptors

The Environmental Protection Agency suggests that sensitive receptors include, but are not limited to, hospitals, schools, daycare facilities, elderly housing, and convalescent facilities. These are areas where the occupants may be more susceptible to the adverse effects of exposure to toxic chemicals, pesticides, and other pollutants. Extra care must be taken when dealing with contaminants and pollutants in close proximity to areas recognized as sensitive receptors. For instance, children and the elderly may have a higher risk of developing asthma from elevated levels of certain air pollutants than a healthy individual aged between 18 and 64. Within a one-mile radius of each of the four swine facilities, the following potential sensitive receptors were identified through EJSCREEN and Google Maps:

- Mount Pleasant Baptist Church
- Six Runs Baptist Church
- A total of 209 households

Additional sensitive receptors may be identified during the permit application process, such as through receipt of public comment.

8 Local Industrial Sites

Within the one-mile buffer of Benson Farm (in Duplin County, Census Tract 902), there are 7 permitted animal feeding operations (as of December 21, 2020).

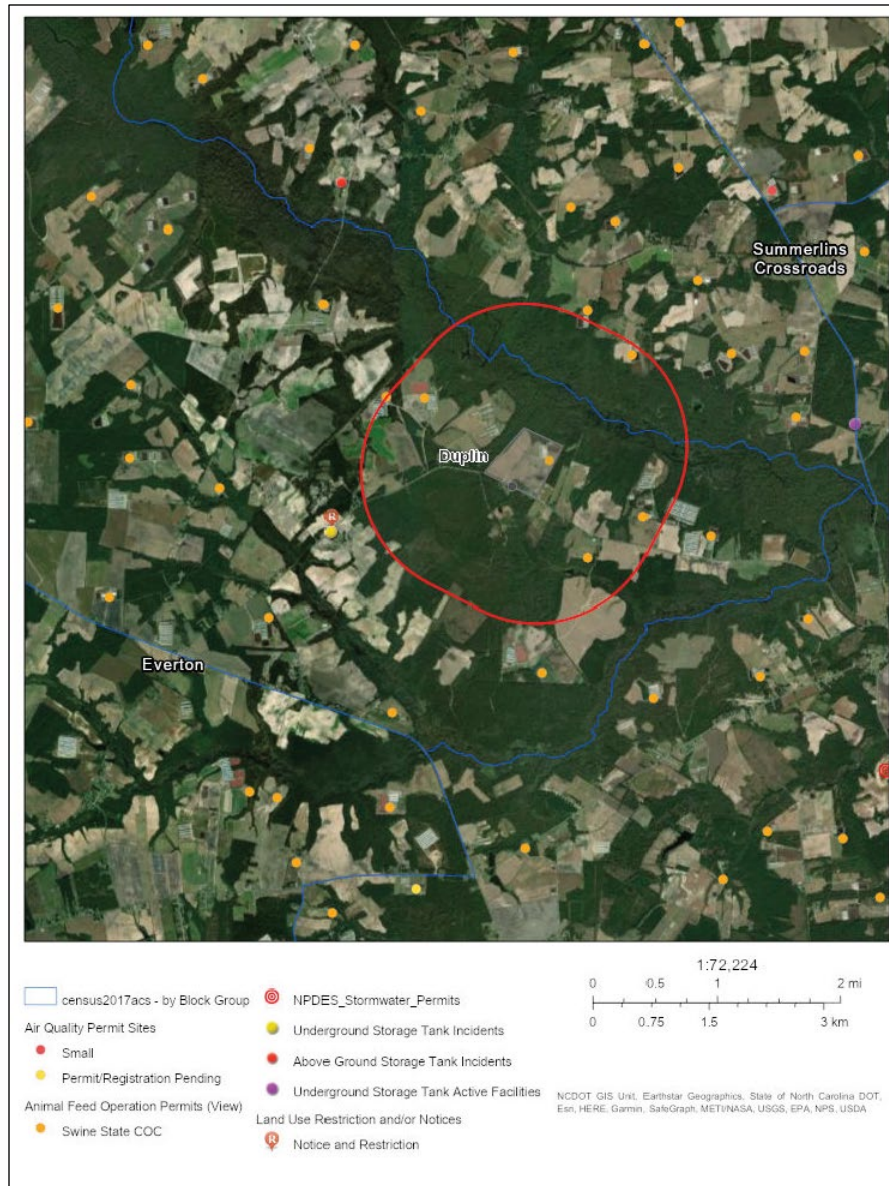

Figure 5. Permitted facilities and incidents with the one-mile radius surrounding Benson Farm.

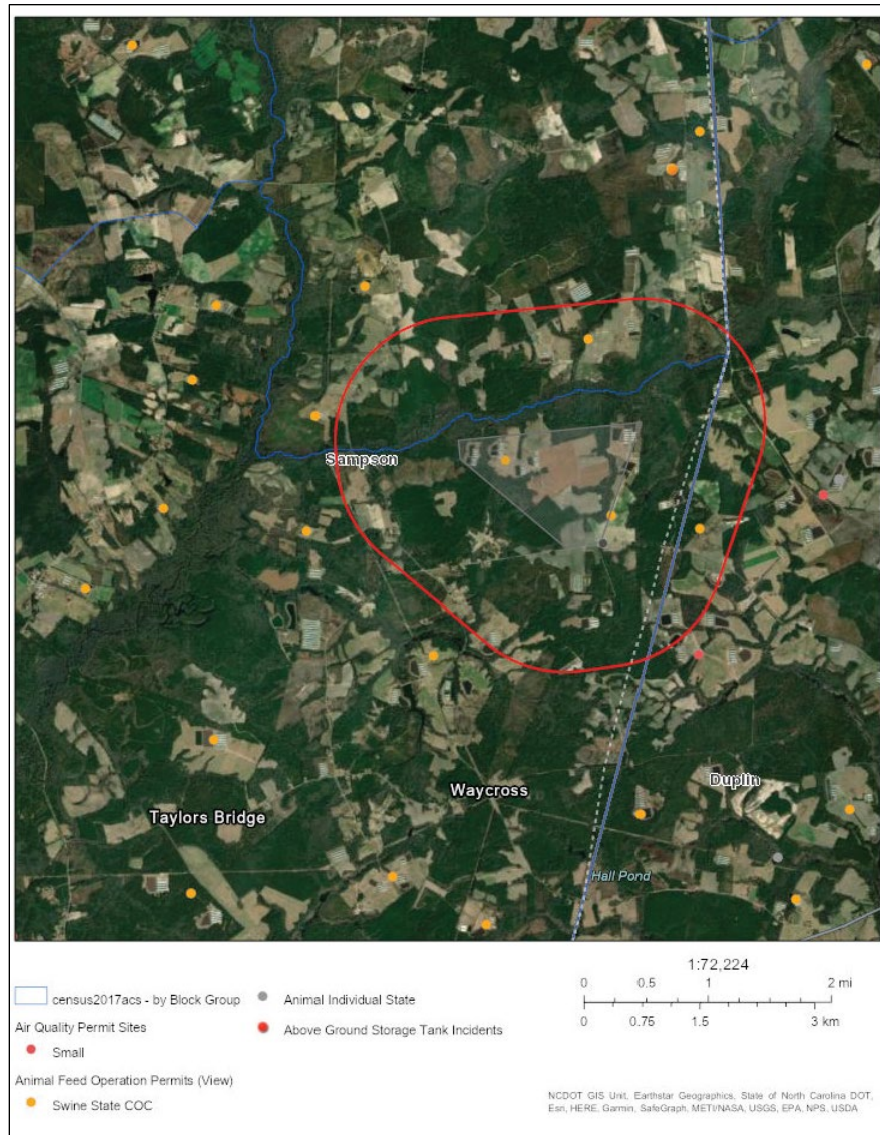

Figure 6. Permitted facilities and incidents with the one-mile radius surrounding Kilpatrick Farm

Within the one-mile buffer of Kilpatrick Farm (in Sampson County/Census Tract 9710), there are 4 permitted animal feeding operations (as of December 21, 2020).

Figure 7. Permitted facilities and incidents with the one-mile radius surrounding Waters Farm

Within the one-mile buffer of Waters Farm (in Duplin County, Census Tract 908.01), there are 2 air quality permit sites, and 10 permitted animal feeding operations (as of December 21, 2020).

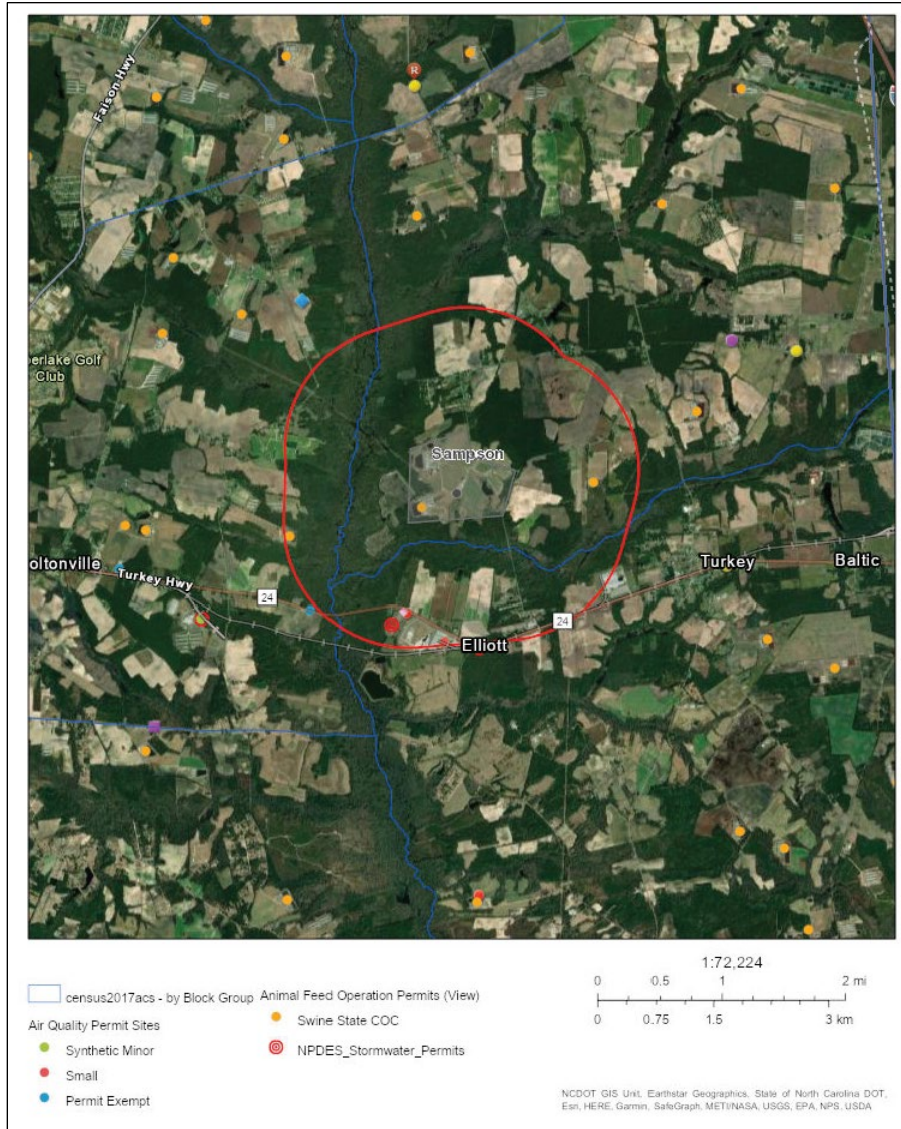

Figure 8. Permitted facilities and incidents with the one-mile radius surrounding Farms 2037 and 2038.

Within the one-mile buffer of Farms 2037 and 2038 (in Sampson County, Census Tract 9701), there are 3 permitted animal feeding operations, 1 air quality permitted facility, 1 permitted NPDES waste water treatment facility, 1 hazardous waste site, and 1 reported above ground storage tank incident (as of December 21, 2020).

9 Conclusion

The Draft EJ Report is an initial evaluation of the demographics and socioeconomics of the community area surrounding a proposed facility or permit modification. This includes information within a one-mile radius on race and ethnicity (decennial census year), poverty, per capita income, and ability to speak English (most current ACS census range), current NC Department of Commerce county tier designation, and presence or absence of American Indian Tribal areas. The Draft EJ Report does not include a reconnaissance of the community. The proposed Align RNG, LLC [gathering (or however it is described in the AQ EJ report)] facility and four farms reviewed in this report are located in an area designated with moderate health factors and outcomes in comparison to other areas of the state.

The study area displays higher percentages of African-American and Hispanic residents as compared to the state, and in some cases, the county as well. The study area also exhibits higher poverty levels than the state, and the county in some instances. One potential LEP language group (Spanish) meets the 5% threshold for Safe Harbor Guidelines. Extra attention will also be given to ensure language data is accurate and translation or interpretation services will be considered for essential documents and for the planned public meeting. Finally, the list of sensitive receptors will be consulted while considering additional outreach options that may best fit this community's needs.

Based on this Draft EJ Report, DEQ will provide the following outreach and opportunities for meaningful involvement:

- 1) Publish the notice for soliciting public comments and information on the scheduled public meeting in newspapers in both Sampson and Duplin counties
- 2) Translate the public notice into Spanish and publish the notice on the DEQ Website
- 3) Create a one-page flyer describing the project using language that is easy-to-understand
- 4) Create both an English and Spanish dedicated voicemail line to receive public comments by phone
- 5) Evaluate and implement, as appropriate, alternative methods to reach the Spanish-speaking community, such as advertising on Spanish language radio stations and social media?
- 6) Consult with local community organizations on best outreach methods
- 7) Provide project information to and consultation with the Coharie Indian Tribe
- 8) Announce reminders through social media
