

1 15A NCAC 02T .1304 is amended with changes as published in 23:03 NCR 197 as follows:

2
3 **15A NCAC 02T .1304 STATE PERMITTING REQUIREMENTS**

4 (a) This rule applies to animal waste management systems that meet the definition of an animal operation in
5 G.S. 143-215.10B but are not subject to regulation under Rule .1305.

6 (b) An animal waste management plan shall be submitted as follows:

7 (1) The animal waste management practices or combination of practices which are selected to
8 comprise a plan for a specific facility must meet NRCS standards, or the standard of practices
9 adopted by the Soil and Water Conservation Commission pursuant to 15A NCAC 06F .0104,
10 or standards for any combination of practices which provide water quality protection and are
11 approved by one of these two agencies; and all applicable state statutes and rules at the time
12 of development or design. NRCS standards relating to phosphorus application rates for
13 animal waste are not incorporated as part of this rule.

14 (2) As required by G.S. 143-215.10C, plans must be approved by a technical specialist and the
15 certificate must be submitted to the Division on Division supplied forms or forms approved
16 by the Division as providing the same information as required by the Division's forms. The
17 technical specialist must certify that the best management practices that comprise the plan
18 meet the applicable standards and specifications.

19 (3) The land application and siting setbacks must meet the applicable conditions established in
20 G.S. 106-803 and NRCS standards at the time of construction.

21 (4) New and expanded animal waste treatment systems such as lagoons and waste storage
22 structures shall be located at least 100 feet from a perennial stream or perennial waterbody.
23 For new and expanding systems, this setback requirement shall also apply to areas in feedlots
24 where an established vegetative cover will not be maintained because of the concentration of
25 animals, with the exception of stock trails and stream crossings.

26 (5) The waste shall not be applied at greater than agronomic rates.

27 (6) For animal waste management facilities desiring to increase their animal population beyond
28 that permitted, a new individual permit or new certificate of coverage to operate under a
29 general permit must be issued before the additional animals are stocked.

30 (c) For each change of ownership of the system, the new owner must notify the Division in writing within 60
31 days of transfer of ownership.

32 (d) New and expanding swine facilities must demonstrate compliance with Rule .1307 of this Section prior to
33 receiving a permit from the Division.
