

December XX, 2014

Resident
1234 Some Street
Your Town, NC 2xxxx

Regarding property at:

Dear Resident ,

You are being contacted because you live or have property near one of Duke Energy's active or retired coal-fired power plants in North Carolina. As part of the groundwater assessment being conducted in accordance with N.C. Session Law 2014-122, the N.C. Department of Environment and Natural Resources (DENR) is requesting that, at a minimum, all water supply wells within 1,000 feet of each facility's boundary be sampled. You are being notified because DENR would like to test your well at the property noted above during this investigation. Information that will be gathered during this process will be used to guide the successful closure of the coal ash basins.

DENR's Division of Water Resources encourages you to participate in this opportunity to ensure that your water is safe and healthful for you and your family and is not impacted by nearby coal ash basins. **There is no cost to the well owner or to the resident for this testing. Well testing costs will be paid by Duke Energy.**

In order for your well to be tested, please answer the questions on the enclosed pre-paid post card and mail it within 15 days. If you do not want your well tested, please check the No box and mail the card back to the Division of Water Resources.

Please include your contact information – phone number and email – so an appointment for the well test can be arranged.

If you have a preference for which laboratory does the testing, please choose a laboratory in your area from the enclosed list. All laboratories on the list are certified to perform water supply well testing for this investigation. If you do not choose a laboratory, DWR will choose a laboratory for you.

We will send your information to the chosen laboratory. Someone from that laboratory will contact you to arrange a date and time to come to your home to collect water samples from your well. Well sampling will begin in January 2015.

Results of all tests will be sent to the Division of Water Resources and to Duke Energy. DWR will send to you the results of the tests and an explanation of the results.

Sample tests that show exceedances of groundwater quality standards will also be sent to the state Department of Health and Human Services for a health-risk evaluation. Results of that evaluation will be sent to you along with the results of the sampling.

For more information about the sampling and testing process, please visit the Division of Water Resources website at: <http://goo.gl/NUZRLI>

Frequently Asked Questions

Will I be contacted about when my well will be tested? Do I need to be home?

A representative of the selected laboratory will contact you to work out details of the testing procedure. If your wellhead is easily accessible it may not be necessary for you to be at home when the testing is done.

I recently filled out a postcard for Duke asking if I have a well. Why do I need to do that again?

The two postcards are for different purposes. A response to the enclosed postcard is needed in order to identify which laboratory will test your well and to facilitate scheduling the test.

What is my well being tested for?

Wells will be sampled and tested for a number of metals and other constituents that may be naturally occurring but are also associated with coal burning activities. Those are: aluminum, antimony, arsenic, barium, beryllium, boron, cadmium, calcium, cobalt, chromium, copper, iron, lead, magnesium, manganese, molybdenum, mercury, nickel, potassium, selenium, sodium, strontium, thallium, vanadium, zinc, chloride, sulfate, alkalinity, bicarbonate, carbonate, total dissolved solids, total suspended solids and turbidity. Field tests will be done for: pH, temperature, specific conductance, dissolved oxygen, oxidation reduction potential and the well water level, if possible. The groundwater standards can be found on the Division of Water Resources website at: <http://goo.gl/NUZRLI>

That is a long list. Can I assume my water is safe if the tests come back clean?

We are testing for constituents associated with coal ash contamination. However, this is not a comprehensive test of your well water. To learn more about having your private well tested, go to TestYourWell.nc.gov, a website provided by the N.C. Department of Health and Human Services.

If my well water shows exceedances of groundwater standards for one or more of the constituents listed above, what then?

Test results will be sent to the NC Department of Health and Human Services Division of Public Health. They will conduct a health risk evaluation of the well sampling results to determine if the water is safe for drinking, bathing and other uses. The results of the sampling and the evaluation from the Division of Public Health will be sent to the well owner along with a letter from the Division of Water Resources discussing possible next steps based on information particular to your well.

What if I miss my 15 day window but still want my well tested?

If you miss the deadline and still want your well tested, please call the Division of Water Resources at 919-807-6464 and ask to speak with someone about drinking water well testing near Duke Energy coal ash facilities.

Will my well test results be available as public information?

All testing that is conducted during this investigation is considered public information.

I want to know more about the state's regulatory process as it moves forward. Where is the best place to find information?

The Division of Water Resources has a website that focuses on our regulation of Duke Energy's coal-ash facilities. It contains links to drinking water testing, groundwater testing, federal and state permitting and other coal-ash related information. It is updated regularly as additional information and reports are submitted. You can find it at: <http://goo.gl/NUZRLI>.

For further questions, visit our web page at: <http://goo.gl/NUZRLI> or contact DWR at:

List of Laboratories for well testing

Find your home region on this map:

The laboratories available for each region are listed below.

All Regions

- Shealy Environmental Services, Inc., West Columbia, S.C.
- Research and Analytical Laboratories, Kernersville, N.C.

Asheville

- Pace Analytical Services, Inc., Huntersville, N.C.
- Rogers and Callcott Engineers, Inc., Greenville, SC
- Prism Laboratories, Inc., Charlotte, N.C.

Fayetteville

- Microbac Laboratories, Inc., Fayetteville, N.C.
- Pace Analytical Services, Inc., Huntersville, N.C.
- Meritech, Inc., Reidsville, N.C.
- Environment 1, Inc., Greenville, N.C.
- Element One, Inc., Wilmington, N.C.

Mooresville

- Prism Laboratories, Inc., Charlotte, N.C.
- K&W Laboratories, Midland, N.C.
- Pace Analytical Services, Inc., Huntersville, N.C.
- Rogers and Callcott Engineers, Inc., Greenville, SC
- Meritech, Inc., Reidsville, N.C.

Raleigh

- Pace Analytical Services, Inc., Huntersville, N.C.
- Meritech, Inc., Reidsville, N.C.

- Prism Laboratories, Inc., Charlotte, N.C.
- Microbac Laboratories, Inc., Fayetteville, N.C.

Washington

- Environment 1, Inc., Greenville, N.C.
- Pace Analytical Services, Inc., Huntersville, N.C.
- Rogers and Callcott Engineers, Inc., Greenville, SC
- Microbac Laboratories, Inc., Fayetteville, N.C.
- Environmental Chemists, Inc. (Envirochem), Wilmington, N.C.
- Element One, Inc., Wilmington, N.C.

Wilmington

- Environmental Chemists, Inc. (Envirochem), Wilmington, N.C.
- Element One, Inc., Wilmington, N.C.
- Environment 1, Inc., Greenville, N.C.
- Microbac Laboratories, Inc., Fayetteville, N.C.

Winston-Salem

- Meritech, Inc., Reidsville, N.C.
- Pace Analytical Services, Inc., Huntersville, N.C.
- Prism Laboratories, Inc., Charlotte, N.C.
- K&W Laboratories, Midland, N.C.
