

Guidance for When Multiple Permits May be Required

In some cases, one stormwater program satisfies the requirements of another (such as the Neuse NSW for Phase II); however, in other cases, multiple permits and/or programs apply. The interactive map should indicate multiple programs in either the “NOTE” or other fields.

This list provides supplemental guidance about when more than one permit may be required. **DWQ began implementing Phase II post-construction requirements on July 1, 2007. DWQ began implementing the new Coastal Stormwater Rule requirements on October 1, 2008.**

- **Where WS-III or WS-IV Watersheds overlap Coastal (CAMA) Counties or ORW water boundaries:** Contact the [DWQ Regional Office](#) for a State Stormwater (SSW) permit. Please verify with the local [Water Supply Watershed Program](#) jurisdiction that WS requirements are met.
- **Where WS-III or WS-IV Watersheds overlap HQW or ORW water boundaries:** Contact the [DWQ Regional Office](#) for a SSW permit. Please verify with the local [Water Supply Watershed Program](#) jurisdiction that WS requirements are met.
- **Where WS-I or WS-II Watersheds overlap ORW water boundaries:** Contact the [DWQ Regional Office](#) for a State Stormwater (SSW) permit. Please verify with the local [Water Supply Watershed Program](#) jurisdiction that WS requirements are met.
- **Where Phase II areas overlap coastal (CAMA) counties:** If the development is in an incorporated area, go to the local government for a Post-Construction permit. If the program hasn't started there yet, contact the [DWQ Regional Office](#). In an unincorporated area, you must contact the DWQ Regional Office for a Post-Construction permit (Coastal Stormwater Rules apply).
- **Where Phase II cities overlap HQW or ORW water boundaries outside CAMA counties:** Contact the [DWQ Regional Office](#) for a State Stormwater (SSW) permit. However, you must verify all local post-construction requirements are met. Even though the State Stormwater program currently satisfies Phase II, the local government may mandate more stringent controls.
- **Where Tar-Pamlico NSW Strategy Areas overlap Coastal (CAMA) Counties:** Please contact the [local government](#) in your area for NSW stormwater requirements. You must also contact the [DWQ Regional Office](#) for a SSW permit.
- **Where Tar-Pamlico NSW Strategy Areas overlap HQW or ORW water boundaries:** Please contact the [local government](#) in your area for NSW stormwater requirements. You must also contact the [DWQ Regional Office](#) for a SSW permit.
- **Where Tar-Pamlico NSW Strategy Areas overlap WS-I, II, III, IV:** Please contact the [local government](#) in your area for NSW stormwater requirements. You must also contact the local [Water Supply Watershed Program](#) jurisdiction to ensure WS requirements are met.
- **Where Neuse NSW Strategy Areas overlap Coastal (CAMA) Counties:** Please contact the [local government](#) in your area for NSW stormwater requirements. You must also contact the [DWQ Regional Office](#) for a SSW permit.
- **Where Neuse NSW Strategy Areas overlap HQW or ORW water boundaries:** Please contact the [local government](#) in your area for NSW stormwater requirements. You must also contact the [DWQ Regional Office](#) for a SSW permit.

Guidance for When Multiple Permits May be Required

- **Where Neuse NSW Strategy Areas overlap WS-I, II, III, IV:** Please contact the [local government](#) in your area for NSW stormwater requirements. You must also contact the local [Water Supply Watershed Program](#) jurisdiction to ensure WS requirements are met.
- **Where Neuse/Tar-Pamlico NSW Strategy Areas overlap Water Supply and HQW/ORW boundaries:** Please contact the local government in your area for NSW stormwater requirements. You must also contact the local [Water Supply Watershed Program](#) jurisdiction to ensure WS requirements are met. In addition, you must contact the [DWQ Regional Office](#) for a SSW permit.
- **Where Phase II areas overlap Neuse, Tar-Pamlico, and portions of the Catawba River Basins:** More stringent buffer requirements (than the 30 foot buffer required by Session Law 2006-246) apply in these areas per the applicable 15A NCAC 2B .0200 Rules.
- **These existing programs satisfy Phase II Post-Construction, as of October 1, 2008:**
 - ✓ Water Supply Watersheds I – IV (15A NCAC 2B .0212 - .0216)
 - ✓ *Freshwater* HQW (15A NCAC 2H .1006)
 - ✓ *Freshwater* ORW (15A NCAC 2H .1007)
 - ✓ Neuse NSW Management Strategy (15A NCAC 2B .0235)
 - ✓ Tar-Pam NSW Management Strategy (15A NCAC 2B .0258)
 - ✓ Randleman Lake Water Supply (15A NCAC 2B .0251).
 - ✓ Revised Coastal Stormwater Rules (15A 2H .1005 & SL 2008-211)
